Mapping Region in Early American Writing Edward Watts, Keri Holt, John Funchion, 2015-11-15 Mapping Region in Early American Writing is a collection of essays that study how early American writers thought about the spaces around them The contributors reconsider the various roles regions imagined politically economically racially and figuratively played in the formation of American communities both real and imagined These texts vary widely some are canonical others archival some literary others scientific some polemical others simply documentary As a whole they recreate important mental mappings and cartographies and they reveal how diverse populations imagined themselves their communities and their nation as occupying the American landscape Focusing on place specific local writing published before 1860 Mapping Region in Early American Writing examines a period often overlooked in studies of regional literature in America More than simply offering a prehistory of regionalist writing these essays offer new ways of theorizing and studying regional spaces in the United States as it grew from a union of disparate colonies along the eastern seaboard into an industrialized nation on the verge of overseas empire building They also seek to amplify lost voices of diverse narratives from minority frontier and outsider groups alongside their more well known counterparts in a time when America's landscapes and communities were constant

Writing North America in the Seventeenth Century Catherine Armstrong, 2016-12-05. Since the first permanent English colony was established at Jamestown, Virginia, in 1607 and accounts of the new world started to arrive back on the English shores, English men and women have had a fascination with their transatlantic neighbours and the landscape they inhabit. In this excellent study, Catherine Armstrong looks at the wealth of literature written by settlers of the new colonies, adventurers, and commentators back in England that presented this new world to early modern Englishmen. A vast amount of original literature is examined, including travel narratives, promotional literature, sermons, broadsides, ballads, plays, and journals, to investigate the intellectual links between mother country and colony. Representations of the climate, landscape, flora, and fauna of North America in the printed and manuscript sources are considered in detail, as is the changing understanding of contemporaries in England of the colonial settlements being established in both Virginia and New England, and how these interpretations affected colonial policy and life on the ground in America. The book also recreates the context of the London book trade of the seventeenth century and the networks through which this literature would have been produced and transmitted to readers. This book will be valuable to those with interests in colonial history, the Atlantic world, travel literature, and historians of early modern England and North America in general.

Evangelicalism and the Politics of Reform in Northern Black Thought, 1776-1863

Rita Roberts, 2011 During the revolutionary age and in the early republic when racial ideologies were evolving and slavery expanding some northern blacks surprisingly came to identify very strongly with the American cause and to take pride in calling themselves American In this intriguing study Rita Roberts explores this phenomenon and offers an in depth examination of the intellectual underpinnings of antebellum black activists She shows how conversion to Christianity led a significant and influential population of northern blacks to view the developing American republic and their place in the new nation through the lens of evangelicalism American identity therefore even the formation of an African ethnic community and later an African American identity developed within the evangelical and republican ideals of the revolutionary age Evangelical values Roberts contends exerted a strong influence on the strategies of northern black reformist activities specifically abolition anti racism and black community development The activists and reformers commitment to the United States and firm determination to make the country live up to its national principles hinged on their continued faith in the possibility of the collective transformation of all Americans The people of the United States both black and white they believed would become a new citizenry distinct from any population in the world because of their commitment to the tenets of the Christian republican faith Roberts explores the process by which a collective identity formed among northern free blacks and notes the ways in which ministers and other leaders established their African identity through an emphasis on shared oppression She shows why in spite of slavery s expansion in the 1820s and 1830s northern blacks demonstrated more not less commitment to the nation Roberts then examines the Christian influence on racial theories of some of the major abolitionist figures of the antebellum era including Frederick Douglass Martin Delany and especially James McCune Smith and reveals how activists sense of their American identity waned with the intensity of American racism and the passage of laws that further protected slavery in the 1850s But the Civil War and Emancipation Proclamation she explains renewed hope that America would soon become a free and equal nation Impeccably researched *Evangelicalism and the Politics of Reform in Northern Black Thought 1776 1863* offers an innovative look at slavery abolition and African American history A *Companion to American Literature* Susan Belasco, Theresa Strouth Gaul, Linck Johnson, Michael Soto, 2020-04-03 A comprehensive chronological overview of American literature in three scholarly and authoritative volumes A Companion to

