Transitions And Consolidation Of Democracy In Africa Global Academic Publishing:

Transitions and Consolidation of Democracy in Africa Samuel Ebow Quainoo, 2008 What conditions motivate a transition to democracy Can the dynamics of a transition influence its outcome Under what circumstances has democracy been consolidated in Africa This trilogy of questions has become necessary in light of the current democratic wave engulfing Africa and the rest of the world In examining the conditions that initiate democratic transitions this book investigates the circumstances under which democracy movements have operated between 1980 and 1990 It concludes that contrary to dominant democratic theory the transitions to democracy in Africa have occurred under declining levels of development With regard to transitions the book recognizes that they have their own dynamics Two main types of transitions are discerned top down and bottom up The book argues that in spite of the restrictive nature of top down transitions they offer a better opportunity for democratic consolidation because of the consensus between elites of the pro democracy regime and their counterparts in the authoritarian regime a condition that is normally absent under bottom up transitions Finally relying on the cases of consolidated democracies the book derives an African democracy model The model delineates five main conditions that facilitate democratic consolidation including good leadership relevant political institutions external support civic space and a reasonable level of development It cautions however that these are not sufficient conditions nor are all of them necessary Since countries have unique historical circumstances specific countries will have to combine conditions in the model that are relevant to that society to consolidate its democracy The right combination will depend on the specific needs of the individual country

South Africa's Democracy at the Crossroads Daniel Silander, Charlotte Silander, Herman van der Elst, Pieter Heydenrych, 2022-04-18 South Africa's democracy faces increasing challenges from within whether from protest bad governance or general public dissatisfaction South Africa's Democracy at the Crossroads explores the question what are the challenges to future democratization in South Africa

The Role of Civil Society in Africa's Quest for Democratization Abadir M. Ibrahim, 2016-12-08 This book tests many of the assumptions, hypotheses and conclusions connected with the presumed role of civil society organizations in the democratization of African countries. Taking a comparative approach, it looks at countries that have successfully democratized, those that are stuck between progress and regression, those that have regressed into dictatorship, and those that are currently in transitional flux, and evaluates what role, if any, civil society has played in each instance. The countries discussed—South Africa, Ghana, Nigeria, Ethiopia, Egypt, and Tunisia—represent a diverse set of social and political circumstances and different levels of democratic achievement, providing a rich set of case studies. Each sample state also offers an internal comparison, as each has historically experienced different stages of democratization. Along the course of each case study, the book also considers the effect that other traditionally studied factors, such as culture, colonization, economic development, and foreign aid, may have had on individual attempts at democratization. The first extensive work on civil society and democratization in Africa, the book adds new insights to the applicability of democratization theory in a non-Western context, both filling a gap in and adding to the existing universal scholarship. This book will be useful for scholars of political science, economics, sociology, and African studies, as well as human rights activists and policy makers in the relevant geographical areas.

Globalization and Africa's Transition to Constitutional Rule Mohammed Nurudeen

Akinwunmi-Othman, 2017-10-11 This book contributes to the discourse on post-colonial and globalization theories focusing on Nigeria's transition to a federal system of government. The project analyzes 10 years of civil rule in Nigeria between 1999 and 2009 and its constitutional arrangements, while also engaging in comparative studies of other socio-political developments in Sub-Saharan Africa. The collective influences of the judiciary on the polity were improved and strengthened through globalization. In addition, organized pressure groups, non-governmental organizations, as well as the Civil Society Organization, have played significant roles as vehicles of socio-political change and transformation. They continue to act as buffers for the sustenance of democratic rule well beyond the period in question.

Military, Politics and

Democratization in Southern Africa Tendai Chari, Patrick Dzimiri, 2023-08-10 This book explores multiple challenges faced by democratization in Southern Africa. Applying a wider lens to the concept of political transition and employing a variety of theoretical and methodological approaches, the contributions gathered here explore residual political-cultural practices that hinder democratic consolidation in Southern Africa. Presenting various case studies, the book tackles themes such as the military-political nexus, leadership renewal, constitutionalism, electoral politics, election violence, marginalization of women, civil society and political transition, media framing, and transitional justice. Written from a multidisciplinary perspective and drawing on empirical data from multiple sources, this edited volume challenges orthodox conceptualizations of political transition. The book will be of interest to students and scholars of political science, African studies, and related fields, as well as policy makers and professionals interested in the latest political developments in Southern Africa.

