Designing plastics circulation: Anne Raudaskoski, Torben Lenau, Tapani Jokinen, Anna Velander Gisslén, Anna-Luise Metze, 2019-08-05 Presently most electrical electronic equipment EEE is not designed for recycling let alone for circulation Plastics in these products account for 20% of material use and through better design significant environmental and financial savings could be gained Technological solutions and circular design opportunities already exist but they haven t been implemented yet Some challenges such as ease of disassembly could be resolved through better communication and by sharing learnings across the value chain Instead of WEEE we should focus on developing CEEE Circular Electrical and Electronic Equipment The case examples of this report show how different stages of the lifecycle can be designed so that plastics circulation becomes possible and makes business sense It is time to take a leap in material flow management and scale up these circular solutions across the industry
