Urban World Cities And The Rise Of The Consuming Class:

Urban World Richard Dobbs,Jaana Remes,James Manyika,Charles Roxburgh,Sven Smit,Fabian Schaer,McKinsey Global Institute,2012 Cities have long been the world s economic dynamos but today the speed and scale of their expansion are astonishing The latest research from the McKinsey Global Institute explores the phenomenon of urban growth and the one billion people in rapidly growing cities who will become consumers by 2025 Abstract *No Ordinary Disruption* Richard Dobbs,James Manyika,Jonathan Woetzel,2016-08-30 Our intuition on how the world works could well be wrong We are surprised when new competitors burst on the scene or businesses protected by large and deep moats find their defenses easily breached or vast new markets are conjured from nothing Trend lines resemble saw tooth mountain ridges The world not only feels different The data tell us it is different Based on years of research by the directors of the McKinsey Global Institute *No Ordinary Disruption* The Four Forces Breaking all the Trends is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy the rise of emerging markets the accelerating impact of technology on the natural forces of market competition an aging world population and accelerating flows of trade capital and people Our intuitions formed during a uniquely benign period for the world economy often termed the Great Moderation Asset prices were rising cost of capital was falling labour and resources were abundant and generation after generation was growing up more prosperous than their parents But the Great Moderation has gone The cost of capital may rise The price of everything from grain to steel may become more volatile The world s labor force could shrink Individuals particularly those with low job skills are at risk of growing up poorer than their parents What sets *No Ordinary Disruption* apart is depth of analysis combined with lively writing informed by surprising memorable insights that enable us to quickly grasp the disruptive forces at work For evidence of the shift to emerging markets consider the startling fact that by 2025 a single regional city in China Tianjin will have a GDP equal to that of the Sweden of that in the decades ahead half of the world s economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard pressed to locate on a map What we are now seeing is no ordinary disruption but the new facts of business life facts that require executives and leaders at all levels to reset their operating assumptions and management intuition *The Oxford Handbook of Management in Emerging Markets* Dr. Robert Grosse,Dr. Klaus E. Meyer,2019-01-08 For nearly two decades emerging markets have been a primary source of growth in the world economy They have become more international and compete more extensively with companies in developed countries For these reasons an understanding of managing businesses in emerging markets is a fundamental skill for competing in the twenty first century The Oxford Handbook of Management in Emerging Markets identifies key elements of the business systems and competition in emerging markets around the world and then looks at competitive strategies of companies going into and coming out of these countries While business is business the handbook s focus is on how management differs depending on

the different environmental characteristics in emerging markets such as the role of the government the potential weakness of infrastructure and the skill and innovation bases available locally in emerging markets among other elements The volume is organized into five sections The first section establishes conceptual perspectives for exploring the current business environment in emerging markets The second section focuses on questions surrounding governance and markets The third explores multinational enterprises MNEs in emerging economies while the fourth section looks at local firms and emerging market MNEs The fifth and final section looks at management in emerging markets within specific countries and regions around the world This handbook is a vital resource for scholars students and managers looking to expand into emerging economies by providing comprehensive analyses of functional areas from human resources to finance to marketing and on issues such as family businesses state owned enterprises and the bottom of the pyramid
