Towards Speculative Realism Graham Harman, 2010 These writings chart Harman's rise from Chicago sportswriter to co-founder of one of Europe's most promising philosophical movements Speculative Realism *Posthumanism in the Novels of Kurt Vonnegut* Andrew Hicks, 2020-05-18 Posthumanism in the Novels of Kurt Vonnegut Matter That Complains So re-examines the prevailing critical consensus that Kurt Vonnegut was a humanist writer While more difficult elements of his work have often been the subject of scholarly attention the tendency amongst critics writing on Vonnegut is to disavow them or to subsume them within a liberal humanist framework When Vonnegut's work is read from a posthumanist perspective however the productive paradoxes of his work are more fully realised Drawing on New Materialist Eco Critical and Systems Theory methodologies this book highlights posthumanist themes in six of Vonnegut's most famous novels and emphasises the ways in which Vonnegut troubles human non human natural artificial and material discursive hierarchical binaries

Garcian Meditations Jon Cogburn, 2017-03-08 The publication of Form and Object A Treatise on Things by Tristan Garcia Prix de Flore winning novelist philosopher essayist and screenwriter is a genuine event in the history of philosophy Situating this event within classical modern and contemporary dialectical space Jon Cogburn evaluates Garcia's metaphysics differential ontology and militant anti-reductionism through a series of seemingly incompatible oppositions substance process analysis dialectic simple whole and discovery creation Cogburn also includes a critical assessment of the consequences of Garcia's philosophy the various unresolved problems in his treatise and the future prospects of speculative metaphysics

Against Capital Cliff Slaughter, 2016-03-25 The problem is not how to manage the capital system but to get rid of it And who will do the job These are the questions posed at the start of Cliff Slaughter's latest book Recognising the importance of István Mészáros's analysis in Beyond Capital 1995 and other books of the historic structural crisis that has taken capital into its stage of destructive self-reproduction Against Capital focuses on the crucial question of agency Today when there are fundamental disjunctures between the globalised economy the means of social control and political and state structures what are we to make of Marx's conclusion that the working class capital's only structural antagonist is the gravedigger of capitalism And what are the implications for this of the information revolution the changing composition of the working class and the emergence of new forms of oppositional organisation with young people to the fore Slaughter assembles contributions by participants in recent movements in South Africa Britain Spain Mexico countries in the former Soviet zone and in a major contribution from Yassamine Mather the Middle East He offers an extended critique of vanguardist conceptions such as Trotsky's the crisis of humanity is reduced to the crisis of working class revolutionary leadership and Kautsky's and the early Lenin's formulation that socialist consciousness must be brought to the working class from the

outside Finally Against Capital examines the necessary theoretical foundations of a rebuilt working class movement with special attention to the concepts of class consciousness and the relation between theory and practice This book is a compelling and distinctive contribution to recent debates encompassing works such as Thomas Piketty's Capital in the Twenty First Century 2014 and Paul Mason's PostCapitalism 2015 *Defiance* Roger Silverman, 2016-09-30 This socialist history of modern Greece tells the story of its rebirth in struggle the heroic resistance to Nazi occupation the civil war and its aftermath the colonels dictatorship and its overthrow the rise and fall of PASOK the debt crisis the popular uprising of 2010 12 the election of SYRIZA the referendum and the subsequent capitulation What lessons can Greece's experience teach those campaigning against austerity throughout Europe This book includes an Appendix by Eric Toussaint **In The Realm of the Senses** Stuart Walton, 2016-02-26 The five physical senses of seeing hearing smelling tasting and touching have been held to underpin the complexity of human experience ever since Aristotle first theorised about how they worked Classical and scholastic philosophy up to the time of the European Enlightenment relegated their operations to its margins viewing them as at best a distraction from higher thinking and at worst a positive deception Paradoxically what one could not objectively know the products of the mind were accorded precedence over the concrete From the Romantic era onwards the senses moved to the centre of speculative thought and the various dialectical currents of philosophy after Hegel made them interdependent with the intellectual function which was held to derive most or all of its authority from them This tendency has continued down to the sensualist hedonist and anti intellectual currents of our own day In this theoretical consideration of what has been done to the senses in modern experience Stuart Walton subjects the life of the senses to a further materialist turn one that refuses a spiritualisation of the material realm to which contemporary discourses of the body have often fallen prey while at the same time preserving sensuality from being delivered once again to a sterile idealism Bells and Whistles Graham Harman, 2013-11-29 In this diverse collection of sixteen essays lectures and interviews dating from 2010 to 2013 Graham Harman lucidly explains the principles of Speculative Realism including his own object oriented philosophy From Brazil to Russia and in Poland France Croatia and India Harman addresses local philosophical concerns with the energy of a roving evangelist He reflects on established giants such as Greenberg Latour and McLuhan while refining his differences with such younger authors as Brassier Bryant Garcia and Meillassoux He speaks to philosophers in Paris hecklers in New York media theorists in Berlin and architects in Curitiba as object oriented philosophy consolidates its position as the most widespread form of Speculative Realism There has never been a more upbeat introduction to one of the most challenging philosophical schools of our time How to Dismantle the NHS in 10 Easy Steps Youssef El-Gingihy, 2015-07-31 Dr Youssef El Gingihy a GP tells the story of how the NHS has been gradually converted into a market based healthcare system over the past 25 years This process is accelerating under the Coalition government and the very existence of a National Health Service is in danger He fears that there will not be an NHS as our generation grows old and

certainly not for our children Yet the British public remains largely unawares of this and the media with few exceptions have failed in their duty to inform them The NHS is being broken up into an universal insurance system based on the American model This book matters to all who use the NHS or are concerned by the privatisation of public services and the dismantling of equitable healthcare and welfare If you want to understand the real story behind the headlines and find out how you can preserve the NHS for the future then this book is essential reading Zen City Eliot Fintushel,2016-06-24 The world of ZEN CITY is a world of passionate desires the desire for power the desire for order and the desire for self transcendence ZEN CITY is a story about the struggle and violence of people who see themselves as striving for the ultimate Along the way ZEN CITY presents a sly critique of the practice and perversions of imported spirituality in twentieth century America
