There are a number of journals and books on writing for publication but no single book on writing for publication that discusses specific components of a manuscript, specific types of manuscripts, and the specific steps in the submission process. In addition, few books give information on how to develop writing skills by offering guidance on becoming an excellent manuscript reviewer and outlining what makes a good review. *The Handbook of Scholarly Writing and Publishing* provides emerging scholars with specific guidelines on how to craft scholarly papers and other writing suitable for submission to academic journals within their discipline. Emerging scholars will receive information on how to develop a manuscript suitable for publication in scholarly journals including how to follow through with editors and deal with rejection, rewriting, and resubmitting.
