Integral Green Slovenia Darja Piciga,Alexander Schieffer,Ronnie Lessem,2016-06-03 Ronnie Lessem and Alexander Schieffer s Integral Green Society and Economy series has three overarching aims The first is to link together two major movements of our time one philosophical the other practical The philosophical movement is towards what many today are calling an integral age while the practical is the green movement duly aligned with that of sustainable development The second is to blend together elements of nature and community culture and spirituality science and technology politics and economics thus serving to bring about an integral green vision albeit with a focus on business and economics As such the authors transcend the limitations to sustainable development and environmental economics which are overly ecological if not also technological in orientation and exclude social and cultural elements Thirdly this particular volume with Darja Piciga focuses specifically on Slovenia as well as on Europe generally drawing on the particular issues and capacities that this country and continent represents particularly for sustainable development and social knowledge based economy The emphasis on Slovenia arose not only because it lies at the heart of Europe but because a specific movement for an Integral Green Slovenian Society and Economy has been co evolved there by the three editors in conjunction with Slovene organisations communities and movements with a view to integrating existing and emerging knowledge resources initiatives and practices into a model as an alternative to austerity for Slovenia and other European countries In The Name of a Traitor 2 ZHANG RAN, This is a world of dualities where an astrologer apprentice burdened by the prophecy of Seglais

struggles through chaos to find the trajectory of the world machine's gears. Meanwhile revolutionaries with ultimate dreams fight their way through the intangible web woven by quantum computers. As their personalities draw closer, secrets buried deep within the genesis core of quantum computing begin to surface, leading to unprecedented changes in both worlds. No harems, no stallions, no time travel, no cockroaches. This is a literary feast crafted by an author who writes with heart for readers who read with intent. Reading is not fast food; please take your time to experience these two real worlds. You might not grasp everything in the first few chapters, but don't worry; keep going, and the story will gradually become clear.

No Small Change Anthony Thomson, Lucian Camp, 2018-05-29. A 13-point manifesto for a new financial services marketing model. Anthony Thomson knows a thing or two about new and disruptive financial services; having co-founded and chaired first the ground-breaking Metro Bank and then the purely digital app-based Atom Bank. And as a financial services marketing specialist for over 30 years, Lucian Camp has helped develop more new and innovative financial services propositions than anyone. Now they've put their heads together to write *No Small Change*, a passionate, opinionated, and practical manifesto arguing that the fast-changing financial services world urgently needs to rethink the whole of its approach to marketing. Most of all, they propose that an increasingly digital, fintech-driven industry needs not just more marketing, but also better marketing, to make sure it's successfully identifying consumers' real needs and finding powerful and successful ways to engage with them. After detailing the forces of change that demand a new approach, the book then examines in 13 chapters what the key components of that new approach should look like. It takes a broad and multi-faceted perspective, exploring areas as diverse as the crisis of consumer trust, the ever-growing power of Big Data, the importance of leadership and corporate culture, and the rapid advance in thinking based on Behavioural Economics. In developing these themes, the authors don't pull their punches. The book is fiercely critical of some of the industry's long-established marketing habits, providing compelling reasons why it's time to abandon the practices that have given it a bad name. Marketers will applaud, but the book is also intended for a broader audience. Thomson and Camp challenge senior management in financial firms to appreciate the real value that marketers can bring to shaping the business agenda at the highest level, and not just to label marketing with that tired old phrase, 'the colouring in department'. Rich in anecdotes, comments from leading industry figures, personal experiences on the part of both authors, and findings from original research, *No Small Change* is an entertaining and rewarding read, and at this point in the development of financial services, a timely and important one.
