Tic Tac Toe Choice Board Activities:

Differentiating by Student Interest Joni Turville, 2013-11-20 This practical book shows elementary school teachers how to differentiate instruction based on their students' situational and personal interests. It provides a large number of detailed and easy-to-use lesson plans to help you create choices to increase student engagement and learning. Also included is a set of blackline masters which you can duplicate and use in your classroom. **A Teacher's Toolbox for Gifted Education**

Todd Stanley, 2022-01-31 This book provides busy teachers with an adaptable toolbox of strategies for challenging gifted students that they can immediately put into practice in their classroom, school, or program. Chapters cover everything from makerspaces and project-based learning to enrichment clubs, mentorships, creative thinking, and more. Each strategy includes an overview, resource guide, description of how it looks in the classroom, and all the information you need to put it into practice. With templates, charts, and links to videos illustrating the tools in action, *A Teacher's Toolbox for Gifted Education* is your go-to guide for creative ways to support advanced learners. **The Perfect Blend** Michele

Eaton, 2020-05-05 Learn how to redesign lessons with technology to individualize and personalize instruction, transforming what learning looks like for your students. Many blended learning initiatives start from the top down and are designed for specific populations or make drastic changes to a school's learning structure. But any K-12 classroom teacher can find ways to leverage blended learning regardless of the constructs of their learning environment. All they need is a willingness to rethink their role, moving from content deliverer to architect of learning. In *The Perfect Blend*, you'll learn how to create a homemade recipe for effective blended learning for your students. Rather than focusing on finding and implementing a specific established model, author Michele Eaton shows teachers how to embrace the flexibility of blended learning to take an active role as a designer of learning and, in the process, help students become advocates for their education. This book provides an accessible resource for teachers beginning to use technology as well as master blended teachers who are looking for new ideas or strategies. Includes templates and planning tools that can be used as is or modified to fit the needs of your students. Focuses on understanding and reflecting on your role as a designer of learning experiences and creating and using digital content in the classroom. You'll gain practical skills, strategies, and lesson ideas for various types of blended learning thanks to examples from real classrooms and educators. Along the way, you'll discover how to build on the skills you already have to support blended learning. Audience: K-12 teachers and instructional coaches. *Differentiation That Really Works*

Cheryll M. Adams, Rebecca L. Pierce, 2021-09-03 Differentiating requires more than just a simple bag of tricks. Teachers need to have concrete strategies if they want to provide choice and challenge for all learners in their classroom. The strategies included in this book were chosen based on their ease of implementation and modification. In addition, they all encourage student engagement, provide inherent opportunities for differentiation, and are appropriate for multiple grade levels. *Differentiation That Really Works* provides time-saving strategies and lesson ideas created and field-tested by practicing

professionals in their own heterogeneous classrooms These lessons can be used as written or can be modified to meet the needs of a particular classroom The book also provides templates that can be used to develop new lessons using each strategy These strategies including exit cards choice boards cubing graphic organizers learning contracts and tiered lessons help pave the way to a differentiated classroom that meets all students needs Grades 3-5 Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research **Start Seeing and Serving Underserved Gifted Students**

Jennifer Ritchotte, Chin-Wen Lee, Amy Graefe, 2020-10-21 2020 TAGT Legacy Book Award for Educators Winner Flexible tools help teachers see understand teach challenge and advocate for underserved gifted students The underrepresentation of students from historically marginalized populations including English language learners twice exceptional students culturally and linguistically diverse students and economically disadvantaged students in our gifted programs and services continues to be a critical issue in education The importance of a caring and committed teacher who sees and supports the potential in all learners and who respects linguistic diversity and students cultural identity cannot be overstated yet teachers need the knowledge and training to do so This reader friendly guide meets that need promoting equity in gifted education by providing
