Upsetting Composition Commonplaces Ian Barnard,2014-07-15 In *Upsetting Composition Commonplaces* Ian Barnard argues that composition still retains the bulk of instructional practices that were used in the decades before poststructuralist theory discredited them While acknowledging that some of the foundational insights of poststructuralist theory can be difficult to translate to the classroom Barnard upends several especially intransigent tenets that continue to influence the teaching of writing and how students are encouraged to understand writing Using six major principles of writing classrooms and textbooks clarity intent voice ethnography audience and objectivity Barnard looks at the implications of poststructuralist theory for pedagogy While suggesting some evocative poststructuralist pedagogical practices the author focuses on diagnosing the fault lines of composition s refusal of poststructuralism rather than on providing solutions in the form of teaching templates *Upsetting Composition Commonplaces* addresses the need to more effectively engage in poststructuralist concepts in composition in an accessible and engaging voice that will advance the conversation about relations between the theory and teaching of writing *Literacy Essentials* Regie Routman,2023-10-10 In her practical and inspirational book *Literacy Essentials Engagement Excellence and Equity for All Learners* author Regie Routman guides K 12 teachers to create a trusting intellectual and equitable classroom culture that allows all learners to thrive as self directed readers writers thinkers and responsible citizens Over the course of three sections Routman provides numerous Take Action ideas for implementing authentic and responsive teaching assessing and learning This book poses a key question How do we rise to the challenge of providing an engaging excellent equitable education for all learners including those from high poverty and

critique he elaborates an alternative metatheory one that restores writing to the conceptual center of composition studies by emphasizing its generative rather than its representational characteristics particularly in increasingly networked and textualized cultures
