Levins, 2003-12-01 Willard Cochrane watched the dramatic decline in American family farming from a vantage point few can claim He became one of the country's premier agricultural economists and carried the standard of liberalism for President Kennedy in the last serious fight to save the family farm Then for forty long years he held to the principles while traditional agriculture faded into what he once called family farms in form but not in spirit This book is about the spirit of family farming Thomas Jefferson's dream of an agrarian democracy What should we do in the face of globalization high technology and corporate control of our food supply Willard Cochrane and the American Family Farm recounts how one man faced these issues and where he would wish us to go in the twenty first century     The Curse of American Agricultural Abundance Willard Wesley Cochrane, 2003-01-01 Advisor to President Kennedy consultant for foreign governments and spokesman for family farmers everywhere Willard W Cochrane has been a leading expert on agriculture and its problems in the United States since the 1940s In his straightforward style Cochrane analyzes the propensity for American agriculture to produce too much and the inability of our social and economic system to make effective use of that unending abundance He then offers his vision for American agriculture in the twenty first century Cochrane looks at two periods in agricultural history 1953-66 and 1997-2002 Structurally technologically and organizationally the two periods are as different as night and day but in terms of the big economic picture too much production pressing on a limited commercial demand with resulting low farm prices and incomes they are mirror images of each other With this understanding Cochrane argues that Americans no longer need to farm fragile ecosystems with intensive chemical methods make huge payments that result in fewer farms and higher farming costs nor bear the environmental consequences of all out production Instead he outlines a bold new strategy in which we can enjoy our abundance and focus our efforts on quality of life and protecting the environment in our rural areas Willard W Cochrane is the author of numerous books including The Development of American Agriculture A Historical Analysis and coauthor of Reforming Farm Policy Toward a National Agenda Richard A Levins is a professor of agricultural economics at the University of Minnesota and the author of Willard Cochrane and the American Family Farm Nebraska 2003

*Down and Out on the Family Farm* Michael Johnston Grant, 2002-01-01 Focusing on the Great Plains states of Kansas Nebraska North Dakota and South Dakota between 1929 and 1945 *Down and Out on the Family Farm* examines small family farmers and the Rural Rehabilitation Program designed to help them Historian Michael Johnston Grant reveals the tension between economic forces that favored large scale agriculture and political pressure that championed family farms and the results of that clash The Great Depression and the drought of the 1930s lay bare the long term economic instability of the rural Plains The New Deal introduced the Rural Rehabilitation Program to assist lower to middle income farmers throughout the country This program combined low interest loans with managerial advice However these efforts were not enough to compete with the growing scale of agriculture or to counter the recurring drought of the era Regional conservatism environmental factors and fiscal constraints limited the federal aid offered to thousands of families Grant provides extensive primary source research from government documents as well as letters newspaper editorials and case studies that focus on individual lives and fortunes He examines who these families were and what their farms looked like and he sheds light on the health problems and other personal concerns that interfered with the economic viability of many farms The result is a provocative study that gives a human face to the hardships and triumphs of modern agriculture **Sustainable**

**Compromises** Alan Boyle, 2014-05-01 Living simply isn't always simple When Alan Boyle first lived in sustainable housing he was young idealistic and not much susceptible to compromise until rattlesnakes black widow spiders and loneliness drove him out of the utilities free yurt he'd built in New Mexico Thirty five years later he decided to try again This time with an idealism tempered by experience and practical considerations Boyle and his wife constructed an off the grid energy efficient straw bale house in Vermont *Sustainable Compromises* chronicles these two remarkable attempts to live simply in two disparate American eras Writing with hard won authority and humor Boyle takes up the how to practicalities of building green from finances to nuts and bolts to strains on friends and family With *Walden* as a historical and philosophical touchstone and his own experience as a practical guide he also explores the ethical and environmental concerns that have framed such undertakings from Thoreau's day to our own A firsthand account of the pleasures and pitfalls of living simply his book is a deeply informed and engaging reflection on what sustainability really means in personal communal ethical and environmental terms

*The Five-Ton Life* Susan Subak, 2018-08-01 At nearly twenty tons per person American carbon dioxide emissions are among the highest in the world Not every American fits this statistic however Across the country there are urban neighborhoods suburbs rural areas and commercial institutions that have drastically lower carbon footprints These exceptional places as it turns out are neither poor nor technologically advanced Their low emissions are due to culture In *The Five Ton Life* Susan Subak uses previously untapped sources to discover and explore various low carbon locations In Washington DC Chicago suburbs lower Manhattan and Amish settlements in Lancaster County Pennsylvania she examines the built and social environment to discern the characteristics that contribute to lower greenhouse gas emissions The most

decisive factors that decrease energy use are a commitment to small interiors and social cohesion although each example exhibits its own dynamics and offers its own lessons for the rest of the country Bringing a fresh approach to the quandary of American household consumption Subak's groundbreaking research provides many pathways toward a future that is inspiring and rooted in America's own traditions

