

THE UNIVERSITY

Established under the U.P. State Universities Act (1973), then named as Garhwal University was founded in December 1973. It was rechristened in 1989 as Hemvati Nandan Bahuguna Garhwal University. Today this University is amongst the ten largest University of the country with 3 campuses and more than 180 affiliating colleges and institutions (both state run and self-financed). Since its inception, despite the limited resources and various geographical constraints, the University has charted a course of growth and development, to gain recognition as one of the better universities in India. As a mark of appreciation for its academic achievements, HNB Garhwal University was upgraded as a Central University under the Central Universities Act, 2009.

The University is located at Srinagar (105 kms from Rishikesh) on the banks of river Alaknanda, one of the major tributaries of river Ganga. The serene environment presents a near perfect setting for intellectual pursuits. With its three campuses: Birla Campus at Srinagar (Garhwal), BGR Campus at Pauri and SRT Campus at Badshahi Thaul the University offers a vast variety of courses and academic programmes through its 14 schools. HNB Garhwal University remains an institution founded with a vision of fostering meaningful

University Of State Prospectus 2015:

State Capture Alex Hertel-Fernandez, 2019-01-03 Most Americans pay little attention to the massive number of elections that occur at the state level every year Yet cumulatively a party's success in state level races across the country can produce major shifts in policymaking and governance That is precisely what has happened in the US since 2010 In a wave election that year the Republican Party began their ascendancy in state level elections and by 2016 had solidified their dominance The party now fully controls 25 state legislatures and governorships one of the largest advantages either party has had since the New Deal After the GOP wave a broad swathe of states began considering and enacting a near identical set of conservative priorities often even using the exact same text Where did this flood of new legislation come from How did so many states arrive at the same proposals at precisely the same time As Alexander Hertel Fernandez shows in the eye opening *State Capture* the answer can be found in a trio of powerful interest groups the Koch Brothers run Americans for Prosperity AFP the American Legislative Exchange Council ALEC and the State Policy Network SPN Drawing from an impressive evidence base Hertel Fernandez explains how since the 1970s conservative activists wealthy donors and big businesses constructed a right wing troika of overlapping and influential lobbying groups But it is about more than this It also teases out how conservative corporate mobilization has fostered epochal shifts in the American political economy the decline of unions party polarization and the skyrocketing concentration of wealth *State Capture* will be essential reading for anyone interested in understanding contemporary American politics

European Military Culture and Security Governance Tamir Libel, 2016-03-17 This book offers the first systematic comparative analysis of military education and training in Europe within the context of the post Cold War security environment Based on an analysis of military

education institutions in the UK Germany Finland Romania and the Baltic States this book demonstrates that the convergence of European military cultures since the end of the Cold War is linked to changes in military education The process of convergence originates at least in part from the full or partial adoption of a new concept by post commissioning professional military education institutions the National Defence University Officers are now educated alongside civilians and public servants wherein they enjoy a socialization experience that is markedly different from that of previous generations of European officers and is increasingly similar across national borders In addition this book argues that with the control over the curricula and graduation criteria increasingly set by civilian higher education authorities the European armed forces while continuing to exist and hold significant although declining capabilities stand to lose their status as a profession in the traditional sense This book will be of much interest to students of military European security policy European politics and IR in general

University Community Engagement and Lifelong Learning Julia Preece, 2017-07-13 This book offers a conceptual re think of how university community engagement functions as a lifelong learning resource for communities While having a specific focus on the South African context it has important implications

for other universities which are concerned with their communities and makes a compelling argument for the university as a public good in spite of current trends towards marketization and commodification of higher education The book draws on a theoretical framework of capabilities asset based community development and the adult learning concept of dialogue to propose a model whereby the boundary walls of the university become metaphorically porous so that community members feel free to interact with the university as equal members of society A historical outline of African universities is provided as well as an exploration of the evolution of terms for community engagement service learning and learning cities and an examination of the policy and practice implications for the ideological model of a porous university

