McCormick,2024-03-29 After the death of Mao the leadership of the Chinese Communist Party embarked on a series of ambitious political reforms Barrett L McCormick develops a theory of Leninist states to explore the prospects for these reforms He finds that although the Chinese people have made significant economic and political gains the basic contours of the state remain unchanged and as events in June 1989 clearly showed reform has not diminished the state s ability to impose its prerogatives on society Drawing on Weber s political sociology McCormick argues that patronage and corruption are integral aspects of Leninist rulership Reformers have attempted to promote democracy and law and to fight corruption but when they attempt to implement their programs through traditional hierarchical Leninist institutions lower level cadres have been able to utilize patronage networks to blunt the impact of reform and protect their personal agendas In his case studies of the legal system the people s congress and party rectification McCormick points up these obstacles to progressive change and assesses the extent to which reformers goals have been realized He shows that despite the often radical nature of the reform movements the principal dimensions of the Leninist system one party rule state domination of the economy a confining ideology remain largely intact These findings will be of interest to China specialists as well as students of comparative communism and Leninist states This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 **Flags, Color, and the Legal Narrative**

Anne Wagner,Sarah Marusek,2021-05-24 On behalf of Professor Hugh Brady Director and Senior Fellow The Flag Research Center at the University of Texas School of Law *Flags Color and the Legal Narrative* Public Memory Identity and Critique Springer 2021 has been selected as the recipient of our Gherardi Davis Prize is presented for a significant contribution to vexillological research for the year 2021 This work was selected because of its breadth and depth in examining flags as meaningful transmitters of significant symbolic information concerning the origins culture self image and values of a society We believe it represents a signal achievement in the study of flags that sets a new standard for research in the field The Flag Research Center founded in 1962 is dedicated to furthering knowledge and advancing understanding of the human need to create and use symbols to express political cultural and social ideals through flags and flag related material culture The book

deals with the identification of identity based on culturally specific color codes and images that conceal assumptions about members of a people comprising a nation or a people within a nation. Flags narrate constructions of belonging that become tethered to negotiations for power and resistance over time and throughout a people's history. Bennet 2005 defines identity as the imagined sameness of a person or social group at all times and in all circumstances. While such likeness may be imagined or even perpetuated, the idea of sameness may be socially, politically, culturally, and historically contested to reveal competing pasts and presents. Visually evocative and ideologically representative flags are recognized symbols fusing color with meaning that prescribe a story of unity. Yet through semiotic confrontation there may be different paths leading to different truths and applications of significance. Knowing this and their function, the book investigates these transmitted values over time and space. Indeed, flags may have evolved in key historical periods but contemporaneously transpire in a variety of ways. The book investigates these transmitted values. Which values are being transmitted? Have their colors evolved through space and time? Is there a shift in cultural and/or collective meaning from one space to another? What are their sources? What is the relationship between law and flags in their visual representations? What is the shared collective and/or cultural memory beyond this visual representation? Considering the complexity and diversity in the building of a common memory with flags, the book interrogates the complex color-coded sign system of particular flags and their meanings attentive to a complex configuration of historical, social, and cultural conditions that shift over time.

Advance Praise for Flags: Color and the Legal Narrative

In an epoch of fragmentation, isolation, and resurgent nationalism, the flag is waved but often forgotten. The flag's colors, narratives, shape, and denotations go without saying. The red flag over China, the Star Spangled Banner, the Tricolore are instantly recognisable and overdetermined, representing a people, a nation, a culture, languages, legacies, leaders. In this fabulous volume, flags are revealed as concentrated, complex, chromatic assemblages of people, place, and power in and through time. It is in bringing a multifocal awareness of the modes and meanings of flag and color in public representations that is particular strength. Editors Anne Wagner and Sarah Marusek have gathered critical thinkers from the North and South, East and West to help know the essential and central yet often forgotten and not seen work of flags and color in narratives of nation, conflict, struggle, and law. A kaleidoscopic contribution to the burgeoning field of visual jurisprudence, this volume is essential to comprehending the ocular machinery through which power makes and is seen to make the world.

This comprehensive volume of essays could not be arriving at a more opportune time. The combined forces of climate change, inequality, and pandemic are causing instability and painful recognitions of our collective uncertainties about nationhood and globalism. In the United States, where I am writing these few lines, our traditional red-white-blue flag has been collapsed into two colors, Red and Blue. While these colors have semiotically deep texts, the division of the country into these two colors began with television stations designing how to report the vote count in the 2000 presidential election year, creating red and
