Krijger,2019-09-16 In *The Eclipse of Liberal Protestantism in the Netherlands* Tom Eric Krijger is the first to offer a synthesis of the development of the Protestant modernist movement in Dutch religious social cultural and political life between 1870 and 1940 In historiography the liberal Protestant community is said to have lost appeal and influence in these decades due to a lack of theological clarity inner harmony and organisation Analysing liberal Protestants self perception vis vis Christian orthodoxy self understanding as a faith community attitude towards other alternatives to orthodoxy class consciousness literary criticism political commitment and involvement with foreign mission Krijger challenges this view Making an international comparison he argues that the Dutch modernist movement failed to make headway primarily due to liberal Protestant expectations and discourse

Modernising Protestantism Jo Spaans,2025-10-01 This book provides a thorough revision of the image of the public church under the Dutch Republic after the Peace of Westphalia and before the onset of the high Enlightenment Traditional church history considers the seventeenth and eighteenth centuries a period of decline Yet this was the high tide of Dutch expansion when Dutch society was extremely rich In its five universities and its highly literate population internationally acknowledged scholarship arts and sciences flowered Did really nothing of all this vitality rub off on the public religion Rather than the traditional static image of a rather joyless and ossified orthodoxy an exploration of the interface between the Reformed church and Dutch society at large reveals a religious culture that had much to offer to various audiences in the sphere of knowledge production as well as in the form of spiritual solace and everything in between
