Unprotected Labor Household Workers Politics And Middle Class Reform In New York 1870 194:

Unprotected Labor Vanessa H. May, 2011-06-01 Through an analysis of women's reform, domestic worker activism, and cultural values attached to public and private space, Vanessa May explains how and why domestic workers, the largest category of working women before 1940, were excluded from labor protections that formed the foundation of the welfare state. Looking at the debate over domestic service from both sides of the class divide, *Unprotected Labor* assesses middle class women's reform programs as well as household workers' efforts to determine their own working conditions. May argues that working class women sought to define the middle class home as a workplace even as employers and reformers regarded the home as private space. The result was that labor reformers left domestic workers out of labor protections that covered other women workers in New York between the late nineteenth century and the New Deal. By recovering the history of domestic workers as activists in the debate over labor legislation, May challenges depictions of domestics as passive workers and reformers as selfless advocates of working women. *Unprotected Labor* illuminates how the domestic service debate turned the middle class home inside out, making private problems public and bringing concerns like labor conflict and government regulation into the middle class home.

Stamped from the Beginning Ibram X. Kendi, 2016-04-12 The National Book Award winning history of how racist ideas were created, spread, and deeply rooted in American society. Some Americans insist that we're living in a post-racial society. But racist thought is not just alive and well in America; it is more sophisticated and more insidious than ever. And as award-winning historian Ibram X. Kendi argues, racist ideas have a long and lingering history, one in which nearly every great American thinker is complicit. In this deeply researched and fast-moving narrative, Kendi chronicles the entire story of anti-black racist ideas and their staggering power over the course of American history. He uses the life stories of five major American intellectuals to drive this history: Puritan minister Cotton Mather, Thomas Jefferson, abolitionist William Lloyd Garrison, W. E. B. Du Bois, and legendary activist Angela Davis. As Kendi shows, racist ideas did not arise from ignorance or hatred. They were created to justify and rationalize deeply entrenched discriminatory policies and the nation's racial inequities. In shedding light on this history, *Stamped from the Beginning* offers us the tools we need to expose racist thinking. In the process, he gives us reason to hope.

Project-Based Learning in Second Language Acquisition Adrian Gras-Velazquez, 2019-07-25 This book showcases pedagogical tools for learning languages through interdisciplinary project-based learning (PBL). Chapters demonstrate a diverse range of PBL activities that help students build communities of practice within classroom settings and across local and global communities. Too often, learning a language can become a static endeavor confined to a classroom and a singular discipline. But language is dynamic and fluid, no matter the setting in which learning takes place. In acknowledging this, this volume explores how PBL and community engagement pedagogies serve to combine learning goals and community service in ways that enhance student growth and facilitate second language development in an interdisciplinary, multilingual, and multicultural higher education.

learning environment Chapters touch on activities and approaches including spoken word poetry environmental projects social activism study abroad and in service learning This book will be of interest to researchers academics and postgraduate students in the fields of language education second language acquisition higher education and comparative and international education

Working in Public and in Private Vanessa Harkins May,2007 This dissertation weaves together three narratives to form a political history of domestic service the largest sector of women s employment into the 1940s First this project traces the history of the workers who toiled in middle class homes While many labor historians have preferred to focus on the unionism of industrial workers on the factory floor I argue that working class consciousness could be and was maintained within middle class communities Although the immigrant domestics who lived and worked in middle class homes at the turn of the twentieth century usually did not participate in the formal unions of their industrial sisters they found various ways to build a sense of working class community and solidarity and to resist the harsher conditions of service Second this dissertation recounts the story of middle class women both ordinary housewives who employed domestics in their homes and organized women who created lobbied for and debated protective labor legislation for women workers Women reformers were on the forefront of labor activism and key architects of the welfare state ministering to women and children Reformers of domestic service however faced a difficult choice between aiding poor working women and protecting their own privacy I reveal the divisions among women s organizations as they struggled to reconcile their humane ideals with the realities in their kitchens Finally this dissertation explores the concepts of public and private and how they affected both the ideology of middle class women reformers and the possibilities for resistance among domestic workers I argue that ideas about what was private and what was public were in constant tension with each other as middle class housewives women reformers domestic experts legislators and household workers debated domestic service during this period Although domestics were not included in wage and hour protections until 1974 the occupation did not lack for legislation or reform While we often think of domestic service as hidden from public view in middle class homes and hence forgotten by legislators it was in fact a major topic of public conversation and reform throughout the first half of the twentieth century
