Mathematics in the K-8 Classroom and Library Sueanne McKinney, KaaVonia Hinton, 2010-05-11 Two experts on education offer a rich and diverse selection of children's literature and teaching strategies for the K-8 mathematics classroom. Taking advantage of quality motivating literature during mathematics instruction pays off especially when teachers and media specialists work together to convey crucial mathematical concepts and standards. *Mathematics in the K-8 Classroom and Library* shows you how it's done. After an introduction to the National Council of Teachers of Mathematics's NCTM Principles and Process Standards, each remaining chapter is devoted to an NCTM content standard. The book offers engaging research-based strategies and booklists of specific titles that together can be used to increase student achievement. The strategies suggested here provide a hands-on, student-centered focus that allows students to make connections with prior learning, personal experiences, and good books. Both the recommended children's books and the activities will appeal even to reluctant readers and students for whom mathematics might be a challenge. Each chapter includes an extensive annotated list of texts, dozens of hands-on activities, handouts, and writing prompts.

Going Lobstering Jerry Pallotta, 2016-08-09 One beautiful day at the beach, Linda and Erik see a lobsterman pulling up traps. Linda and Erik are curious about how he catches lobsters. They ask their father about it, and he takes them down to the pier to meet his friend Big Joe, the lobsterman. Big Joe invites them to come along with him for the day to find out all about it. Join Linda and Erik on their first lobstering expedition. It is an exciting and informative adventure at sea where they learn about the age-old trade of lobstering and encounter a variety of sea life, including an uninvited shark.
