

VARIOUS INFORMATION SYSTEM USED IN SBI BANK AND ITS FUNCTIONALITY

Banks usually use core banking software products(CBS) that process daily banking transactions like deposits, withdrawals, account opening, loans, etc. SBI doesn't use an ERP but uses a core banking product called Bancs implemented by TCS. State Bank of India (SBI) selected TCS BaNCs to customize the software, implement the new core system and provide ongoing operational support for its centralized information technology.

The implementation of the Core Banking solution from TCS BaNCs at SBI and its affiliate banks represents the largest centralized core system implementation ever undertaken. The overall effort included the conversion of approximately 140 million accounts held at 14,600 domestic branches of SBI and its affiliated banks.

New Digital Payment System

Making digital payment services easily accessible to government employees through Employees' State Insurance Corporation (ESIC), the State Bank of India (SBI) has inked a Memorandum of Understanding (MoU) with ESIC for electronic payment-related services to all beneficiaries.

The move is likely to reduce time lags in digital payments in a secure mode. According to the agreement, SBI will provide e-payment services directly to bank accounts of all ESIC beneficiaries and payees without any manual intervention as an integrated and automated process. It will thus make SBI provide e-payment integration with the Enterprise Resource Planning (ERP) processes of ESIC through its Cash Management Product (CMP) e-payment technology platform.

The e-payment integration would affect statutory benefit payments to ESIC beneficiaries as well as other payees with easy and timely transactions that will help in eliminating mistakes and errors caused by repetitive and manual data entries.

The e-payment services by SBI acts as a payment aggregator that facilitates online payments of government dues by the customers of any public/ private sector banks by using the payment gateway of SBI.

Handbook of Research on Strategic Business Infrastructure Development and Contemporary Issues in Finance Ray, Nilanjan, Chakraborty, Kaushik, 2014-02-28 The dynamic economic climate invites participants who are grounded in strategic financial management and infrastructure development. Thus a lack of sufficient infrastructure in both quality and quantity often disqualifies developing countries from being key players in the global economy and influences other socioeconomic problems like unemployment, quality of work life and quality of life. Handbook of Research on Strategic Business Infrastructure Development and Contemporary Issues in Finance discusses the efficiency of good infrastructure and its impact on socioeconomic growth and socioeconomic development in general and addresses contemporary aspects of the strategic financial management essential for accomplishing the objective of wealth maximization in today's challenging and competitive economy. This book is an essential research work for policy makers, government workers and NGO employees as well as academicians and researchers in the fields of business, finance, marketing, management, accounting, MIS, public administration, economics and law.

Handbook of Marketing Decision Models Berend Wierenga, 2008-09-05 Marketing models is a core component of the marketing discipline. The recent developments in marketing models have been incredibly fast with information technology, e.g. the Internet, online marketing, e-commerce and customer relationship management (CRM) creating radical changes in the way companies interact with their customers. This has created completely new breeds of marketing models but major progress has also taken place in existing types of marketing models. Handbook of Marketing Decision Models presents the state of the art in marketing decision models. The book deals with new modeling areas such as customer relationship management, customer value and online marketing as well as recent developments in other advertising, sales, promotions, sales management and competition. New developments are in consumer decision models, models for return on marketing, marketing management support systems and in special techniques such as time series and neural nets.
