

TIME

A black and white photograph of a wide city street, likely in Europe, with multi-story buildings lining the left side. A row of trees separates the sidewalk from the road. Several cars are parked along the curb, and a few vehicles are visible further down the street. In the far distance, a large dome, possibly a cathedral, is visible against the sky. In the foreground, a person's arm is extended from the left, wearing a dark, ribbed sweater and a wristwatch with a light-colored face and a dark strap. A grid of thin, dark lines is superimposed over the entire image, creating a sense of perspective and measurement.

Time Whitechapel Documents Of Contemporary Art:

A Time of One's Own Catherine Grant, 2022-08-29 In *A Time of One's Own* Catherine Grant examines how contemporary feminist artists are turning to broad histories of feminism ranging from political organizing and artworks from the 1970s to queer art and activism in the 1990s Exploring artworks from 2002 to 2017 by artists including Sharon Hayes Mary Kelly Allyson Mitchell Deirdre Logue Lubaina Himid Pauline Boudry and Renate Lorenz Grant maps a revival of feminism that takes up the creative and political implications of forging feminist communities across time and space Grant characterizes these artists' engagement with feminism as a fan-ish autodidactic and collective form of learning from history This fandom of feminism allows artists to build relationships with previous feminist ideas artworks and communities that reject a generational model and embrace aspects of feminism that might be seen as embarrassing queer or anachronistic Accounting for the growing interest in feminist art politics and ideas across generations Grant demonstrates that for many contemporary feminist artists the present moment can only be understood through an embodied engagement with history in which feminist pasts are reinhabited and reimagined

Notions of Temporalities in Artistic Practice Anamarija Batista, 2022-07-04 The reflections on historical and contemporary positions assembled here shed light on concepts of temporalities in the context of artistic practices In the 1960s and 1970s the pursuit for the situational processual and actual stirred up artistic and theoretical fields Nowadays contemporary practices expand on these subjects by exploring the notion of anachronism the impermanence of one's own corporeality together with the performative and ephemeral qualities of the sonic amongst other relevant concepts The goal of this publication is to offer a deep dive into situation specific settings and to fundamentally explore how temporality is able to initiate action and structure our perception thereby affecting our bodies our senses how we communicate and how the present moment is shaped

Queer Times, Queer Becomings E. L. McCallum, Mikko Tuhkanen, 2011-11-01 Queer theory essays on time and becoming in the fields of literature philosophy film and performance

How to Read a Moment Mathias Nilges, 2021-03-15 In *How to Read a Moment* Mathias Nilges shows that time is inseparable from the stories we tell about it demonstrating that the contemporary American novel offers new ways to make sense of the temporality that governs our present Time is a thing that grows scarcer every day observes one of Don DeLillo's characters The future is gone The Baffler argues Where's my hoverboard a meme demands Contemporary capitalism a system that insists that everything happen at once creates problems for social thought and narrative alike After all how does one tell the time of instantaneity In this moment of on demand service and instant trading it has become difficult to imagine the future The novel emerged as the art form of a rapidly changing modern world a way of telling time in its progress Nilges argues that this historical mission is renewed today through works that understand contemporaneity as a form of time shaping that props up our material world and cultural imagination But the contemporary American novel does not simply associate our present with a crisis of futurity Through analyses of works by authors such as DeLillo Jennifer Egan

Charles Yu and Colson Whitehead Nilges illustrates that the novel presents ways to make sense of the temporality that controls our purportedly fully contemporary world In so doing the novel recovers a sense of possibility and hope forwarding a dazzling argument for its own importance today

Museum Temporalities Wayne Modest, Peter Pels, 2025-11-19 Museum Temporalities analyzes how museums relate to time It explores the hidden temporal assumptions and practices that define museums How might these assumptions help us to better understand and address museums often problematic and painful relationship to the colonial past Since the nineteenth century the globalization of the museum has spread specific understandings of permanence and temporariness that inform museum display separated the modern from the traditional and promoted preservation and development in ways that tacitly assume a North Atlantic cultural outlook as the end point of history and the standard that determines a hierarchy of science art technology craft and natural history Questioning linear and epochal genealogies that assume Enlightenment surveys of the classifiable universe as the origin of the museum Modest and Pels present evidence that global exhibitionary complexes will fail to sufficiently address questions of decolonization and restitution if they do not make room for the ethnographic museum as a principal site where suggestions for the future of all museums can be generated They show that any attempt to address the problematic and painful relationship that museums have to colonial pasts requires them to reorient their relationship to time The chapters in this volume assembles building blocks for a theory and practice of museums that no longer assumes the need for identities objects and collections to be permanent for the museum to be the end point of knowledge and for art or science to be the universal measure to which other forms of cultural production can only aspire This pathbreaking collection centralizes and develops current concerns in critical museology and is valuable reading for scholars and students