African Renaissance in

the Millennium Emmanuel Ike Udogu, 2007-01-01 The book brings into sharp focus some of the major political social and economic issues that might impede Africa's development project in the 21st century. It debates and suggests ways that policy makers might tackle these issues in order to promote the vision of the continent's transformation in the millennium. *The Politics of Neoliberal Democracy in Africa* Usman A. Tar, 2008-10-30 Since the late 1980s the changing dynamic of global development has driven the tide of democratic expansion in the developing world. In Africa, western donors have sought to impose neo-liberal visions of socio-economic and political institution building, spreading political reforms and economic liberalisation with far-reaching consequences. Associated with external interventions but also sometimes conflicting with them are internal protests against authoritarianism which have problematically reinforced and/or undermined the donor agenda for democratic reform. Here Usman Tar questions the assumption that Africa was lacking the essential components for a spontaneous transition to democracy. He explores the dynamic but contradictory links between external and internal dimensions of neo-liberal democratic expansion in Africa, focusing on Nigeria. Tar dissects the struggles for democracy and for democratic policy and practice in a country with rich economic potential but a troubled political dispensation. **A Global Political Economy of Democratisation** Alison J. Ayers, 2018-02-13 The late twentieth century is often portrayed as an Age of Democratisation with democracy heralded as the best of all political systems. Yet democracy has multiple meanings, values and significances. The start of the twenty-first century has witnessed a massive revival of interest in the meaning and role of democracy, not least as democracy understood in one highly particular sense has been increasingly recognised to be in crisis. This book presents these deliberations in a new light by moving beyond the concept of the sovereign state as the dominant framework of enquiry and by rejecting the primacy of the state and the categorical separation of the domestic and the international. Instead, Ayers elaborates an account of democratisation through the global political economy, encompassing a trenchant critique of mainstream democracy promotion in theory and practice and opening up possibilities for different histories of democratisation, autonomous of the Western liberal and neoliberal project. This innovative work will prove useful to scholars and students in the fields of Politics, Political Economy, International Relations, Development, African Studies, History, Geography and Sociology. *Political Mobilizations and Democratization in Sub-Saharan Africa* Wolfgang Stuppert, 2019-06-14 This book explores why democratization processes in Sub-Saharan Africa have made so little progress despite more than two decades of multi-party politics on the subcontinent. By applying multiple linear regression analyses to a new data set on multi-party elections in Sub-Saharan Africa, the study investigates the relationship between political mobilizations and electoral competitiveness. It finds that the more societal groups engage in political mobilizations such as protests and strikes, the more competitive elections become. Based on these results, the author argues for a change in the policies of international democracy assistance programs. The study's findings suggest that efforts to promote democracy would likely be more successful if international donors focused their support on organizations that have active constituencies.

and are willing to use their mobilization capacity to address ruling elites with political or socio economic grievances **The Elgar Companion to Post-Conflict Transition** Hans-Joachim Giessmann, Roger Mac Ginty, Beatrix Austin, Christine Seifert, 2018-08-31 What are the main drivers of political transition and regime change And to what extent do these apparently seismic political changes result in real change These questions are the focus of this comparative study written by a mix of scholars and practitioners This state of the art volume identifies patterns in political transitions but is largely unconvinced that these transitions bring about real change to the underlying structures of society Patriarchy land tenure and economic systems often remain immune to change despite the headlines *Federalism in Africa* Aaron Tsado Gana, Samuel G. Egwu, 2003 Looking at the experiences of other federal societies across the globe this volume interrogates the problem of national integration within the context of ethno religious and cultural pluralism and presents exciting prospects for the resolution of the National Question Compelling and indispensable this work is the most comprehensive and authoritative treatment of the subject in recent years 'Democratic Knowledge' and Knowledge Production Larbi Sadiki, 2018-04-19 Sudden change in North Africa manifested through popular protests followed by the end of authoritarian regimes in Tunisia Egypt and Libya revitalised the scholarly concern with democracy in the region Democratisation and democracy received fresh attention in the Arab Spring Arab citizens displayed their grasp and possession of democratic knowledge in a bottom up groundswell of activism against the wielding of power by authoritarian regimes In this book the investigation into democratic knowledge revolves around the idea that good government must be in the first instance rooted in a local system of knowledge However no privileging of the local is offered here at the expense of the democratic Each chapter illustrates the context specific experiences which provide political actors with the wherewithal in actively learning democracy The countries examined with reference to a socially constructed democratic knowledge include Algeria Libya Morocco Tunisia and Egypt Critical focus on local agency in North Africa during the Arab Spring enables a shift from democratisation as an ideology to a democratic learning turn This book was originally published as a special issue of the Journal of North African Studies

