Urban And Regional Economics By Philip Mccann Full Book:

Modern Urban and Regional Economics Philip McCann, 2013-01-31 The second edition of this accessible text provides an integrated framework of the study of urban and regional economics. It offers a concise and up to date introduction to the main foundational models, principles and theories of the subject and uses a range of international examples to illustrate ideas.

Urban and Regional Economics Philip McCann, 2012 Urban and regional economics encompasses both the economics of geography and spatial economics to focus on the growth behaviour and economic performance of cities and regions. Over the last two decades urban and regional economics has grown dramatically both as a taught subject and as an active research area and as work in the subdiscipline flourishes as never before this new four volume collection from Routledge meets the need for an authoritative reference work to make sense of the subject's vast literature and **The UK**

Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. *The UK Regional National Economic Problem* brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities. The North-South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government. **The Regional and Urban Policy of the European Union** Philip McCann, 2015-01-30 The regional and urban development policy of the European Union or more precisely EU Cohesion Policy is undergoing change. This development is driven by the enormous transformations in European regions and by shifts in thinking and analysis. The

Dickens and the Virtual City Estelle Murail, Sara Thornton, 2017-10-14 This book explores the aesthetic practices used by Dickens to make the space which we have come to know as the Dickensian City. It concentrates on three very precise techniques for the production of social space: counter-mapping, overlaying and troping. The chapters show the scapes and writings which influenced him and the way he transformed them, packaged them and passed them on for future use. The city

is shown to be an imagined or virtual world but with a serious aim for a serious game Dickens sets up a workshop for the simulation of real societies and cities This urban building with is transferable to other literatures and medial forms The book offers vital understanding of how writing and image work in particular ways to recreate and re enchant society and the built environment It will be of interest to scholars of literature media film urban studies politics and economics **Handbook of Economic Geography** Dr. Sanjay Kumar,2021-09-11 Economic geography has taken a variety of approaches to many different subject matters including but not limited to the location of industries economies of agglomeration also known as linkages transportation international trade economic development real estate gentrification ethnic economies gendered economies core periphery theory the economics of urban form the relationship between the environment and the economy and globalization The subject matter investigated is strongly influenced by the researcher s methodological approach Neoclassical location theorists following in the tradition of Alfred Weber tend to focus on industrial location and use quantitative methods Economists such as Paul Krugman and Jeffrey Sachs have also analyzed many traits related to economic geography Krugman has gone so far as to call his application of spatial thinking to international trade theory the new economic geography which directly competes with an approach within the discipline of geography that is also called new economic geography The name geographical economics has been suggested as an alternative Various factors events conditions occurrences and constituents of geography have a tremendous bearing on the distribution of resources resulting in a wide disparity in the level of economic activity in the nation or region concerned Such differences impact no production manufacturing and resource utilisation capacity of the nations Each and every such factor has been dealt with in the present book Contents Introduction Location of Economic Activities and Spatial Organization of Economies Classification of Economies Sectors of Economy Primary Secondary Tertiary and Quaternary Natural Resources Renewable and Non renewable Measurement of Agricultural Productivity and Efficiency Crop Combination and Diversification Von Thunen s Model Classification of Industries Weber s and Losch s Approaches Resource Based and Footloose Industries Models of Transportation and Transport Cost Accessibility and Connectivity Reimagining business schools for the 21st century Kenneth McPhail,2025-11-04 To mark its 60th anniversary Alliance Manchester Business School is publishing a collection of thought provoking essays co authored by eminent AMBS academics and business leaders outlining how business schools can play a significant role in confronting the global challenges of today It also looks at how the School can equip the next generation of business leaders with the skills they need to embrace these challenges and outlines ideas for policy development The blueprint deliberately reaches out to the wider public informing public and political debate on the role of business in both the causes and solutions to the world s biggest challenges and reimagining the role of business in society It also outlines how business and management research cannot just help address grand challenges such as climate change and regional inequalities but also generate economic growth inform policy development and define business thinking Union

