Bille,2014 This study used grounded theory methodology to capture and describe the experience of value stream mapping workshop participants Value stream mapping is a methodology used in quality improvement and Lean transformation projects to analyze and improve a process On the basis of the research the author proposes a model

describing the participants experience a Leadership demonstrated through communications commitment of resources and nurturing a supportive culture is vitally important from inception through the completion of value stream mapping b In a team environment c an intense interaction communications and knowledge sharing among participants creates a learning process that shifts participants focus from working in the process to working on the process d This shift of focus re frames participants understanding of the process providing participants a global understanding gestalt of the process which is carried into the creation of the future state Participants are cognizant of how change affects everyone s work e Psychological ownership arises as participants develop a new future state As this ownership grows motivation increases as the participants realize their goal of a new future state process The author concludes that value stream mapping is a transformational methodology that engages people amplifying their knowledge about the process they examine As participants create a new future state their motivation morale and performance are all enhanced while achieving the goals of the organization The author proposed a model directions for future research and practical managerial implications VSM TRAINING PACKAGE. ENNA.,2017 **Untangling with Value Stream Mapping** Ovidiu Contras,2022-04-05 The standard belief in books about Lean initiatives and value stream mapping VSM is that VSM works well on transactional processes which are primarily linear processes where handoffs are well defined and the outcome is known and it is useful for repetitive projects or products This book counters these statements by clearly demonstrating how a VSM exercise can be successfully performed in complex multifunctional environments involving nonrepetitive work such as aircraft new product development custom engineering software development and project management The methodology described in this book is the result of more than ten years of refinement and is based on practice while working with multidisciplinary teams and helping them achieve their goals This is a novel approach to capturing the information flow in a VSM by recognizing it as the place where most of the issues are generated especially for the previously mentioned environments and the fact that classical mapping methodologies including classical VSM do not capture it well The VSM methodology that the author developed goes to the essence of a VSM activities flow information flow timeline uses conventional VSM icons and some custom information flow icons and helps the following Quantifying waste VSM literature gap Making disconnects visible VSM literature gap Making behavioral and cultural patterns visible VSM literature gap If the steps are followed thoroughly then lead time reductions ranging from 60% to 88% are achieved along with increased availability of resources more output with the same resources projects delivered on time and most importantly colleagues embracing the Lean mindset which greatly contributes to maintaining the gains Essentially this book helps readers perform a VSM in environments where multiple stakeholders interact with each other to deliver a product or a service with unclear aspects such as what the product service is how all involved can contribute to the product or service transformation and how the interactions between them occur For example the products services targeted in this book include test results analysis results a custom design a process a methodology an engineering change integrated

enterprise software and engineering drawings Concurrently this book helps readers map behavioral patterns such as micromanagement and company culture aspects such as excessive governance and decisions by committee **VSM OFFICE WORKFLOW** ENNA.,2017 The Value Stream Mapping Facilitator Guide provides the structure needed to help guide the Facilitator through the VSM Office process It is designed to let you communicate and lead the process of developing your Current and Future State Maps This allows you to perform your workshops with confidence and lead change internally