Democratization Jean Grugel, Matthew Louis Bishop, 2013-12-04 The second edition of this popular and authoritative text provides a truly global assessment of democratization in theory and practice in the contemporary world It has been systematically revised and updated throughout to cover recent developments from the impact of 9 11 and EU enlargement to the war in Iraq Civil War and Democracy in West Africa David Harris, 2011-12-13 In the aftermath of explosive civil wars in Africa during the 1990s and 2000s the establishment of multi party elections has often been heralded by the West as signaling the culmination of the conflict and the beginning of a period of democratic rule However the outcomes of these elections are very rarely uniform with just as many countries returning to conflict as not Here David Harris uses the examples of Sierra Leone and Liberia to examine the nexus of international and domestic politics in these post conflict elections In doing so he comes to the conclusion that it is political rather than legal solutions that are more likely to enhance

any positive political change that has emerged from the violence This book is thus of significance to Western and African policy makers and also to students and scholars who wish to engage with the critical issues of conflict resolution and reconciliation both in Sierra Leone and Liberia in particular and in the wider region in general Reconstructing the Third Wave of Democracy Rita Kiki Edozie,2008-12-12 Since the 1990s trends in African politics require the realization that the public policy practice and the theoretical analysis of democracy and democratization are becoming increasingly important tenets for understanding the contemporary political science of the region Reconstructing the Third Wave of Democracy explains these new political processes and ideas Author Rita Kiki Edozie identifies factors that Africans have encountered since the foundation of the modern African state and presents a critical analysis of African politics through the lenses of post colonial discourse by uniquely employing the ideas of democratic theory to guide an analysis of the Continent s democratic development and performance Edozie presents an intra regional comparative analysis of democratic politics in Africa in ways that few books on the same subject do for the continent Her methodology for examining democracy in Africa reveals the dynamism of several country cases and several more regime experiences with democracy encountered from the post World War II period to the current post Cold War period **Globalization - The Juggernaut of the 21st Century** Jan-Erik Lane,2016-04-22 While some people debate whether globalization really exists it proceeds apace affecting all societies It presents us with unknown challenges and as governments start to discuss what to do about these challenges it is becoming obvious that globalization is not manageable With globalization the juggernaut of the 21st century all countries of the world become interdependent in relation to the coming energy crisis climate change the sharper cleavages between rich and poor countries and people and the emergence of a multicultural social structure This interesting and erudite book adopts a distinctive approach to the multiple dimensions of the globalization debate The impressive coverage of philosophical thought including Popper Weber Habermas Lipset and Hobbes makes a valuable contribution to the debates on globalization

Faith and the Fragility of Justice Meredith Whitnah,2025-04-15 South Africa has repeatedly made international headlines because of its high rates of gender based violence In the midst of a wide range of responses to the problem an important voice has been largely absent Why are the religious groups that had famously protested the racial violence of apartheid faltering in their response to gendered violence in the democracy *Faith and the Fragility of Justice* answers this question through a deep dive into the public discourse of three Protestant Christian organizations that had been adamant about a theological mandate to challenge apartheid but have varied in their responses to gender based violence in the democracy The central argument of the book is that the organizations theological convictions intersect with their posture toward various social groups to shape their actions In making this argument Meredith Whitnah demonstrates that religious beliefs are a central dimension of institutional processes that sustain or challenge social inequality and violence **Politics and Technology in the Post-Truth Era** Anna Visvizi,Miltiadis D. Lytras,2019-05-07 This book examines the relationship

between information and communication technology ICT and politics in a global perspective **New Media Influence on Social and Political Change in Africa** Olorunnisola, Anthony A., 2013-06-30 While transitioning from autocracy to democracy media in Africa has always played an important role in democratic and non democratic states focusing on politicians diplomats activists and others who work towards political transformations New Media Influence on Social and Political Change in Africa addresses the development of new mass media and communication tools and its influence on social and political change While analyzing democratic transitions and cultures with a theoretical perspective this book also presents case studies and national experiences for media new media and democracy scholars and practitioners