Made Heath W. Carter, 2015-08-03 In Gilded Age America rampant inequality gave rise to a new form of Christianity one that sought to ease the sufferings of the poor not simply by saving their souls but by transforming society In Union Made Heath W. Carter advances a bold new interpretation of the origins of American Social Christianity While historians have often attributed the rise of the Social Gospel to middle class ministers seminary professors and social reformers this book places working people at the very center of the story The major characters blacksmiths glove makers teamsters printers and the like have been mostly forgotten but as Carter convincingly argues their collective contribution to American Social Christianity was no less significant than that of Walter Rauschenbusch or Jane Addams Leading readers into the thick of late 19th century Chicago's tumultuous history Carter shows that countless working class believers participated in the heated debates over the implications of Christianity for industrializing society often with as much fervor as they did in other contests over wages and the length of the workday The city's trade unionists socialists and anarchists advanced theological critiques of laissez faire capitalism and protested scab ministers who cozied up to the business elite Their criticisms compounded church leaders' anxieties about losing the poor such that by the turn of the century many leading Christians were arguing that the only way to salvage hopes of a Christian America was for the churches to soften their position on the labor question As denomination after denomination did just that it became apparent that the Social Gospel was indeed ascendant from below At a time when the fate of the labor movement and rising economic inequality are once more pressing social concerns Union Made opens the door for a new way forward by changing the way we think about the past European Spatial Research and Policy, 2004

Public Investment and Regional Economic Development Daniel Felsenstein, Ronald McQuaid, Philip McCann, Daniel Shefer, 2001-01-01 *Public Investment and Regional Economic Development* is a very interesting and stimulating reading for policymakers and anyone doing research in this area Adelheid Holl *Environment and Planning C: Government and Planning* The relationship between public investment and regional economic development is of perennial interest and is particularly topical now as issues of infrastructure and innovation are high on policy agendas in many countries Public investment is often viewed as a possible method for jump starting lagging regional economies and also as a requirement for the continued development of more prosperous regions *Public Investment and Regional Economic Development* provides a systematic analysis of the complex relationship between public investment and regional economic development The authors offer new insights into the key issues of regional growth and present a broad variety of perspectives ranging from transport and housing infrastructure through to human capital and innovation *The Oxford Handbook of Entrepreneurship* Mark Casson, 2008 Entrepreneurship is a key factor in economic growth innovation the development of firms businesses Written by leading scholars this book presents a comprehensive review of the research in entrepreneurship **Transitions in Regional Economic Development** Ivan Turok, David Bailey, Jennifer Clark, Jun Du, Ugo Fratesi, Michael Fritsch, John Harrison, Tom Kemeny, Dieter Kogler, Arnoud Lagendijk, Tomasz Mickiewicz, Ernest Miguelez, Stefano Usai, Fiona

Wishlade,2018-10-18 At a time of extraordinary challenges confronting the world this book analyses some of the profound changes occurring in the development of cities and regions It discusses the uncertainties associated with the stalling of hyper globalization and asks whether this creates opportunities for resurgent regional economies driven by local capabilities resource efficiencies and domestic production Theory and evidence on socio economic and environmental transitions underway in many regions are brought together Implications of the shifting balance of global power towards emerging economies in the East are explored along with the consequences of urbanization in the global South for politics and democracy Dilemmas surrounding migration are also discussed including whether incomers displace local workers and depress wages or bring benefits in the form of know how new technology and investment More integrative concepts of the region and theories of regional development are analysed recognising the role of human capital knowledge innovation finance infrastructure and institutions This was originally published as a special issue of Regional Studies **The Oxford Handbook of Urban Economics and Planning** Nancy Brooks,Kieran Donaghy,Gerrit-Jan Knaap,2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics **The City Reader** Richard T. LeGates,Frederic Stout,2015-07-16 The sixth edition of the highly successful The City Reader juxtaposes the very best classic and contemporary writings on the city to provide the comprehensive mapping of the terrain of Urban Studies and Planning old and new The City Reader is the anchor volume in the Routledge Urban Reader Series and is now integrated with all ten other titles in the series This edition has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as compact cities urban history place making sustainable urban development globalization cities and climate change the world city network the impact of technology on cities resilient cities cities in Africa and the Middle East and urban theory

The new edition places greater emphasis on cities in the developing world globalization and the global city system of the future The plate sections have been revised and updated Sixty generous selections are included forty four from the fifth edition and sixteen new selections including three newly written exclusively for The City Reader The sixth edition keeps classic writings by authors such as Ebenezer Howard Ernest W Burgess LeCorbusier Lewis Mumford Jane Jacobs and Louis Wirth as well as the best contemporary writings of among others Peter Hall Manuel Castells David Harvey Saskia Sassen and Kenneth Jackson In addition to newly commissioned selections by Yasser Elshehawey Peter Taylor and Lawrence Vale new selections in the sixth edition include writings by Aristotle Peter Calthorpe Alberto Camarillo Filip DeBoeck Edward Glaeser David Owen Henri Pirenne The Project for Public Spaces Jonas Rabinovich and Joseph Lietman Doug Saunders and Bish Sanyal The anthology features general and section introductions as well as individual introductions to the selected articles introducing the authors providing context relating the selection to other selection and providing a bibliography for further study The sixth edition includes fifty plates in four plate sections substantially revised from the fifth edition
