Dearolph USMC,2014-08-15 As the world s urban areas continue to increase in size the possibility of U S forces conducting military operations in urbanized terrain also increases However the weapon systems the U S procures and employs obtain maximum effectiveness in open terrain These weapons prove less capable in urban terrain since their standoff and precision advantages suffer degradation due to buildings and the fleeting nature of enemy personnel U S weaponry also causes a large amount of collateral damage that may also result in civilian casualties which proves politically unacceptable Potential adversaries of the U S realize these limitations and present a target set that proves difficult to locate and engage The target set the enemy uses in urban terrain consists of enemy combatants mixing with non combatants enemy snipers and special purpose teams Assets the U S possesses that can engage elements of the enemy s urban target set include U S Army and Marine Corps snipers However a determination on whether more snipers will effectively defeat the target set requires consideration This monograph analyzes the contemporary operating environment to articulate the enemy s urban target set Next a review of current U S Army and Marine Corps sniping doctrine organization and training establishes the foundation for presenting the sniper s capability to defeat the urban target set In order to provide a balanced argument other possible solutions to engaging and defeating the target set receive consideration Research shows that the sniper company organized at the division level achieves the desired effect of increasing the density of sniper teams on the urban battlefield The costs associated with the sniper company prove acceptable as it requires minimal expenditure concerning personnel and equipment The division sniper company will effectively counter the enemy s urban target set without causing non combatant casualties **US Special Operation Forces Handbook Volume 3 US Army Special Operation Forces: Strategic Information and Materials** IBP USA, Navy SEAL Sniper Glen Doherty,Brandon Webb,2017-01-03 The sniper is a battlefield threat second to none Mastering the art of marksmanship is critical but is only part of what makes a Navy SEAL sniper Snipers must be able to apply the craft in an urban environment or alone on a hostile mountain top with equal effectiveness Today s sniper must not just leverage

technological advances but also have the foreknowledge to select the best rifle and gear for the mission Increasingly he must have the mental toughness to adapt to a constantly changing environment gather intelligence and truly act as a force multiplier In this comprehensive look through the eyes of former Navy SEAL sniper instructor Brandon Webb and fellow Navy SEAL snipers Chris Kyle and Glen Doherty the authors reveal not just the fundamentals of marksmanship but also the science of shooting stalking and camouflage and how technological advances have changed the training and increased the effectiveness of the modern sniper Including maritime helicopter and urban sniper operations this updated edition also goes into detail on the latest research development testing and evaluation of weapons and optics From the basics like compensating for wind and bullet drop to camouflage and placing yourself or your team in the best position to take a photo or pull a trigger Webb and Doherty cover the critical elements that comprise the twenty first century sniper
