Toward A Unified Criminology Toward A Unified Criminology:

Toward a Unified Criminology Robert Agnew, 2011-11 Why do people commit crimes How do we control crime The theories that criminologists use to answer these questions are built on a number of underlying assumptions including those about the nature of crime free will human nature and society These assumptions have a fundamental impact on criminology they largely determine what criminologists study the causes they examine the control strategies they recommend and how they test their theories and evaluate crime control strategies In *Toward a Unified Criminology* noted criminologist Robert Agnew provides a critical examination of these assumptions drawing on a range of research and perspectives to argue that these assumptions are too restrictive unduly limiting the types of crime that are explored the causes that are considered and the methods of data collection and analysis that are employed As such they undermine our ability to explain and control crime Agnew then proposes an alternative set of assumptions drawing heavily on both mainstream and critical theories of criminology with the goal of laying the foundation for a unified criminology that is better able to explain a broader range of crimes

A Philosophy of the Social Construction of Crime Polizzi, David, 2015-11-19 It is well known that the social definition of individuals and ethnic groups helps legitimize how they are addressed by law enforcement The philosophy of the social construction of crime and criminal behaviour reflects how individuals such as police officers construct meaning from the perspective from which they emerge which in turn influences their law enforcement outlook In the field this is generally viewed through a positivist frame of reference which fails to critically examine assumptions of approach and practice Written by an international specialist in this area this is the first book which attempts to situate the social construction of crime and criminal behaviour within the philosophical context of phenomenology and how these constructions help inform and ultimately justify the policies employed to address them Challenging existing thinking this is essential reading for academics and students interested in social theory and theories of criminology

Towards a Victimology of State Crime Dawn Rothe, David Kauzlarich, 2016-05-13 State crime victimization often leaves a legacy of unrecognized victims that are ignored forgotten or negated the right to be labeled as such Victims are often glossed over as the focus is on a state's actions or inactions rather than the subsequent victimization and victims Towards a Victimology of State Crime serves to highlight the forgotten victims processes and cases of revictimization within a sociological criminological framework Contributors include expert scholars of state crime and victimology from North America Europe Africa and Latin America to provide a well rounded focus that can address and penetrate the issues of victims of state crime This includes a diverse number of case study examples of victims of state crime and the systems of control that facilitate or impede addressing the needs of victims Additionally with the inclusion of a section on controls this
