Transforming to Effects-Based Operations Andrew Dorman, 2008-01-31 Outside the United States the United Kingdom UK has led the way in seeking to transform its military forces to meet the new strategic context in which it finds itself Like so many of its counterparts it has sought to do this within a defense budget that has continued to decline as a percentage of gross domestic product This has meant a series of changes to the traditional approach to defense that have gone much further than the United States and many of its European counterparts In essence for good or ill the UK has pushed ahead with changes to areas such as the use of contractors both at home and on the battlefield acquisition reform involving leasing and Public Private Partnerships the disposal of surplus defense real estate and the role of sponsored reserves As the same time a considerable amount of attention has been given to how operations are conducted As part of this process the UK s Ministry of Defence and Armed Forces have officially sought to adopt an effects based approach to operations within the context of an overall comprehensive approach that brings together the various organs of government For the United States the UK s approach to military operations is important for a number of reasons First the UK frequently engages in a variety of similar type operations from which there are lessons that may be applicable to the United States either now or in the future such as counterinsurgency in Northern Ireland or nation building in Sierra Leone Moreover a number of authors have argued that there is a distinctly British way in warfare which is particularly suited to such unconventional operations Second since the United Kingdom is one of the United States closest allies the UK armed forces are frequently engaged in operations in partnership with the United States These have ranged recently from the Balkans to Afghanistan to Iraq In fact the only noticeable time the British were not involved in a U S led operation since the end of the Cold War was in Somalia The vast majority of these operations have involved sizable British commitments and a close integration of the British military in all the stages from planning through to nation building Interest in future British policy was most recently evident in the debate surrounding the transition of power from Prime Minister Tony Blair to Prime Minister Gordon Brown Third the UK is a

member of various military alliances coalitions and partnerships which place it in a strong position to influence how others conduct operations These include the North Atlantic Treaty Organization NATO the European Union EU America Britain Canada Australia and New Zealand ABCA the Five Power Pact in the Pacific and the Commonwealth In the case of NATO it was General David Richards the commander of the largely British Allied Rapid Reaction Corps ARRC headquarters who deployed to Afghanistan in 2006 and oversaw the expansion of NATO's role including for the first time since the end of World War II leading a significant U S contingent This monograph therefore seeks to examine the extent to which the UK has transitioned to effects based operations to ascertain 1 areas where the U S Army could draw lessons from UK policies 2 areas where the U S Army and the British Ministry of Defence could develop integrated or complementary approaches and doctrines towards transformation for future alliance coalition operations and 3 implications for the U S Army for working with the UK This monograph has been subdivided into four parts Section 1 undertakes a review of the evolution of British defense policy since the end of the Cold War and evaluates the degree to which it has adopted an effects based approach Section 2 examines the British operational experience since the end of the Cold War including an analysis of the lessons learned and its experiences in working with allies