American Literature traces the history and development of American literature from its early origins in Native American oral tradition to 21st century digital literature. This comprehensive three volume set brings together contributions from a diverse international team of accomplished young scholars and established figures in the field. Contributors explore a broad range of topics in historical, cultural, political, geographic, and technological contexts, engaging the work of both well-known and non-canonical writers of every period. Volume One is an inclusive and geographically expansive examination of early American literature, applying a range of cultural and historical approaches and theoretical models to a dramatically expanded canon of texts. Volume Two covers American literature between 1820 and 1914, focusing on the development of print culture and the literary marketplace, the emergence of various literary movements, and the impact of social and historical events on writers and writings of the period. Spanning the 20th and early 21st centuries, Volume Three studies traditional areas of American literature as well as the literature from previously marginalized groups and contemporary writers often overlooked by scholars. This inclusive and comprehensive study of American literature examines the influences of race, ethnicity, gender, class, and disability on American literature. It discusses the role of technology in book production and circulation, the rise of literacy, and changing reading practices and literary forms. It explores a wide range of writings in multiple genres, including novels, short stories, dramas, and a variety of poetic forms, as well as autobiographies, essays, lectures, diaries, journals, letters, sermons, histories, and graphic narratives. It provides a thematic index that groups chapters by contexts and illustrates their links across different traditional chronological boundaries. **A Companion to American Literature** is a valuable resource for students coming to the subject for the first time or preparing for field examinations, instructors in American literature courses, and scholars with more specialized interests in specific authors, genres, movements, or periods.

Women Writing Race in the Seventeenth-Century English Atlantic Kristina Lucenko, 2025-05-21. *Women Writing Race in the Seventeenth Century English Atlantic* Civil Agents highlights early modern women writers' invocations of civility to reach for the privileges of whiteness. The women studied in this book were writing in various textual modes and span boundaries of ideology, class, religion, and race. Royalist writer Margaret Cavendish, notorious German princess Mary Carleton, early Quaker missionaries to Barbados Lydia Fell, Alice Curwen, and Elizabeth Hooton, and Patience Boston, a Native woman from Monomoy on Cape Cod. As this book explores women writing in the early English Atlantic, engaged civility as a concept and an idiom whose racist implications were becoming codified. Some of the women analyzed embraced and leveraged the practice of civility as a form of agency, while others resisted and were marginalized by it. University of Oregon Extension Monitor, 1923. *Writing Freedom into Narratives of Racial Injustice in Virginia's Shenandoah Valley* Ann Denkler, 2020-10-15. Far too many towns and cities across the United States continue to deny the history of the interstate trade of enslaved men, women, and children and are resistant to recognizing sites associated with enslavement. The Shenandoah Valley of Virginia is one of these regions, and its historical texts and public history sites perpetuate the racist belief that enslaved individuals were not a factor in the

establishment and history of this region because the census numbers in the antebellum era were low In the case of the valley myriad discourses have created a false story of the non presence of African Americans that as it became increasingly replicated became more and more thought of as the truth This book refocuses the study of enslavement and African American history on the narratives of two individuals who were enslaved in the valley region Bethany Veney and the distinctively named John Quincy Adams to help build upon the nascent scholarship of valley enslavement and emancipation By privileging the narratives it asserts that enslaved individuals were astute self conscious historians who knew that they were forging a literary style but also amending the historical record that had kept them absent The book advocates the unearthing of a more complete and equitable American past but also pushes for an interrogation of how and why false mythological pasts have been constructed and examines the legacies these myths have left behind

Modernity through Letter Writing Claudia B. Haake, 2020-09 In *Modernity through Letter Writing* Claudia B Haake shows how the Cherokees and Senecas envisioned their political modernity in missives they sent to members of the federal government to negotiate their status They not only used their letters petitions and memoranda to reject incorporation into the United States and to express their continuing adherence to their own laws and customs but also to mark areas where they were willing to compromise As they found themselves increasingly unable to secure opportunities for face to face meetings with representatives of the federal government Cherokees and Senecas relied more heavily on letter writing to conduct diplomatic relations with the U S government The amount of time and energy they expended on the missives demonstrates that authors from both tribes considered letters memoranda and petitions to be a crucial political strategy Instead of merely observing Western written conventions the Cherokees and Senecas incorporated oral writing and consciously insisted on elements of their own culture they wanted to preserve seeking to convey to the government a vision of their continued political separateness as well as of their own modernity

