The Healing Enigma Robert Jaggs-Fowler, 2018-11-20 The concept of the physician priest is an ancient one existing pre Christianity and historic references to the role can be found within the majority of religions and across all continents However despite a growing body of scientific evidence indicating the value of spirituality the 20th century medical profession within the Western world has placed religion at arm's length effectively excluding such discussion from the medical consultation Referring to both primary and secondary sources within theological medical legal historic and philosophical literature Robert puts forward an argument in support of a 21st century role for the physician priest He argues that if the physician can exercise the role of priest in addition to their medical role they can thereby truly minister to the whole person in terms of mind body and soul With consideration of modern NHS funding streams Robert suggests a radical proposal whereby the Church of England and medical educational institutions might combine to offer dual theological and medical training The result would establish a new breed of professional person ideally positioned in respect to the care of the elderly and those with terminal illness *The Healing Enigma* suggests that this not only assists with the provision of whole person care but also allows the Church to firmly re-establish itself in the 21st century within its Christian healing tradition
