Urban Policy Issues Canadian Perspectives:

Urban Policy Issues Edmund P. Fowler, David Siegel, 2002 *Urban Policy Issues Canadian Perspectives* Second Edition provides a unique introductory survey of the range of policy fields for which local governments are responsible policies that are important because they define how local governments interact with their citizens As far as citizens are concerned the policies that local governments adopt are the face of local government The first chapters of the text outline the various contexts within which urban public policies are made including demographics finance and governance structures Each of the remaining chapters covers a particular policy area ranging from transportation housing and development and education to leisure and culture environmental issues and public health Every chapter of this second edition has been written specifically for this book presenting material up to date to the end of the twentieth century and anticipating the concerns of the twenty first

Canadian Urban Governance in Comparative Perspective Kristin R. Good, *Urban Policy Issues* Richard Anthony Loreto, Trevor Price, 1990

How Ottawa Spends, 1993-94 Susan D. Phillips, 1993 *Governing Ourselves?* Mary Louise McAllister, 2011-11-01 Popular rhetoric suggests that the twenty first century has ushered in an era of homogeneity Urbanization globalization amalgamation media conglomeration and technological convergence have become familiar terms Given the pressures of integration and assimilation how are people within communities able to make decisions about their own environment whether individually or collectively To what extent can they govern themselves *Governing Ourselves* explores issues of influence and power within local institutions and decision making processes using numerous illustrations from municipalities across Canada It shows how communities large and small from Toronto to Iqaluit have distinctive political cultures and therefore respond differently to changing global and domestic environments Case studies of Prince George Sherbrooke Saint John and Kitchener Waterloo are used to illuminate historical and contemporary challenges to local governance This stimulating book covers traditional topics such as government structures and institutions and intergovernmental relations It also reaches more broadly into areas of inquiry relevant to geography urban planning environmental studies public administration sociology and Canadian studies

Policy Analysis in Canada Michael Howlett, Laurent Dobuzinskis, 2018-05-23 Policy analysis in Canada brings together original contributions from many of the field's leading scholars Contributors chronicle the evolution of policy analysis in Canada over the past 50 years and reflect on its application in both governmental and non governmental settings As part of the International Library of Policy Analysis series the book enables cross national comparison of public policy analysis concepts and practice within national and sub national governments media NGOs and other institutional settings Informed by the latest scholarship on policy analysis the volume is a valuable resource for academics and students of policy studies public management political science and comparative policy studies

Cities of Oil Timothy Cobban, 2014-01-31 *Cities of Oil* is the first sustained historical account of the development of the early Canadian petroleum refining and manufacturing industry In it Timothy W Cobban documents

the industry's development in southern Ontario from its beginnings in the 1850s to its later expansion on the outskirts of London to Petrolia and finally to Sarnia. He accounts for all of the industry's important developments and innovations, particularly the role played by municipalities in fostering its growth. Using extensive archival research, Cobban concludes that municipalities can stimulate the accelerated sustained development of local industry sectors, thus challenging the dominant view that the influence of municipalities on economic growth is marginal. *Cities of Oil* demonstrates the importance of accommodating the land and infrastructure needs of industry at critical junctures and implementing land use policies that encourage the dense clustering of industries. This book will be essential reading for those seeking a greater understanding of industrial growth in the province of Ontario.

Ecotourism Third Edition David A. Fennell, 2007-11-14 Focusing on an array of economic, social, and ecological inconsistencies that continue to plague ecotourism in theory and practice, this book examines ecotourism in reference to other related forms of tourism, impacts, conservation, sustainability, education, and interpretation, policy and governance, and the ethical imperative of ecotourism as these apply to the world's greenest form of tourism. This revised edition includes new information on the magnitude of the tourism industry, nature-based tourism, and the pros and cons of mass ecotourism; revised chapters on development, economics, marketing, policy, ecotourism in practice, and biodiversity conservation; a section on governance models, ecotourism programmes, operators, and guides; interpretation, certification, and ecolodge design; a discussion of ecotourism as an ethical or responsible form of tourism; approximately 300 new references. It includes case studies and considers the perspectives of many adjacent fields, including geography, economics, business, philosophy, biology, and environmental studies.

