The Oxford Guide to the Bantu Languages Lutz Marten, Ellen Hurst-Harosh, Nancy C. Kula, Jochen Zeller, 2025-08-19

This volume brings together leading scholars from Africa Europe the Americas and beyond to provide a detailed account of the languages of the Bantu family which cover an area from Cameroon and Kenya in the north to South Africa in the south. The Bantu family is part of the Niger Congo phylum and one of the world's biggest language groups comprising around 500 languages. The family includes major languages with large numbers of speakers such as Zulu, Kinyarwanda and Swahili, the most widely spoken and taught African language as well as many community languages and several endangered languages. Bantu languages feature prominently in the complex and multilingual language ecologies that are characteristic of the linguistic situation in much of Africa and they provide rich evidence for the study of theoretical and comparative linguistics, language contact and language change. They play an important role in education, commerce, culture and artistic expression in the media and public discourse in governance and social justice and are central to the future of the continent and the well-being of its communities. The first part of *The Oxford Guide to the Bantu Languages* provides background and context with chapters exploring the history of research in the field, language and prehistory in Bantu-speaking Africa and typology and variation. Chapters in the second part offer broad comparative overviews of Bantu phonology, morphology, syntax, semantics and pragmatics, socio and applied linguistics. Parts III-VII cover more specific topics in Bantu linguistics across a variety of subfields ranging from structural issues such as the augment and melodic tone to historical and sociolinguistic topics such as Bantu languages in the diaspora and language policy and standardization. The chapters in the final part offer individual structural overviews of a range of languages from across the Bantu-speaking area. The book will be an essential resource for students and researchers specializing in the Bantu languages and for typologists and comparative linguists more broadly. Hibbert, Christa van der Walt, 2014-04-16 Focusing on the use of African languages in higher education, this book showcases South African higher education practitioners' attempts to promote a multilingual ethos in their classes. It is a first-time overview of multilingual teaching and learning strategies that have been tried and tested in a number of higher education institutions in South Africa. Despite language in education policies that extol the virtues of multilingualism, practice remains oriented towards English-only learning and teaching. In the multilingual contexts of local campuses, this book shows how students and lecturers attempt to understand their multiple identities and use the available languages to create multilingual learning environments. Indigenous Supply Chain Management in Africa Temidayo O. Akenroye, Marcia Mkansi, Godfrey Mugurusi, Aaron L. Nsakanda, 2025-09-26 This edited work assembles knowledge on wide-ranging indigenous supply chain management (SCM) theories and practices from different African countries, particularly sub-Saharan Africa. The chapters concentrate on how African culture influences supply chain practices, nature, operations, structures, outcomes and value propositions. This is essential knowledge to facilitate a better understanding of what SCM might mean in the African context while also serving as an avenue to evaluate similarities and differences between cross-country management theories. Africans have historically employed indigenous SCM to address the socioeconomic challenges they face in the coordination of the movement of goods, services and all processes that transform raw materials into finished goods. By identifying and examining the differences, similarities and complementarities between various African indigenous SCM concepts and ideologies, this work will inform the development

of new models and interventions in response to Africa's complex business management challenges. It will forge new ground for researchers and policymakers regarding effective, efficient, and sustainable solutions to manage global supply chain challenges.