**Changing the Way America Farms** Neva Hassanein, 1999-01-01

**Crisis and Opportunity** John E. Ikerd, 2008 With the decline of family farms and rural communities and the rise of corporate farming and the resulting environmental degradation American agriculture is in crisis But this crisis offers the opportunity to rethink agriculture in sustainable terms Here one of the most eloquent and influential proponents of sustainable agriculture explains what this means These engaging essays describe what sustainable agriculture is why it began and how it can succeed Together they constitute a clear and compelling vision for rebalancing the ecological economic and social dimensions of agriculture to meet the needs of the present without compromising the future In *Crisis and Opportunity* John E. Ikerd outlines the consequences of agricultural industrialization then details the methods that can restore economic viability ecological soundness and social responsibility to our agricultural system and thus ensure sustainable agriculture as the foundation of a sustainable food system and a sustainable society

**Remaking the North American Food System** C. Clare Hinrichs, Thomas A. Lyson, 2007 Examines the resurgence of interest in rebuilding the links between agricultural production and food consumption With examples from Puerto Rico to Oregon to Quebec this work offers a North American perspective attuned to trends toward globalization at the level of markets and governance and shows how

globalization affects specific localities      **In Defense of Farmers** Jane Winslow Gibson, Sara E. Alexander, 2019-07

Industrial agriculture is generally characterized as either the salvation of a growing hungry global population or as socially and environmentally irresponsible. Despite elements of truth in this polarization, it fails to focus on the particular vulnerabilities and potentials of industrial agriculture. Both representations obscure individual farmers, their families, their communities, and the risks they face from unpredictable local, national, and global conditions: fluctuating and often volatile production costs and crop prices; extreme weather exacerbated by climate change; complicated and changing farm policies; new production technologies and practices; water availability; inflation and debt; and rural community decline. Yet the future of industrial agriculture depends fundamentally on farmers' decisions. *In Defense of Farmers* illuminates anew the critical role that farmers play in the future of agriculture and examines the social, economic, and environmental vulnerabilities of industrial agriculture as well as its adaptations and evolution. Contextualizing the conversations about agriculture and rural societies within the disciplines of sociology, geography, economics, and anthropology, this volume addresses specific challenges farmers face in four countries: Bolivia, Brazil, Canada, and the United States. By concentrating on countries with the most sophisticated production technologies capable of producing the largest quantities of grains, soybeans, and animal proteins in the world, this volume focuses attention on the farmers whose labor, decision making, and risk taking throw into relief the implications and limitations of our global industrial food system. The case studies here acknowledge the agency of farmers and offer ways forward in the direction of sustainable agriculture.      Remaking American Communities David C.

Soule, 2007-11-01 Urban sprawl has gained much national attention in recent years. Sprawl involves not only land use issues but also legal, political, and social concerns. It affects our schools, the environment, and race relations. Comprehensive enough for high school students and also appropriate for college undergraduates, *Remaking American Communities* delves into the challenges of urban sprawl by turning to some of America's top thinkers on the problem, including Robert Yaro, president of the Regional Planning Association. Other cutting-edge essays include a foreword about the emergence of sprawl by nationally syndicated columnist Neal Peirce; views about race and class by former mayor of Albuquerque, David Rusk; and a discussion of transportation dynamics by Curtis Johnson, president of the CitiStates Group. The essays in this collection explore the core issues of sprawl and the agenda for dealing with it. Complete with a glossary, resources, and contact information for smart growth alliances, this book is extremely user-friendly. David C. Soule offers an unbiased viewpoint of this national phenomenon in a way that will be accessible to students and those with little background in the issue.      **The Visible Hands That Feed**

Ruzana Liburkina, 2023-08 *The Visible Hands That Feed* approaches the food sector against the backdrop of its pivotal role for social and ecological relations to trace the potentials and limitations for sustainable change from within.      *Good Growing* Leslie A. Duram, 2005-01-01 Compelling portraits of organic farmers bring to life facts and figures in an extensive overview of the phenomenal growth in recent years of organic production and consumption.      Raising a Stink Carolyn

Johnsen,2003-01-01 A reporter long familiar with the controversy Carolyn Johnsen draws on a wealth of interviews archival material and her own extensive experience as a journalist to present a timely informative and balanced account of this complicated and troubling agricultural practice and to put a human face on its causes and consequences **Growing Local**

Robert P. King,Michael Stephen Hand,Miguel I. Gómez,2014 In an increasingly commercialized world the demand for better quality healthier food has given rise to one of the fastest growing segments of the U S food system locally grown food Many believe that relocalization of the food system will provide a range of public benefits including lower carbon emissions increased local economic activity and closer connections between consumers farmers and communities The structure of local food supply chains however may not always be capable of generating these perceived benefits Growing Local reports the findings from a coordinated series of case studies designed to develop a deeper more nuanced understanding of how local food products reach consumers and how local food supply chains compare with mainstream supermarket supply chains To better understand how local food reaches the point of sale Growing Local uses case study methods to rigorously compare local and mainstream supply chains for five products in five metropolitan areas along multiple social economic and environmental dimensions highlighting areas of growth and potential barriers Growing Local provides a foundation for a better understanding of the characteristics of local food production and emphasizes the realities of operating local food supply chains Current Publications in Legal and Related Fields ,2000
