**European Port Cities**

**and Urban Regeneration** Enrico Tommarchi, 2022-07-29 Culture and event led regeneration have been catalysts for the transformation of redundant urban port areas and for the reframing of the image of many port cities which notably feature among mega event bidding and host cities. However, there is little understanding of the impacts of these processes on port city relationships as well as of how port city cultures shape mega events and the related regeneration strategies. The book examines the underexplored mutual links between on the one hand urban and socio economic regeneration driven by cultural and sporting mega events and on the other hand the spatial political and symbolic ties between cities and their ports. By adopting a cross national comparative perspective with in depth case studies Hull, Rotterdam, Genoa and Valencia and examples from other port cities across the world where mega events were held, the book engages with issues such as the tension between port and cultural uses, reactions and opposition to mega events in port cities, clashing urban imaginaries, drawing on port activity and culture, the role of port authorities and companies in the city's cultural life, the spectacularisation and commodification of local maritime culture and heritage, processes of cultural demaritimisation and remaritimisation of port cities. The book is therefore a contribution towards the bridging of port city and mega event studies and it provides insights for port city policy makers and mega event promoters drawing from a range of international experiences. The book also shows how societal and political change in the current ontologically insecure times may undermine the very paradigm of culture and event led regeneration in the years to come. **Social Exclusion and Inner City Europe S.**

**Ecodistricts : strategies and techniques for urban regeneration in Europe** Biennale internazionale di architettura Barbara Cappochin (Padova),Giuseppe Cappochin,2014

EU Cohesion Policy Nicola F. Dotti,Ida Musiałkowska,Sonia De Gregorio Hurtado,Julia Walczyk,2024-01-18 This engaging and topical book comprehensively explores the complexities surrounding the EU Cohesion Policy which has been addressing regional and urban development across Europe since the 1980s. Adopting a multidisciplinary approach it not only considers the goals of this long term investment policy which is to reduce territorial disparities between Member States and their regions but also considers the role it plays in the European integration process and the challenges the EU will face in its future.

**The Quality of Territorial Policies in Europe's Periphery** Mauro Tebaldi,Marco Calaresu,2021-05-02 This book focuses on territorial policies as instruments for local development in Europe's periphery. Using a multiple case research design in three typical case studies in the context of the Mediterranean island of Sardinia Italy we empirically test the hypothesis that the institutionalisation of the governance system is an independent variable that is capable of influencing the quality of public policy intended as a dependent variable. According to this hypothesis the two above mentioned variables tend to change according to a linear and direct correlation: upward variation of the degree of institutionalisation of the governance system tends to correspond to upward variation in the quality of the policy and vice versa. In our conclusions we discuss the descriptive and prescriptive implications of the empirical findings of the research for the local development of peripheral areas. Regarding the descriptive implications we explain how territorial policy making can be articulated based on the degree of institutionalisation of the governance system and the quality of the territorial policies. Regarding the prescriptive implications we identify the best practices for territorial governance in order to improve the chances of local development in Europe's periphery.
