cumulation covers six years 1965 70 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **Freud on Time and Timelessness** Kelly Noel-Smith,2016-07-01 Time and timelessness are fundamental principles of psychoanalysis yet Freud does not present a consolidated theory of temporality In this book Kelly Noel Smith pieces together Freud s scattered hints and suspicions about time and its negative timelessness She traces a careful temporal trail through Freud s published works and his daunting Nachlass and provides a compelling reason as to why Freud kept his remarkable thoughts about time to himself **The Interoceptive Mind** Manos Tsakiris,Helena de Preester,2019 Interoception is the body to brain axis of sensations that originates from the internal body and visceral organs The Interoceptive Mind From Homeostasis to Awareness offers a state of the art overview of and insights into the role of interoception for mental life awareness subjectivity affect and cognition **Creativity in the Digital Age** Nelson Zagalo,Pedro Branco,2015-04-02 This edited book discusses the exciting field of Digital Creativity Through exploring the current state of the creative industries the authors show how technologies are reshaping our creative processes and how they are affecting the innovative creation of new products Readers will discover how creative production processes are dominated by digital data transmission which makes the connection between people ideas and creative processes easy to achieve within collaborative and co creative environments Since we rely on our senses to understand our world perhaps of more significance is that technologies through 3D printing are returning from the digital to the physical world Written by an interdisciplinary group of researchers this thought provoking book will appeal to academics and students from a wide range of backgrounds working or interested in the technologies that are shaping our experiences of the future Felt Time Marc Wittmann,2016-02-10 An expert explores the riddle of subjective time from why time speeds up as we grow older to the connection between time and consciousness We have widely varying perceptions of time Children have trouble waiting for anything Are we there yet Boredom is often connected to our sense of time passing or not passing As people grow older time seems to speed up the years flitting by without a pause How does our sense of time come about In Felt Time Marc Wittmann explores the riddle of subjective time explaining our perception of time whether moment by moment or in terms of life as a whole Drawing on the latest insights from psychology and neuroscience Wittmann offers a new answer to the question of how we experience time Wittmann explains among other things how we choose between savoring the moment and deferring gratification why impulsive people are bored easily and why their boredom is often a matter of time whether each person possesses a personal speed a particular brain rhythm distinguishing quick people from slow people and why the feeling of duration can serve as an error signal letting us know when it is taking too long for dinner to be ready or for the bus to come He considers the practice of mindfulness and whether it can reduce the speed of life and help us gain more time and he describes how as we grow older subjective time accelerates as routine increases a fulfilled and varied life is a long life Evidence shows that bodily processes especially the heartbeat underlie our feeling of time and act as an internal clock for our

sense of time And Wittmann points to recent research that connects time to consciousness ongoing studies of time consciousness he tells us will help us to understand the conscious self
