Translation and Public Policy Gabriel González Núñez, Reine Meylaerts, 2017-04-21 This book brings together an ensemble of leading voices from the fields of economics language policy law political philosophy and translation studies They

come together to provide theoretical perspectives and practical case studies regarding a shared concern translation policy. Their timely perspectives and case studies allow for the problematizing and exploration of translation policy, an area that is beginning to come to the attention of scholars. This book offers the first truly interdisciplinary approach to an area of study that is still in its infancy. It thus makes a timely and necessary contribution. As the 21st century marches on, authorities are more and more confronted with the reality of multilingual societies and the monolingual state policies of yesteryear seem unable to satisfy increasing demands for more just societies. Precisely because of that, language policies of necessity must include choices about the use or non use of translation at different levels. Thus translation policy plays a prominent yet often unseen role in multilingual societies. This role is shaped by tensions and compromises that bear on the distribution of resources, choices about language, legal imperatives and notions of justice. This book aims to inform scholars and policy makers alike regarding these issues. *The Routledge Handbook of Language Policy and Planning* Michele Gazzola, François Grin, Linda Cardinal, Kathleen Heugh, 2023-09-28

The Routledge Handbook of Language Policy and Planning is a comprehensive and authoritative survey including original contributions from leading senior scholars and rising stars to provide a basis for future research in language policy and planning in international, national, regional and local contexts. The Handbook approaches language policy as public policy that can be studied through the policy cycle framework. It offers a systematic and research informed view of actual processes and methods of design, implementation and evaluation. With a substantial introduction, 38 chapters and an extensive bibliography, this Handbook is an indispensable resource for all decision makers, students and researchers of language policy and planning within linguistics and cognate disciplines such as public policy, economics, political science, sociology and education. **Digital Research Methods for Translation Studies**

Julie McDonough Dolmaya, 2023-12-22 Digital Research Methods for Translation Studies introduces digital humanities methods and tools to translation studies. This accessible book covers computer assisted approaches to data collection, data analysis and data visualization and presentation, offering authentic examples of these approaches in both translation studies research and projects from related fields. With a diverse range of examples featuring various contexts and language combinations to ensure relevance to a wide readership, this volume covers the strengths and limitations of computer assisted research methods as well as the ethical challenges specific to this kind of research. This is an essential text for advanced undergraduate and graduate translation studies students as well as researchers looking to adopt new research methods.

Translation Revisited Mamadou Diawara, Elísio S. Macamo, Jean-Bernard Ouédraogo, 2019-01-17 How realistic is it to expect translation to render the world intelligible in a context shaped by different historical trajectories and experiences? Can we rely on human universals to translate through the unique and specific webs of meaning that languages represent? If knowledge production is a kind of translation, then it is fair to assume that the possibility of translation has largely rested on the idea that Western experience is the repository of these human universals against the background of which different

human experiences can be rendered intelligible The problem with this assumption however is that there are limits to Western claims to universalism mainly because these claims were at the service of the desire to justify imperial expansion This book addresses issues arising from these claims to universalism in the process of producing knowledge about diverse African social realities It shows that the idea of knowledge production as translation can be usefully deployed to inquire into how knowledge of Africa translates into an imperial attempt at changing local norms institutions and spiritual values Translation in this sense is the normalization of meanings issuing from a local historical experience claiming to be universal The task of producing knowledge of African social realities cannot be adequately addressed without a prior critical engagement with how translation has come to shape our ways of rendering Africa intelligible

Indigenous Cultural Translation Darryl Sterk,2020-05-01 Indigenous Cultural Translation is about the process that made it possible to film the 2011 Taiwanese blockbuster *Seediq Bale* in Seediq an endangered indigenous language *Seediq Bale* celebrates the headhunters who rebelled against or collaborated with the Japanese colonizers at or around a hill station called Musha starting on October 27 1930 while this book celebrates the grandchildren of headhunters rebels and collaborators who translated the Mandarin language screenplay into Seediq in central Taiwan nearly eighty years later As a thick description of *Seediq Bale* this book describes the translation process in detail showing how the screenwriter included Mandarin translations of Seediq texts recorded during the Japanese era in his screenplay and then how the Seediq translators backtranslated these texts into Seediq changing them significantly It argues that the translators made significant

changes to these texts according to the consensus about traditional Seediq culture they have been building in modern Taiwan and that this same consensus informs the interpretation of the Musha Incident and of Seediq culture that they articulated in their Mandarin Seediq translation of the screenplay as a whole The argument more generally is that in building cultural consensus indigenous peoples like the Seediq are translating their traditions into alternative modernities in settler states around the world
