This book is not just for people who see themselves as having a primary role in the field but also for those teachers, the police and family members who live daily with its effects. Professor Dame Betty Kershaw, University of Sheffield, UK. Alcohol dependency represents an enduring problem for both the individual and wider society. Despite contemporary media coverage on increasingly dangerous levels of drinking in the United Kingdom, the fact remains that excessive alcohol consumption has been a distinguishing feature of Western society for generations. This book is arranged by a number of themed parts largely representing the key areas in the process of facilitating access to effective clinical management. The book will also be of interest to the wider public who have an interest or concern in relation to alcohol dependency. Contents include: Part 1 Identification; Part 2 Medical interventions; Part 3 Psychological interventions; Part 4 Contemporary issues in the identification and treatment of alcohol dependency; Part 5 Clients with complex needs; Part 6 Reproductive and developmental concerns.

Highs & Lows Lorraine Greaves, Nancy Poole, 2007. Women's and girls' substance use is an important health, economic and social issue in Canada. However, most books about alcohol and other drug use do not address the unique needs and circumstances of this population. *Highs & Lows* draws on the latest theory and research to offer strategies for improving practice and developing policy to support women with substance use problems. This unique book includes contributions from nearly 100 experts on women's substance use, including psychiatrists, psychologists, social workers, clinical therapists, health promoters, academics, alternative health care providers, women's health advocates and women who have personally been affected by substance use. The book includes in-depth chapters on the interconnection of trauma, mental health and substance use problems for women, pregnancy, mothering and substance use, innovative treatment, harm reduction and prevention programs designed with women's needs in mind, challenges and opportunities for improved research, treatment and policy development. *Highs & Lows* also includes snapshots of the latest in women-centred research, treatment and policy innovations, statistics on women's substance use in Canada, women's personal narratives of their experiences of substance use problems. *Highs & Lows* is a valuable resource for program developers and administrators, researchers and policy makers, therapists and counsellors and educators and students. It is an ideal choice as a course text on this topic. *Highs & Lows* was developed through a partnership between the British Columbia Centre of Excellence for Women's Health and the Centre for Addiction and Mental Health.
