Unveiling Inequality A World Historical Perspective:

Unveiling Inequality Roberto Patricio Korzeniewicz, Timothy Patrick Moran, 2009-11-25 Despite the vast expansion of global markets during the last half of the twentieth century social science still most often examines and measures inequality and social mobility within individual nations rather than across national boundaries Every country has both rich and poor populations making demands via institutions political processes or even conflict on how their resources will be distributed But shifts in inequality in one country can precipitate accompanying shifts in another Unveiling Inequality authors Roberto Patricio Korzeniewicz and Timothy Patrick Moran make the case that within country analyses alone have not adequately illuminated our understanding of global stratification The authors present a comprehensive new framework that moves beyond national boundaries to analyze economic inequality and social mobility on a global scale and from a historical perspective Assembling data on patterns of inequality in more than ninety six countries Unveiling Inequality reframes the relationship between globalization and inequality within and between nations Korzeniewicz and Moran first examine two different historical patterns High Inequality Equilibrium and Low Inequality Equilibrium and question whether increasing equality democracy and economic growth are inextricably linked as nations modernize Inequality is best understood as a complex set of relational interactions that unfold globally over time So the same institutional mechanisms that have historically reduced inequality within some nations have also often accentuated the selective exclusion of populations from poorer countries and enhanced high inequality equilibrium between nations National identity and citizenship are the fundamental contemporary bases of stratification and inequality in the world the authors conclude Drawing on these insights the book recasts patterns of mobility within global stratification The authors detail the three principal paths available for social mobility from a global perspective within country mobility mobility through national economic growth and mobility through migration Korzeniewicz and Moran provide strong evidence that the nation where we are born is the single greatest determining factor of how we will live Too much sociological literature on inequality focuses on the plight of have nots in wealthy nations who have more opportunity for social mobility than even the average individual in nations perennially at the bottom of the wealth distribution scale Unveiling Inequality represents a major paradigm shift in thinking about social inequality and a clarion call to reorient discussions of economic justice in world historical global terms The World is Out of Joint Immanuel Wallerstein, 2015-11-17 The dominant view in social science has been that the modern world shows a pattern of linear development in which all positive social trends rise albeit at an uncertain speed toward a relatively homogenized world In the post 1945 period some analysts contested this linear model arguing that the modern world was rather one of escalating polarization Their view was strengthened by the separate emergence within the natural sciences of complexity studies which suggested that natural systems inevitably moved away from equilibrium and at a certain point bifurcated radically This book based on a truly collaborative international research project evaluates the empirical evidence

in this debate in order to 1 give an adequate portrayal of the historical realities of the world system 2 draw a nuanced assessment about this debate and 3 provide the basis on which we can not only envisage probable future trends but also draw conclusions about the policy and or political implications of past and future research The work of ten research clusters based on crucial topics of overlapping nodes of social activity provides a vantage point with which to assess the basic issue a clear picture emerges of world historical interpretations of continuing polarizations Routledge Handbook of World-Systems Analysis Salvatore Babones, Christopher Chase-Dunn, 2012-05-31 World systems analysis has developed rapidly over the past thirty years Today's students and junior scholars come to world systems analysis as a well established approach spanning all of the social sciences The best world systems scholarship however is spread across multiple methodologies and more than half a dozen academic disciplines Aiming to crystallize forty years of progress and lay the groundwork for the continued development of the field the Handbook of World Systems Analysis is a comprehensive review of the state of the field of world systems analysis since its origins almost forty years ago The Handbook includes contributions from a global interdisciplinary group of more than eighty world systems scholars The authors include founders of the field mid career scholars and newly emerging voices Each one presents a snapshot of an area of world systems analysis as it exists today and presents a vision for the future The clear style and broad scope of the Handbook will make it essential reading for students and scholars of anthropology archaeology geography political science history sociology and development economics **Inequality Beyond Globalization** Christian Suter, 2010 This volume debates the complex nature of the relationships between globalization social and economic transformations and growing inequalities Employing a global world historical and comparative perspective the 16 articles brought together in this volume deal with three central questions Firstly the question of the spatio temporal evolution and variations of growing inequalities secondly the relative importance of globalization as compared to other factors explaining growing inequalities and thirdly institutional variations of inequality dynamics and globalization impacts Christian Suter is Professor of Economic Sociology at the University of Neuchâtel and President of the World Society Foundation domiciled at the University of Zurich Switzerland

