Renewable Energy and International Law Chitzi C. Ogbumbada, 2025-11-27 This book addresses the injustices associated with renewable energy development and use within the context of the energy transition Primarily informed by a communitarian approach to energy justice the book draws on the philosophical concept of African communitarianism as a guiding principle This concept emphasises harmonious or communal relationships among members of a political and social community making it easier to justify solutions to renewable energy injustices in contrast to an individualistic approach The book argues that international law can facilitate this approach to energy justice by adapting existing norms standards practices and institutions Adopting the unfair distribution of renewable energy benefits in the international community as a

test case the book contributes to existing energy justice scholarship by highlighting the significant contribution of non Western philosophies in addressing renewable energy injustices It also repositions international law as a tool for operationalising this approach to energy justice The book will be of interest to researchers policymakers international governmental organisations and civil society
