Science Education from People for People Wolff-Michael Roth, 2009-06-10 Contributing to the social justice agenda of redefining what science is and what it means in the everyday lives of people this book introduces science educators to various dimensions of viewing science and scientific literacy from the standpoint of the learner engaged with real everyday concerns within or outside school develops a new form of scholarship based on the dialogic nature of science as process and product and achieves these two objectives in a readable but scholarly way Opposing the tendency to teach and do research as if science science education and scientific literacy could be imposed from the outside the authors want science education to be for people rather than strictly about how knowledge gets into their heads Taking up the challenges of this orientation science educators can begin to make inroads into the currently widespread irrelevance of science in the everyday lives of people Utmost attention has been given to making this book readable by the people from whose lives the topics of the chapters emerge all the while retaining academic integrity and high level scholarship Wolff Michael Roth has been awarded the Distinguished Contributions Award by The National Association for

Research in Science Teaching for his contributions to research in this field He has also been elected to be the Fellow of the American Association for Advancement of Science AAAS and Fellow of the American Educational Research Association

The Bloomsbury Handbook of Hip Hop Pedagogy Lauren Leigh Kelly,Daren Graves,2024-01-11 The Bloomsbury Handbook of Hip Hop Pedagogy is the first reference work to cover the theory history research methodologies and practice of Hip Hop pedagogy Including 20 chapters from activist oriented and community engaged scholars the handbook provides perspectives and studies from across the world including Brazil the Caribbean Scandinavia and the USA Organized into four topical sections focusing on the history and cultural roots of Hip Hop theories and research methods in Hip Hop pedagogy and Hip Hop pedagogy in practice the handbook offers theoretical analytical and pedagogical insights emerging across sociology literacy school counselling and youth organizing The chapters reflect the impact of critical Hip Hop pedagogies and Hip Hop based research for educators and scholars interested in radical transformative approaches to education Ultimately the many voices included in the handbook show that Hip Hop pedagogy is a humanizing and emancipatory approach which is redefining the purposes and practices of education *Underprivileged School Children and the Assault on Dignity* Julia Hall,2014-07-17 Every day children living in low income communities have no choice but to grow up in a climate where they experience multiple unending assaults to their sense of dignity This volume applies theoretical and historical insights to think through the increasingly undignified realities of life in economically marginalized communities It includes examples of curricular challenges that low income students in the US confront today while attempting to learn Curricular challenges are analyzed as material texts that emerge out of student lived experiences in the economically disposed neighborhoods in which schools are located and the dynamics of the schools and classrooms themselves Attention is also paid to educators and students who push back against these forces in an effort to reclaim voice identity and dignity #HipHopEd: The Compilation on Hip-hop Education Christopher Emdin,Edmund S. Adjapong,2018-04-16 The first volume of HipHopEd The Compilation on Hip hop Education brings together veteran and emerging scholars practitioners and students from a variety of fields to share their research and experiences as it relates to the use of hip hop in educational spaces This text extends the current literature on hip hop and education and focuses on the philosophy of hip hop and education the impact that hip hop culture has on the identity of educators and the use of hip hop to inform mental health practices Through their personal and practical experiences authors of this text will spark new and creative uses of hip hop culture in educational spaces

Looking to the Future Derek Hodson,2011-10-25 In advocating an action oriented and issues based curriculum this book takes the position that a major but shamefully neglected goal of science and technology education is to equip students with the knowledge skills attitudes and values to confront the complex and often ill defined socioscientific issues they encounter in daily life as citizens in an increasingly technology dominated world carefully critically confidently and responsibly In outlining proposals for addressing socioscientific issues through a curriculum organized in terms of four increasingly