The SAGE Handbook of Feminist Theory Mary Evans, Clare Hemmings, Marsha Henry, Hazel Johnstone, Sumi Madhok, Ania Plomien, Sadie Wearing, 2014-08-12 At no point in recorded history has there been an absence of intense and heated discussion about the subject of how to conduct relations between women and men This Handbook provides a comprehensive guide to these omnipresent issues and debates mapping the present and future of thinking about feminist theory The chapters gathered here present the state of the art in scholarship in the field covering Epistemology and marginality Literary visual and cultural representations Sexuality Macro and microeconomics of gender Conflict and peace The most important consensus in this volume is that a

central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been and are organized The authors bring a shared commitment to the critical appraisal of gender relations as well as a recognition that to think theoretically is not to detach concerns from lived experience but to extend the possibilities of understanding With this focus on theory and theorizing about the world in which we live this Handbook asks us across all disciplines and situations to abandon our taken for granted assumptions about the world and interrogate both the origin and the implications of our ideas about gender relations and feminism It is an essential reference work for advanced students and academics not only of feminist theory but of gender and sexuality across the humanities and social sciences

How Global Migration Changes the Workforce Diversity Equation Anthony Forsyth, Hina Sheikh, Francesca Sperotti, 2015-06-18 This volume

explores some of the ways that a dialogue between diversity researchers and migration researchers can deepen the understanding of both. It moves across economics, sociology, political science, labour relations and legal studies, demonstrating that the value of this dialogue cuts across disciplines. The book particularly underlines the challenges faced in host societies including exclusion to the point of hyper precarity, anti-migrant attitudes and the widespread organizational *Global Crises and the Challenges of the 21st Century* Thomas Reifer, 2015-10-23. Despite prognostications of the end of history, the 21st century has posed new challenges and a host of global crises. This book takes up the current global economic crisis in relation to new and changing dynamics of territory, authority and rights in today's global system. The authors explore long-simmering conflicts in comparative perspective, including settler colonialism in South Africa, Northern Ireland and Israel/Palestine. They discuss indigenous struggles against environmental land grabs and related destruction of indigenous lands by the US nuclear weapons complex. The book uniquely considers the sacred in the context of the global system, including struggles of Latina/o farm workers in the US for social justice and for change in the Catholic Church. Other chapters examine questions of civilizations and identity in the contemporary global system as well as the role of world regions.

Contention and Trust in Cities and States Michael Hanagan, Chris Tilly, 2011-04-15. The catalyst for this book is the fact that noted sociologist Charles Tilly, upon his death in 2008, left one completed chapter of an unfinished manuscript entitled *Cities, States and Trust Networks*, examining the relationships between cities and nation-states over the sweep of history and, in particular, the role of trust networks in mediating this relationship. Though this was the catalyst, the book serves a broader purpose: to survey recent frontier work on cities, nation-states and the relations between the two in historical and contemporary perspective. Essays in the book will address four main themes: city-state relations, trust networks and commitment, democracy and inequality, and the importance of historical legacies in shaping state structures, practices and capacities. They will be global in scope, with research on the United States, Latin America, Europe, Asia and Africa; a number of the pieces will be comparative. They will also be interdisciplinary, including works of geography, history, political science, sociology, urban planning. The book addresses several confluent needs of readers. One is to simply update themes addressed in earlier edited work such as *Bringing the State Back In* (1985). A second is to bring together current thinking about cities on the one hand and nation-states on the other, literatures that are often segregated from each other. A third is to perform those two purposes in a way that is global in scope and combines both historical and current analyses to pull together insights from the full range of human experience.