Time Amelia Groom, 2013 Time contemporary art has explored such diverse registers of temporality as wasting and waiting regression and repetition deja vu and seriality idleness and unrealized potential non consummation and counter productivity the belated and the premature the disjointed and the out of synch all of which go against sequential time and index slips in chronological experience While theorists have proposed radical perspectives such as the anachronistic or heterochronic reading of history artists have opened up the field of time to the extent that they very notion of the contemporary is brought into question Back cover

[Live Coding](#) Alan F. Blackwell, Emma Cocker, Geoff Cox, Alex McLean, Thor Magnusson, 2022-11-22 The first comprehensive introduction to the origins aspirations and evolution of live coding Performative improvised on the fly live coding is about how people interact with the world and each other via code In the last few decades live coding has emerged as a dynamic creative practice gaining attention across cultural and technical fields from music and the visual arts through to computer science Live Coding A User's Manual is the first comprehensive introduction to the practice and a broader cultural commentary on the potential for live coding to open up deeper questions about contemporary cultural production and computational culture This multi authored book by artists and musicians software designers and researchers provides a practice focused account of the

origins aspirations and evolution of live coding including expositions from a wide range of live coding practitioners In a more conceptual register the authors consider liveness temporality and knowledge in relation to live coding alongside speculating on the practice s future forms *Contemporary Clay and Museum Culture* Christie Brown, Julian Stair, Clare Twomey, 2016-06-17 This groundbreaking book is the first to provide a critical overview of the relationship between contemporary ceramics and curatorial practice in museum culture Ceramic objects form a major part of museum collections with connections to anthropology archaeology and other disciplines that engage with the cultural and social history of humankind In recent years museums have provided the impetus for cutting edge artistic practice either as a response to particular collections or as part of exhibitions But the question of how museums have staged contemporary ceramics and how ceramic artists respond to museum collections has not been the subject of published research to date This book examines how ceramic artists have over the last decade begun to animate museum collections in new ways and reflects on the impact that these new initiatives have had in the broad context of visual culture *Ceramics in the Expanded Field* is the culmination of a three year AHRC funded project and reflects its major findings It brings together leading international voices in the field of ceramics research undertaken throughout the project and papers delivered at the concluding conference By examining the benefits and constraints of interventions and the dialogue between ceramics and museological practice this book will bring focus to an area of museology that has not yet been theorized and will contribute to policy debates and art practice

London Art Worlds Jo Applin, Catherine Spencer, Amy Tobin, 2017-12-14 The essays in this collection explore the extraordinarily rich networks of international artists and art practices that emerged in and around London during the 1960s and 70s a period that saw an explosion of new media and fresh attitudes and approaches to making and thinking about art The contributors to *London Art Worlds* examine the many activities and movements that existed alongside more established institutions in this period from the rise of cybernetics and the founding of alternative publications to the public protests and new pedagogical models in London s art schools The essays explore how international artists and the rise of alternative venues publications and exhibitions along with a growing mobilization of artists around political and cultural issues ranging from feminism to democracy pushed the boundaries of the London art scene beyond the West End s familiar galleries and posed a radical challenge to established modes of making and understanding art Engaging wide ranging and original *London Art Worlds* provides a necessary perspective on the visual culture of the London art scene in the 1960s and 70s Art historians and scholars of the era will find these essays especially valuable and thought provoking In addition to the editors contributors to this volume are Elena Crippa Antony Hudek Dominic Johnson Carmen Juli Courtney J Martin Lucy Reynolds Joy Sleeman Isobel Whitelegg and Andrew Wilson Improvisation in Music and Philosophical Hermeneutics Sam McAuliffe, 2023-02-23 In the first book to examine the overlooked relationship between musical improvisation and philosophical hermeneutics Sam McAuliffe asks what exactly is improvisation And how does it relate to our being in the

world Improvisation in Music and Philosophical Hermeneutics answers these questions by investigating the underlying structure of improvisation McAuliffe argues that improvising is best understood as attending and responding to the situation in which one finds itself and as such is essential to how we engage with the world Working within the hermeneutic philosophical tradition drawing primarily on the work of Martin Heidegger Hans Georg Gadamer and Jeff Malpas this book provides a rich and detailed account of the ways in which we are all already experienced improvisers Given the dominance of music in discussions of improvisation Part I of this book uses improvised musical performance as a case study to uncover the ontological structure of improvisation a structure that McAuliffe demonstrates is identical to the structure of hermeneutic engagement Exploring this relationship between improvisation and hermeneutics Part II offers a new reading of Gadamer's philosophical hermeneutics examining the way in which Gadamer's accounts of truth and understanding language and ethics each possess an essentially improvisational character Working between philosophy and music theory Improvisation in Music and Philosophical Hermeneutics unveils the hermeneutic character of musical performance the musicality of hermeneutic engagement and the universality of improvisation