Overpromising and Underperforming? Peter Graefe, Julie Simmons, Linda A. White, 2013-01-08 Public reporting has been used experimentally in federal-provincial relations since the mid 1990s as an accountability mechanism to promote policy effectiveness, intergovernmental cooperation, and democratic legitimacy. Our understanding of how well it is working, however, remains limited to very specific policy sectors, even though this information is essential to policy makers in Canada and beyond. *Overpromising and Underperforming* offers a deeper analysis of the use of new accountability mechanisms, paying particular attention to areas in which federal spending power is used. This is the first volume to specifically analyse the accountability features of Canadian intergovernmental agreements and to do so systematically across policy sectors. Drawing on the experiences of other federal systems and multilevel governance structures, the contributors investigate how public reporting has been used in various policy fields and the impact it has had on policy making and intergovernmental relations.

Ecotourism David A. Fennell, 2004-03-01 Using a wealth of international case studies and photos, *Ecotourism: An Introduction* provides an accessible and comprehensive introduction to the key foundations, concepts, and issues related to ecotourism, the fastest growing segment of the global tourism industry. Among the topics covered are the foundations of ecotourism, tourism and ecotourism policy, the economics, marketing, and management of ecotourism, the social and ecological impacts of tourism,

ecotourism and development the role of ethics in ecotourism The book includes case studies from Scotland Austria the USA Canada Mexico and Australia

Sites of Governance Martin Horak, Robert Young, 2012-04-24 A rare glimpse into the world of public policy making in Canada's major cities

Local Governance in Transition Mary Louise McAllister, 2024-08-01 The early 2020s unleashed a perfect storm on governments worldwide Logistical challenges never before anticipated left some communities flailing while others thrived Epidemics natural disasters and economic collapses inspired innovation and creativity in many resourceful civic teams In *Local Governance in Transition* Mary Louise McAllister argues that communities wanting to thrive tomorrow must reimagine local governance today She begins with an overview of how government evolved in Canada then examines how interdisciplinary initiatives and policies can nudge cities toward a more sustainable future From coast to coast to coast environmental change brings existential challenges for Canadian communities Global awareness and collaboration are key in finding creative solutions for local governance and sustainability *Local Governance in Transition* examines systems thinking environmental studies and the mechanics of government Through the adoption of collaborative urban planning and policymaking and adaptive learning systems those working in local governance can foster healthier more resilient communities This text is for students leaders civil servants and anyone working toward sustainable cities

Graham, Susan Phillips, 2002-11-25 Canada's last experience with national urban policy making was in the 1970s The authors focus on what has happened since exploring how both our city regions and our ideas about the urban policy making process have changed The authors also examine both the past and present roles of the federal government and what it can and should do in the future Contributors include Caroline Andrew Paul Born Tamarack Institute for Community Engagement Cambridge Kenneth Cameron FCIP Policy and Planning Greater Vancouver Regional District W Michael Fenn Ontario Deputy Minister of Municipal Affairs and Housing Pierre Filion University of Waterloo Katherine Graham Pierre Hamel Universit de Montr al Christopher Leo University of Winnipeg Barbara Levine World University Service of Canada Sherilyn MacGregor PhD Environmental Studies York University Warren Magnusson University of Victoria Beth Moore Milroy Toronto Metropolitan University Merle Nicholds former Mayor of Kanata Evelyn Peters University of Saskatchewan Susan Phillips Valerie Preston York University Andrew Sancton University of Western Ontario Lisa Shaw Canadian Centre for Policy Alternatives Enid Slack Enid Slack Consulting Inc Sherri Torjman Caledon Institute of Social Policy Carolyn Whitzman doctoral candidate School of Geography and Geology McMaster University David Wolfe University of Toronto and Madeleine Wong University of Wisconsin

In the Nature of Cities Nik Heynen, Maria Kaika, Erik Swyngedouw, 2006-03-23 The social and material production of urban nature has recently emerged as an important area in urban studies human environmental interactions and social studies This has been prompted by the recognition that the material conditions that comprise urban environments are not independent from social political and economic processes or from the cultural construction of what constitutes the urban or the natural

Through both theoretical and empirical analysis this groundbreaking collection offers an integrated and relational approach to untangling the interconnected processes involved in forming urban landscapes. The essays in this book attest that the re-entry of the ecological agenda into urban theory is vital both in terms of understanding contemporary urbanization processes and of engaging in a meaningful environmental politics. They debate the central themes of whose nature is or becomes urbanized and the uneven power relations through which this socio-metabolic transformation takes place. Including urban case studies, international research and contributions from prominent urban scholars, this volume will enable students, scholars and researchers of geographical, environmental and urban studies to better understand how interrelated everyday economic, political and cultural processes form and transform urban environments.