American Leviathan Patrick Griffin, 2008-04 The dark and bloody ground of the frontier during the years of the American Revolution created much that we associate with the idea of America Between 1763 and 1795 westerners not only participated in a war of independence but also engaged in a revolution that ushered in fundamental changes in the relationship between individuals and society In the West the process was stripped down to its essence uncertainty competition disorder and frenzied and contradictory attempts to reestablish order The violent nature of the contest to reconstitute sovereignty produced a revolutionary settlement riddled with what we would regard as paradox in which new notions of race went hand in hand with new definitions of citizenship In the almost Hobbesian state of nature that the West had become westerners created a liberating yet frightening vision of what society was to be In vivid detail Patrick Griffin recaptures a chaotic world of settlers Indians speculators British regulars and American and state officials vying with one another to remake the American West during its most formative period

Women, Writing, and Travel in the Eighteenth Century Katrina O'Loughlin, 2018-06-14 The eighteenth century witnessed the publication of an unprecedented number of voyages and travels genuine and fictional Within a genre distinguished by its diversity curiosity and experimental impulses Katrina O Loughlin investigates not just how women in the eighteenth century experienced travel but also how travel writing facilitated their participation in literary and political culture She canvases a range of accounts by intrepid women including Lady Mary Wortley Montagu's Turkish Embassy Letters Lady Craven's Journey through the Crimea to Constantinople Eliza Justice's A Voyage to Russia and Anna Maria Falconbridge's Narrative of Two Voyages to the River Sierra Leone Moving from Ottoman courts to theatres of war O Loughlin shows how gender frames access to people and spaces outside Enlightenment and Romantic Britain and how travel provides women with a powerful cultural form for re imagining their place in the world

Antipodean America Paul Giles, 2013-12-11 Although North America and Australasia occupy opposite ends of the earth they have never been that far from each other conceptually The United States and Australia both began as British colonies and mutual entanglements continue today when contemporary cultures of globalization have brought them more closely into juxtaposition Taking this transpacific kinship as his focus Paul Giles presents a sweeping study that spans two continents and over three hundred years of literary history to consider the impact of Australia and New Zealand on the formation of U S literature Early American writers such as Benjamin Franklin Thomas Jefferson Joel Barlow and Charles Brockden Brown found the idea of antipodes to be a creative resource but also an alarming reminder of Great Britain's increasing sway in the Pacific The southern seas served as inspiration for narratives by Washington Irving Edgar Allan Poe and Herman Melville For African Americans such as Harriet Jacobs Australia represented a haven from slavery during the gold rush era while for E D E N Southworth its convict legacy offered an alternative perspective on the British class system In the 1890s Henry Adams and Mark Twain both came to Australasia to address questions of imperial rivalry and aesthetic topsy turvyness The second half of this study considers how Australia's political unification through Federation in 1901 significantly altered its relationship to the United States New modes of transport and communication drew American visitors including novelist Jack London At the same time Americans associated Australia and New Zealand with various kinds of utopian social reform particularly in relation to gender politics a theme Giles explores in William Dean Howells Charlotte Perkins Gilman and Miles Franklin He also considers how American modernism in New York was inflected by the Australasian perspectives of Lola Ridge and Christina Stead and how Australian modernism was in turn shaped by American styles of iconoclasm After World War II Giles examines how the poetry of Karl Shapiro Louis Simpson Yusef Komunyakaa and others was influenced by their direct experience of Australia He then shifts to post 1945 fiction where the focus extends from Irish American cultural politics Raymond Chandler Thomas Keneally to the paradoxes of exile Shirley Hazzard Peter Carey and the structural inversions of postmodernism and posthumanism Salman Rushdie Donna Haraway Ranging from figures like John Ledyard to John Ashbery

from Emily Dickinson to Patricia Piccinini and J M Coetzee *Antipodean America* is a truly epic work of transnational literary history