Access to Higher Education Anna Mountford-Zimdars, Neil Harrison, 2016-11-18 How do we understand and explain who has access to higher education How do we make sense of persisting and new forms of inequality How can global national and institutional policymakers and practitioners make higher education more inclusive Access to Higher Education Theoretical perspectives and contemporary challenges seeks to update thinking on these questions combining new voices and emerging perspectives with established writers in the field This pioneering text highlights the contribution of social theory to issues of access to education with chapters introducing and drawing on the works of key interdisciplinary thinkers including Pierre Bourdieu Margaret Archer Amartya Sen and Herbert Simon It then moves to examines how theoretical perspectives can be applied to the contemporary challenges of forging more equal access with examples drawn from a wide range of contexts including the UK the US Australia South Africa and Japan Global in scope this book documents the shared nature of the access challenge in a period when higher education is growing rapidly but inequalities continue to be stark It concludes by proposing a new direction for research and a reassertion of the role of the researcher as a social activist for disconnected and disadvantaged groups equipped with the thinking tools needed to move the agenda forward Access to Higher Education is a rigorous text for the global research community with relevance to policymakers practitioners and postgraduate students interested in social justice and social policy It provides those with an academic interest in access and a commitment to enhancing policy with theoretical and practical ideas for moving the access agenda forward in their institutional regional or national contexts

The Fifth Wave Michael M. Crow, William B. Dabars, 2020-04-14 Out of the crises of American higher education emerges a new class of large scale public universities designed to accelerate social change through broad access to world class knowledge production and

cutting edge technological innovation America's research universities lead the world in discovery creativity and innovation but are captive to a set of design constraints that no longer aligns with the changing needs of society Their commitment to discovery and innovation which is carried out largely in isolation from the socioeconomic challenges faced by most Americans threatens to impede the capacity of these institutions to contribute decisively and consistently to the collective good The global preeminence of our leading institutions moreover does not correlate with overall excellence in American higher education Sadly admissions practices that flatly exclude the majority of academically qualified applicants are now the norm in our leading universities both public and private In *The Fifth Wave* Michael M Crow and William B Dabars argue that colleges and universities need to be comprehensively redesigned in order to educate millions more qualified students while leveraging the complementarities between discovery and accessibility Building on the themes of their prior collaboration *Designing the New American University* this book examines the historical development of American higher education the first four waves and describes the emerging standard of institutions that will transform the field What must emerge in this Fifth Wave of universities Crow and Dabars posit are institutions that are responsive to the needs of students focused on access embedded in their regions and committed to solving global problems *The Fifth Wave in American higher education* Crow and Dabars write comprises an emerging league of colleges and universities that aspires to accelerate positive social outcomes through the seamless integration of world class knowledge production with cutting edge technological innovation This set of institutions is dedicated to the advancement of accessibility to the broadest possible demographic that is representative of the socioeconomic and intellectual diversity of our nation Recognizing the fact that both cooperation and competition between universities is essential if higher education hopes to truly serve the needs of the nation Fifth Wave schools like Arizona State University are already beginning to spearhead a network spanning academia business and industry government agencies and laboratories and civil society organizations Drawing from a variety of disciplines including design economics public policy organizational theory science and technology studies sociology and even cognitive psychology and epistemology *The Fifth Wave* is a must read for anyone concerned with the future of higher education in our society

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions

designed by South African educators to a wider international audience *Analyzing Baseball Data with R, Second Edition*

