Advanced Writing in English as a Foreign Language Horváth József, 2001

Particle Placement in English L1 and L2 Academic Writing Alexandra Kinne, 2020-09-18

This study seeks to contribute to a better understanding of how syntactic variation is affected by probabilistic factors in English as a foreign language EFL L2 exemplified by the effect of weight on the syntactic variation with English transitive verb particle constructions e g look up sort out and transitive verb prepositional phrase PP constructions e g take into account bear in mind With these constructions the particle PP may occur either adjacent to the verb or separated from the verb by a direct object noun phrase DO NP Being highly influenced by the weight of the DO NP in native L1 English little is known about the factors including syntactic weight that govern this variation in L2 English Against the background of possible native language transfer this study examines whether advanced L1 German EFL learners are sensitive to the probabilistic effect of weight on syntactic choices with verb particle PP constructions and whether there are differences when compared to English native speakers Triangulating comparative corpus data and experimental data i e elicited production and elicited assessment the study provides converging evidence from language production and intuition that the learners have acquired a near native awareness of weight effects in verb particle PP constructions with differences indicating a tendency to more conservative choices

Information Highlighting in Advanced Learner English Marcus Callies, 2009 This book presents the first detailed and comprehensive study of information highlighting in advanced learner language, echoing the increasing interest in questions of near native competence in SLA research and contributing to the description of advanced interlanguages. It examines the production and comprehension of specific means of information highlighting in English by native speakers and German learners of English as a foreign language, presenting triangulated experimental and learner corpus data as corroborating evidence. The study focuses on learners' use of discourse pragmatically motivated variations of the basic word order such as inversion, preposing and it and wh clefts, an underexplored field in SLA research to date. The book also provides a critical re-assessment of the study of pragmatics within SLA. It has largely been neglected to date that L2 pragmatic knowledge includes more than the sociopragmatic and pragmatic abilities for understanding and performing speech acts. Thus the book argues for an extension of the scope of inquiry in interlanguage pragmatics beyond the cross-cultural investigation of speech acts. It also discusses pedagogical implications for foreign language teaching and will be of interest to applied linguists and SLA researchers, language teachers and curriculum designers.

A Taste for Corpora Fanny Meunier, Sylvie De Cock, Gaëtanelle Gilquin, Magali Paquot, 2011-08-18 The eleven contributions to this volume, written by expert corpus linguists, tackle corpora from a wide range of perspectives and aim to shed light on the numerous linguistic and pedagogical uses to which corpora can be put. They present cutting edge research in the authors' respective domain of expertise and suggest directions for future research. The main focus of the book is on learner corpora, but it also includes reflections on the role of other types of corpora such as native corpora, expert users corpora, parallel corpora or corpora of New Englishes. For readers who are already familiar with corpora, this volume offers an informed account of the key role that corpus data play in applied linguistics today. As for readers who are new to corpus linguistics, the overview of approaches, methods and domains of applications presented will undoubtedly help them develop their own taste for corpora. This volume has been edited in honour of Sylviane Granger, who has been one of the pioneers of learner corpus research.

Academic Vocabulary in Learner Writing Magali Paquot, 2014-10-01 Academic vocabulary is in fashion, as witnessed by the increasing number of books published on the topic. In the first part of this book, Magali Paquot scrutinizes the concept of academic vocabulary and proposes a corpus-driven procedure based on the criteria of keyness, range and evenness of distribution to select academic words that could be part of a common core academic vocabulary syllabus. In the second part, the author

offers a thorough analysis of academic vocabulary in the International Corpus of Learner English ICLE and describes the factors that account for learners difficulties in academic writing She then focuses on the role of corpora and more particularly learner corpora in EAP material design It is the first monograph in which Granger s 1996 Contrastive Interlanguage Analysis is used to compare 10 ICLE learner sub corpora in order to distinguish between linguistic features that are shared by learners from a wide range of mother tongue backgrounds and unique features that may be transfer related