Transforming Parks and Protected Areas Kevin S. Hanna, Douglas A. Clark, D. Scott Slocombe, 2007-10-18. A rare collection of articles that fuses academic theory, critique of practice and practical knowledge. *Transforming Parks and Protected Areas* analyzes and critiques the emerging issues in the design and operation of parks and protected areas.

The Commercialisation of Sport Trevor Slack, 2004. Sport has become increasingly commercialised and there are many examples of close links that have developed between sport and business. This collection examines five of them in a global context.

Small Cities, Big Issues Christopher Walmsley, Terry Kading, 2018-07-20. Small Canadian cities confront serious social issues as a result of the neoliberal economic restructuring practiced by both federal and provincial governments since the 1980s. Drastic spending reductions and ongoing restraint in social assistance, income supports and the provision of affordable housing combined with the offloading of social responsibilities onto municipalities has contributed to the generalization of social issues once chiefly associated with Canada's largest urban centres. As the investigations in this volume illustrate, while some communities responded to these issues with inclusionary and progressive actions, others were more exclusionary and reactive, revealing forms of discrimination, exclusion and othering in the implementation of practices and policies. Importantly, however, their investigations reveal a broad range of responses to the social issues they face. No matter the process and results of the proposed solutions, what the contributors uncovered were distinctive attributes of the small city as it struggles to confront increasingly complex social issues. If local governments accept a social agenda as part of its responsibilities, the contributors to *Small Cities, Big Issues* believe that small cities can succeed in reconceiving community based on the ideals of acceptance, accommodation and inclusion.

The Public Metropolis Frances Frisken, 2007. *The Public Metropolis* traces the evolution of Ontario government responses to rapid population growth and outward expansion in the Toronto city region over an eighty-year period. Frisken rigorously describes the many institutions and policies that were put in place at different times to provide services of region-wide importance and skilfully assesses the extent to which those institutions and policies managed to achieve objectives commonly identified with effective regional governance. Although the province acted sporadically and often reluctantly in the face of regional population growth and expansion, Frisken argues that its various interventions nonetheless contributed to the region's most

noteworthy achievement a core city that continued to thrive while many other North American cities were experiencing population economic and social decline This perceptive and comprehensive examination of issues related to the evolution of city regions is critical reading not only for those teaching and researching in the field but also for city and regional planners officials at all levels of government and urban historians The research writing and publication of this book has been supported by the Neptis Foundation

Canadian Perspectives on Immigration in Small Cities Glenda Tibe Bonifacio, Julie L. Drolet, 2016-10-31 This book examines immigration to small cities throughout Canada It explores the distinct challenges brought about by the influx of people to urban communities which typically have less than 100 000 residents The essays are organized into four main sections partnerships resources and capacities identities belonging and social networks health politics and diversity and Francophone minority communities Taken together they provide a comprehensive multi disciplinary perspective on the contemporary realities of immigration to small urban locations Readers will discover how different groups of migrants immigrants and Francophone minorities confront systemic discrimination how settlement agencies and organizations develop unique strategies for negotiating limited resources and embracing opportunities brought about by changing demographics and how small cities work hard to develop inclusive communities and respond to social exclusions In addition each essay includes a case study that highlights the topic under discussion in a particular city or region from Brandon Manitoba to the Thompson Nicola Region in British Columbia from Peterborough Ontario to the Niagara Region As a complement to metropolitan based works on immigration in Canada this collection offers an important dimension in migration studies that will be of interest to academics researchers as well as policymakers and practitioners working on immigrant integration and settlement

Local Government and Metropolitan Regions in Federal Countries John Kincaid, Nico Steytler, 2009-07-01 While local government is found in all federal countries its place and role in the governance of these countries varies considerably In some countries local government is considered an essential part of the federal nature of the state and recognized in the constitution as such whereas in others it is simply a creature of the subnational states provinces When referring to local government it is more correct to refer to local governments plural as these institutions come in all shapes and sizes performing widely divergent functions They range from metropolitan municipalities of mega cities to counties small town councils and villages Their focus is either multi purpose in the case of municipalities or single purpose in the case of special districts and school districts What unites these institutions of state is that there is no level of government below them That is also their strength and the source of their democratic claim they are the government closest to the people Political science experts from across the globe examine local governments by drawing on case studies of Australia Austria Brazil Canada Germany India Mexico Nigeria Switzerland Spain South Africa and United States Contributors include Martin Burgi Ruhr University Bochum Luis Cesar de Queiroz Ribeiro Federal University of Rio de Janeiro Jaap de Visser University of Western Cape Habu Galadima University of Jos Sol Garson Federal University of Rio de
