Cocozza,2023-03-21 The book is a true knowledge enhancing project dealing with the forms of rationality at work in social life which are so many varied and complex Published already in Spanish and Italian it analyses the role played by rationality through the lens of social theories in order to propose a problematic interpretation of human action Since there is nothing more practical than a good theory when seeking to understand our society the book reflects on the theoretical approaches that provide useful categories by means of which to understand and interpret individual organizational and institutional action It proposes an analysis of a wide variety of classics by eminent European and Anglo American thinkers such as Dahrendorf Mannheim Marx Popper Weber Habermas Luhmann Machiavelli Pareto Ardig Cesareo Parsons Sch tz Alexander Bauman Beck Sennett Antiseri Boudon Sen Simon to shed light on the relationship between rationality difficulties in thinking and extra rationality Finally the reasons for unexpected action are investigated as well as the strategic role played by ethics rationality and skills in postmodern societies on the basis of the contributions of Nussbaum and Piketty *Index Medicus.*
