Through A Glass Darkly American Views Of The Chinese Revolution:

Through a Glass Darkly William Hinton, 2006-06 *Through a Glass Darkly* was William Hinton's last book. It draws on a lifetime of immersion in Chinese politics and society beginning with the seven years he spent in China working mainly in agriculture and land reform until 1953. On his return to the United States in that year, Hinton first encountered the distortions and misrepresentations of the Chinese Revolution that he examines in this book. Hinton defends the achievements of the Chinese Revolution during the three decades from 1948 to 1979 from its detractors both in the United States and since 1979 in China itself. His starting point is the work of John K. Fairbank, for many years a professor at Harvard and the dean of China Studies in the United States. But it is not limited to critique. Instead, Hinton's critique of Fairbank leads into a wide-ranging examination of the nature of the transformation attempted in China, its social and political bases and the causes and consequences of its policies in land reform, agriculture, combating famine, popular culture, industrialization, morality, and much else besides. Moving from large questions to concrete details often drawn from his own experiences, Hinton brings everyday life in revolutionary China graphically to life. In a time when the distorted views first developed by U.S. critics of the Chinese Revolution are often propagated by the new Chinese elite themselves, *Through a Glass Darkly* has more than just historical relevance. For anyone wishing to understand present-day rivalries between the United States and China, Hinton shows how these began. This is a fitting completion of the work of a great scholar and revolutionary. *China's Path to Development* Ali Kadri, 2021-01-04 This book is a treatise against neoliberalism illuminated by the path of China. China is a model to be mimicked but more so theoretically than by replication. If anything, nations of the global South must rid themselves of neoliberally imposed one-size-fits-all models instrumentalised to shift value to US empire. Neoliberal models robbing nations of their histories and resources are negative best practice serving the interests of the hegemon. Developing nations need to search for the theory that corresponds to their own conditions and development strategies. China's experience anchored in labour as the historical agent offers numerous theoretical cues as to how to build comparable home-grown paths. Thinking development with a subject voids reductionist politics in favour of sober class analysis. The study concludes by restating the age-old wisdom that there is no development without the rule of labour. *City Versus Countryside in Mao's China* Jeremy Brown, 2012-06-18 The gap between those living in the city and those in the countryside remains one of China's most intractable problems. As this powerful work of grassroots history argues, the origins of China's rural-urban divide can be traced back to the Mao Zedong era. While Mao pledged to remove the gap between the city worker and the peasant, his revolutionary policies misfired and ended up provoking still greater discrepancies between town and country, usually to the disadvantage of villagers. Through archival sources, personal diaries, untapped government dossiers, and interviews with people from cities and villages in northern China, the book recounts their personal experiences showing how they retaliated against the daily restrictions imposed on them while traversing between the city and the countryside. Vivid and harrowing
