Clocks Sir Henry H. Cunynghame,2017-07-06 When we read the works of Homer or Virgil or Plato or turn to the later productions of Dante of Shakespeare of Milton and the host of writers and poets who have done so much to instruct and amuse us and to make our lives good and agreeable we are apt to look with some disappointment upon present times And when we turn to the field of art and compare Greek statues and Gothic or Renaissance architecture with our modern efforts we must feel bound to admit our inferiority to our ancestors And this leads us perhaps to question whether our age is the equal of those which have gone before or whether the human intellect is not on the decline This feeling however proceeds from a failure to remember that each age of the world has its peculiar points of strength as well as of weakness During one period that self denying patriotism and zeal for the common good will be developing which² is necessary for the formation of society During another the study of the principles of morality and religion will be in the ascendant During another the arts will take the lead during another poetry tragedy and lyric poetry and prose will be cultivated during another music will take its turn and out of rude peasant songs will evolve the harmony of the opera To our age is reserved the glory of being easily the foremost in scientific discovery **Determinations of Aerodynamic-drag Parameters of Small Irregular Objects by Means of Drop Tests** ,1961

During the 1955 and 1957 Test Operations at the Nevada Test Site NTS masses and velocities were determined for more than 20 000 objects such as glass fragments from windows stones steel fragments and spheres which were energized by blast winds resulting from nuclear explosions Following the field tests a mathematical model was devised to help explain quantitatively the experimental results This model required certain aerodynamic drag information in regard to the displaced objects It was the purpose of the study outlined in this report to determine the necessary drag properties for the objects by means of drop tests In addition to the objects mentioned above small laboratory animals mice rats guinea pigs and rabbits were used in the drop tests Measurement, Instrumentation and Sensors Mr.
