A Handbook for Medical Teachers D.I. Newble, R.A. Cannon, 2012-12-06 Major changes continue to occur in medical education There are increasing external and internal pressures to improve the quality of courses and the teaching performance of individual staff Since the publication of the first edition of this book in 1983 the Handbook for Medical Teachers has established itself as an ideal resource for both new and established teachers in an area where there is very little other support It successfully combines basic educational principles with a how to approach in a very readable way supported by numerous illustrations and cartoons This third edition has been extensively revised throughout to reflect the many changes in medical education since the last edition There is a new chapter on problem based learning as well as an appendix on how to keep a teaching portfolio as a support for academic promotion or staff appraisal A Handbook for Medical Teachers is essential reading for all those involved in any area of medical teaching and research

Deep Active Learning Kayo Matsushita, 2017-09-12 This is the first book to connect the concepts of active learning and deep learning and to delineate theory and practice through collaboration between scholars in higher education from three countries Japan the United States and Sweden as well as different subject areas education psychology learning science teacher training dentistry and business It is only since the beginning of the twenty first century that active learning has become key to the shift from teaching to learning in Japanese higher education However active learning in Japan as in many other countries is just an umbrella term for teaching methods that promote students active participation such as group work discussions presentations and so on What is needed for students is not just active learning but deep active learning Deep learning focuses on content and quality of learning whereas active learning especially in Japan focuses on methods of learning Deep active learning is placed at the intersection of active learning and deep learning referring to learning that engages students with the world as an object of learning while interacting with others and helps the students connect what they are learning with their previous knowledge and experiences as well as their future lives What curricula pedagogies

assessments and learning environments facilitate such deep active learning This book attempts to respond to that question by linking theory with practice *The Absolute Beginners Guide: Making Chain Mail Jewelry* Lauren Andersen,2013-10-08 Keeping a beginner's time abilities and budget in mind *The Absolute Beginners Guide Making Chain Mail Jewelry* introduces jewelry makers to seven basic weaves Eighteen fun stylish projects follow beginning with easy to make earrings and progressing to bracelets and necklaces In addition to practicing basic weaves and creating beautiful pieces beginners will learn many other important skills They will learn how to use chain mail to embellish leather and other materials add crystal accents make stretchable chain mail with rubber O rings add color with anodized aluminum rings and more **New**

Approaches to Problem-based Learning Terry Barrett,Sarah Moore,2010-10-04 Problem based learning PBL is a pedagogical approach that has the capacity to create vibrant and active learning environments in higher education However both experienced PBL practitioners and those new to PBL often find themselves looking for guidance on how to engage and energise a PBL curriculum *New Approaches to Problem based Learning Revitalising your Practice in Higher Education* provides that guidance from a range of different complementary perspectives Leading practitioners in the field as well as new voices in PBL teaching and learning have collaborated to produce this text Each chapter provides practical and experienced accounts of issues and ideas for PBL as well as a strong theoretical and evidence base Whether you are an experienced PBL practitioner or new to the processes and principles of PBL this book will help you to find ways of revitalising and enriching your practice and of enhancing the learning experience in a range of higher education contexts

Developing Translation Competence Christina Schäffner,Beverly Adab,2000-10-15 This volume presents a comprehensive study of what constitutes Translation Competence from the various sub competences to the overall skill Contributors combine experience as translation scholars with their experience as teachers of translation The volume is organized into three sections Defining Building and Assessing Translation Competence The chapters offer insights into the nature of translation competence and its place in the translation training programme in an academic environment and show how theoretical considerations have contributed to defining building and assessing translation competence offering practical examples of how this can be achieved The first section introduces major sub competences including linguistic cultural textual subject research and transfer competence The second section presents issues relating to course design methodology and teaching practice The third section reflects on criteria for quality assessment **Scientific and Technical Aerospace**