sophisticated levels of consideration the author adopts a highly critical and politicized stance towards the norms and values that underpin both scientific and technological development and contemporary scientific engineering and medical practice criticizes mainstream STS and STSE education for adopting a superficial politically naïve and hence educationally ineffective approach to consideration of socioscientific issues takes the view that environmental problems are social problems occasioned by the values that underpin the ways in which we choose to live and urges teachers to encourage students to reach their own views through debate and argument about where they stand on major socioscientific issues including the moral ethical issues they often raise More controversially the author argues that if students are to become responsible and politically active citizens the curriculum needs to provide opportunities for them to experience and learn from sociopolitical action The relative merits of direct and indirect action are addressed notions of learning about action learning through action and learning from action are developed and a case is made for compiling a user friendly database reflecting on both successful and less successful action oriented curriculum initiatives Finally the book considers some of the important teacher education issues raised by this radically new approach to teaching and learning science and technology The book is intended primarily for teachers and student teachers of science technology and environmental education graduate students and researchers in education teacher educators curriculum developers and those responsible for educational policy The author is Emeritus Professor of Science Education at the Ontario Institute for Studies in Education University of Toronto Adjunct Professor of Science Education at the University of Auckland and Visiting Professor of Science Education at the University of Hong Kong His research interests include considerations in the history philosophy and sociology of science and their implications for science and technology education STSE education and the politicization of both students and teachers science curriculum history multicultural and antiracist education and teacher education via action research Young, Gifted and Missing Anthony G. Science Teacher Educators as K-12 Teachers Michael Dias, Charles J. Eick, Laurie Brantley-Dias, 2013-07-08 Science teacher educators prepare and provide professional development for teachers at all grade levels They seek to improve conditions in classroom teaching and learning professional development and teacher recruitment and retention Science Teacher Educators as K 12 Teachers Practicing What We Teach tells the story of sixteen teacher educators who stepped away from their traditional role and entered the classroom to teach children and adolescents in public schools and informal settings It details the practical and theoretical insights that these members of the Association of Science Teacher Educators ASTE earned from experiences ranging from periodic guest teaching to full time engagement in the teaching role Science Teacher Educators as K 12 Teachers shows science teacher educators as professionals engaged in reflective analysis of their beliefs about and experiences with teaching children or adolescents science With their ideas about instruction and learning challenged these educators became more aware of the circumstances today s teachers face Their honest accounts reveal that through teaching children and adolescents teacher educators can also renew themselves and expand their identities as well as their understanding of themselves in the profession and in relation to others Science Teacher Educators as K 12 Teachers will appeal to all those with an interest in science education from teacher educators to science teachers as well as teacher educators in other disciplines Its narratives and insights may even inspire more teacher educators to envision new opportunities to serve teachers K 12 learners and the local community through a variety of teaching arrangements in public schools and informal education settings

Maxine Greene and the Pedagogy of Social Imagination Hannah Spector, Robert Lake, Tricia M. Kress, 2019-12-18 Devoted to and inspired by the late Maxine Greene a champion of education and advocate of the arts this book recognizes the importance of Greene s scholarship by revisiting her oeuvre in the context of the intellectual historicity that shaped its formation As a scholar Greene dialogued with philosophers social theorists

writers musicians and artists These conversations reveal the ways in which the arts just like philosophy and science allow for the facilitation of wide awakesness a term that is central to Greene s pedagogy Amidst contemporary trends of neoliberal one size fits all curriculum reforms in which the arts are typically squeezed out or pushed aside Greene s work reminds us that the social imagination is stunted without the arts Artistic ways of knowing allow for people to see beyond their own worlds and beyond what is into other worlds of what was and what might be some day This volume demonstrates Maxine Greene s profound ability to illuminate the importance of the artistic world and the imaginary for development of the self in the world and for encouraging a wide awakesness reflective of an emerging political awareness and a longing for a democratic world that is not yet This book was originally published as a Special Issue of The Review of Education Pedagogy and Cultural Studies

Ignatian Pedagogy for Public Schools Benjamin J. Brenkert, 2023-07-27 This book shows how the pedagogical philosophy of the Society of Jesus the Jesuits founder Ignatius of Loyola can be used and applied in public school settings in the USA and around the world without dismantling the separation of church and state Ignatian Pedagogy should be considered a historical precursor to modern practical and pedagogical theories such as culturally relevant pedagogy and equity frameworks in education with Jesuit foundational texts such as the Ratio Studiorum including material about working within and valuing the context of the culture surrounding schools emphasizing student voice and empowering the student as a co teacher Based on new research carried out in New York City Department of Education NYC DOE schools the author argues for universal character formation programs based on already existing and highly effective programs at Jesuit sponsored schools The research shows that universal character formation programs are highly effective in developing students flourishing strengthening their relationships with themselves and others and enabling critical reflective thought Based on the theory of Ignatius of Loyola and the work of thinkers including Paulo Freire Mahatma Gandhi Elisabeth Johnson and Martin Luther King Brenkert presents a theological philosophical framework for creating a beloved community free from oppression poverty and hate

My Schoolhouse Is a Ghost Town Sunni Ali, 2016-03-16 This book is dedicated to the terrific educators that inspire uplift and challenge young people to achieve their personal goals and aspirations The journey of being a teacher is truly arduous and challenging which makes it difficult for some teachers to remember why they entered this field Teachers dedicate a great portion of their lives giving back to society and despite their sincerest efforts policyholders business leaders and certain members of the public do not appreciate the work educators perform on a consistent basis Although it is very telling how many public schools have been closed and minority teachers dismissed from current reform other schools and teachers will soon feel its wrath unless there is an educational push back and demand for a return to community schooling This book speaks to not only how an educator continues to utilize creative methodology to reach youth but also navigate through the harshness imposed by current school reform initiatives My Schoolhouse is a Ghost Town further challenges educators and parents to commit to activism as currently demonstrated by members of the Chicago Teacher Union and parent progressive organizations to fight for reform under this current system and create their own school models Otherwise more urban public schools along with black and brown teachers will become ghost as unrealistic demands continue to impact this great profession
