

Uppers, Downers, All Arounders, 7th Edition – Instructor's Manual
Chapter 6 – ALL AROUNDERS
Overview

This chapter summarizes the history, pharmacology, epidemiology, and the physical/psychological effects of psychedelic drugs. The botany, compulsive qualities, and legal complications of marijuana use along with an examination of the medical marijuana controversy is also explored.

Psychedelics have been used for thousands of years for religious, social, ceremonial, and medical purposes. They **originally** came from some of the 4,000 **plants** that have psychoactive effects.

In more **modern** times, many psychedelics have been **synthesized**. LSD, MDMA, and hundreds of psycho-stimulants are created every day by street chemists.

Psychedelics or "All Arounders" are generally classified into five major categories:

- **indoles**: e.g., LSD, psilocybin mushrooms, ibogaine, DMT;
- **phenylalkylamines**: e.g., mescaline (peyote), MDMA (ecstasy), MDA;
- **anticholinergics**: e.g., belladonna, henbane, mandrake & datura;
- **miscellaneous psychedelics**: e.g., PCP, DXM, *Salvia divinorum*; and
- **cannabinoids**: marijuana.

All psychedelics cause intensified and confused sensations as well as illusions, delusions, and hallucinations. Many of the psychedelics also cause stimulation, impaired judgment, and faulty reasoning.

Marijuana is the most widely used psychedelic; 160 million people worldwide use Cannabis. The use of phenylalkylamines, also known as psycho-stimulants, particularly MDMA (ecstasy) has decreased slightly in recent years. Club drugs such as ecstasy, mephedrone and MDPV are used to enhance the music party/club/rave experience. Other so-called club drugs popular in the music scene include ketamine, GHB, and nitrous oxide. The other psychedelics are used at a fraction of the rate that marijuana is used. LSD use has gone down substantially since its heyday in the 1960s and '70s.

Synthetic analogs of marijuana's most psychoactive chemical, THC were sold legally as "herbal incense" with trade names like K₂® or Spice® until 2011 when five of these chemicals were classified as Schedule I drugs of abuse. Most states have banned the sale of these incense products. Powerful synthetic stimulants sold as "bath salts" with trade names like Ivory Wave® or Cloud 9® were still legal under federal law in 2011 but several states have classified them as Schedule I illegal drugs.

On the Other Side of Chaos Ellen Van Vechten, 2018-12-04 A lawyer turned drug counselor examines the disruption many families endure when addiction impacts their lives Based in part on her own family's journey Ellen Van Vechten explains the science of addiction the theory of treatment and the Twelve Step model of recovery providing sensible information and tips for reasoned action in support of a loved one while fostering personal growth and recovery Powerlessness over another's addiction has a caustic effect on the family Too often parents and partners equate letting go with giving up While acceptance of a lack of control is essential to coping with the disease within the family system there is nothing passive about supporting a partner or child on their journey to recovery This concept is the foundation of Van Vechten's original approach to empower individuals with knowledge which when coupled with acceptance allows any family dealing with active addiction to make thoughtful and reasoned decisions to facilitate the recovery of both their loved ones and themselves