Max Marchi, Jim Albert, Benjamin S. Baumer, 2018-11-19 *Analyzing Baseball Data with R Second Edition* introduces R to sabermetricians baseball enthusiasts and students interested in exploring the richness of baseball data. It equips you with the necessary skills and software tools to perform all the analysis steps from importing the data to transforming them into an appropriate format to visualizing the data via graphs to performing a statistical analysis. The authors first present an overview of publicly available baseball datasets and a gentle introduction to the type of data structures and exploratory and data management capabilities of R. They also cover the ggplot2 graphics functions and employ a tidyverse friendly workflow throughout. Much of the book illustrates the use of R through popular sabermetrics topics including the Pythagorean formula, runs expectancy, catcher framing, career trajectories, simulation of games and seasons, patterns of streaky behavior of players and launch angles and exit velocities. All the datasets and R code used in the text are available online. New to the second edition are a systematic adoption of the tidyverse and incorporation of Statcast player tracking data made available by Baseball Savant. All code from the first edition has been revised according to the principles of the tidyverse. Tidyverse packages including dplyr, ggplot2, tidyr, purrr, and broom are emphasized throughout the book. Two entirely new chapters are made possible by the availability of Statcast data: one explores the notion of catcher framing ability and the other uses launch angle and exit velocity to estimate the probability of a home run. Through the book's various examples, you will learn about modern sabermetrics and how to conduct your own baseball analyses. Max Marchi is a Baseball Analytics Analyst for the Cleveland Indians. He was a regular contributor to The Hardball Times and Baseball Prospectus websites and previously consulted for other MLB clubs. Jim Albert is a Distinguished University Professor of statistics at Bowling Green State University. He has authored or coauthored several books including *Curve Ball* and *Visualizing Baseball* and was the editor of the *Journal of Quantitative Analysis of Sports*. Ben Baumer is an assistant professor of statistical data sciences at Smith College. Previously a statistical analyst for the New York Mets, he is a co-author of *The Sabermetric Revolution and Modern Data Science with R*.

Open Science by Design National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Research Data and Information, Committee on Toward an Open Science Enterprise, 2018-09-09

Openness and sharing of information are fundamental to the progress of science and to the effective functioning of the research enterprise. The advent of scientific journals in the 17th century helped power the Scientific Revolution by allowing researchers to communicate across time and space using the technologies of that era to generate reliable knowledge more quickly and efficiently. Harnessing today's stunning ongoing advances in information technologies, the global research enterprise and its stakeholders are moving toward a new open science ecosystem. Open science aims to ensure the free availability and usability of scholarly publications, the data that result from scholarly research, and the methodologies including code or algorithms that were used to generate those data. Open Science by Design is aimed at overcoming barriers

and moving toward open science as the default approach across the research enterprise This report explores specific examples of open science and discusses a range of challenges focusing on stakeholder perspectives It is meant to provide guidance to the research enterprise and its stakeholders as they build strategies for achieving open science and take the next steps

The Beijing Consensus? Weitseng Chen, 2017-04-27 Is there a distinctive Chinese model for law and economic development In The Beijing Consensus scholars turn their collective attention to answer this basic but seemingly under explored question as China rises higher in its global standing Advancing debates on alternative development programs with a particular focus on social and political contexts this book demonstrates that essentially no model exists Engaging in comparative studies the contributors create a new set of benchmarks to evaluate the conventional wisdom that the Beijing Consensus challenges and that of the Beijing Consensus itself Has China demonstrated that the best model is in fact no model at all Overall this title equips the reader with an understanding of the conclusions derived from China's experience in its legal and economic development in recent decades

Where No Black Woman Has Gone Before Diana Adesola Mafe, 2018-03-01 A look at African American women in science fiction fantasy and horror A compelling contribution to the scholarship on speculative cinema and television Journal of American Culture When Lieutenant Uhura took her place on the bridge of the Starship Enterprise on Star Trek the actress Nichelle Nichols went where no African American woman had ever gone before Yet several decades passed before many other black women began playing significant roles in speculative i e science fiction fantasy and horror film and television a troubling omission given

that these genres offer significant opportunities for reinventing social constructs such as race gender and class Challenging cinema's history of stereotyping or erasing black women onscreen Where No Black Woman Has Gone Before showcases twenty first century examples that portray them as central figures of action and agency Writing for fans as well as scholars Diana Adesola Mafe looks at representations of black womanhood and girlhood in American and British speculative film and television including 28 Days Later AVP Alien vs Predator Children of Men Beasts of the Southern Wild Firefly and Doctor Who Series 3 Each of these has a subversive black female character in its main cast and Mafe draws on critical race postcolonial and gender theories to explore each film and show placing the black female characters at the center of the analysis and demonstrating their agency The first full study of black female characters in speculative film and television Where No Black Woman Has Gone Before shows why heroines such as Lex in AVP and Zo in Firefly are inspiring a generation of fans just as Uhura did
