The Elective Carnegie Community Engagement Classification John Saltmarsh, Mathew B. Johnson, 2018-03-31 The Carnegie Engagement Classification is designed to be a form of evidence based documentation that a campus meets the criteria to be recognized as a community engaged institution Editors John Saltmarsh and Mathew B. Johnson use their extensive experience working with the Carnegie Engagement Classification to offer a collection of resources for institutions that are interested in making a first time or reclassification application for this recognition Contributors offer insight on approaches to collecting the materials needed for an application and strategies for creating a complete and successful application Chapters include detailed descriptions of what happened on campuses that succeeded in their application attempts and even reflection from a campus that failed on their first application Readers can make use of worksheets at the end of each chapter to organize their own classification efforts

Anchored in Place Leslie Bank,Nico Cloete,2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at

the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges *Achieving sustainable cultivation of temperate zone tree fruits and berries Volume 2* Prof. Gregory A. Lang, 2019-06-30 Brings together some of the world s leading experts on the breeding and cultivation of particular fruits Comprehensive coverage of key stone pome and berry fruits Reviews key advances across the value chain for particular crops that collectively optimise sustainable production **Higher Education - Reflections From the Field - Volume 1** ,2023-11-02 COVID wrought havoc on the world s economic systems Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems Some institutions were prepared for the required transition to online learning Most were not Whether prepared or not educators rose to the challenge The innovativeness of educators met the challenges as digital learning replaced the face to face environment In fact some of the distance models proved so engaging that many students no longer desire a return to the face to face model As with all transitions some things were lost while others were gained This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century The book is organized into four sections on The Perspectives of Higher Education COVID as a Catalyst for Change Embracing Online Learning as a Response to COVID and Post Covid The Way Forward It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process These discussions shed light on the impact of the pandemic and the future of higher education post COVID Higher education has been forever changed and higher education as it once was may never return While many questions arise the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic Theory and Practice of Adult and Higher Education Victor C.X. Wang, 2016-10-01 A volume on Theory and Practice of Adult and Higher Education or Foundations of Adult and Higher Education will appeal to both our graduate students and faculty as so many of them have been taking courses in both program areas and have been concerned with their defined areas of expertise Although theories and practices in Adult Education and in Higher Education are being used interchangeably there is a lack of scholarly work that connects existing theories and practices across the two fields The proposed ground breaking volume will cover topics theories practices in both fields of Adult Education and of Higher Education and in doing so will bring to the fore the connections that make these two fields truly inseparable The proposed volume will therefore generate new knowledge to share among faculty graduate students and other researchers who practice not only in Adult Education but also in Higher

Education **New Directions in the Anthropology of Dreaming** Jeannette Mageo, Robin E. Sheriff, 2020-10-08 This book presents new directions in contemporary anthropological dream research surveying recent theorizations of dreaming that are developing both in and outside of anthropology It incorporates new findings in neuroscience and philosophy of mind while demonstrating that dreams emerge from and comment on sociohistorical and cultural contexts The chapters are written by prominent anthropologists working at the intersection of culture and consciousness who conduct ethnographic research in a variety of settings around the world and reflect how dreaming is investigated by a range of informants in ever more diverse sites As well as theorizing the dream in light of current anthropological and psychological research the volume accounts for local dream theories and how they are situated within distinct cultural ontologies It considers dreams as a resource for investigating and understanding cultural change dreaming as a mode of thinking through contesting altering consolidating or escaping from identity and the nature of dream mentation In proposing new theoretical approaches to dreaming the editors situate the topic within the recent call for an anthropology of the night and illustrate how dreams offer insight into current debates within anthropology s mainstream This up to date book defines a twenty first century approach to culture and the dream that will be relevant to scholars from anthropology as well as other disciplines such as religious studies the

neurosciences and psychology **Sleep and Chronobiology in Plasticity and Memory** Jason Robert Gerstner, H. Craig Heller, Sara J. Aton, 2016-01-15 Chronobiological mechanisms regulating time of day mediated behaviors such as sleep and circadian rhythms are thought to interact with and or share cellular and molecular signaling cascades that shape synaptic plasticity and neural excitability These same factors are also known to underlie events that govern higher order cognitive processing including learning and memory formation and often through phylogenetically conserved pathways This suggests that factors which contribute to adaptive responses to changing environmental stimuli are likely derived from basic evolutionarily ancient processes and underscores the importance of using both invertebrate and vertebrate models to study the interaction of chronobiology and cognitive processing This issue highlights current views along with original research on sleep and circadian features of plasticity and memory in multiple species models and systems *Advanced Power*
