Handbook of Personal Security Patrick J. Carroll, Robert M. Arkin, Aaron L. Wichman, 2015-04-24 The issue of psychological security within an increasingly unstable interconnected world has become a defining challenge of modern individual and cultural life The terror attacks of September 11 2001 and the global financial crisis that unfolded in 2008 have intensified a sense of global and personal insecurity This concern with psychological insecurity is reflected in contemporary culture politics the business world consumer behavior the arts and other areas Within this context the psychological sciences have kept pace vigorously investigating these issues This handbook features the latest theory and research examining cognitive emotional and behavioral responses to security threats It expands the conceptual focus from specific security threats to the broader range of antecedents processes and consequences of psychological security insecurity The chapters are organized into four content areas personal security in individual contexts personal security in interpersonal contexts

personal security with cultural and health contexts and interdisciplinary analyses of personal security They represent a new and vibrant area of research unified by the common goal of understanding the factors that shape a sense of personal security Together these provocative chapters provide specific starting points that will shape future theory policy and practice on this dominant social issue of the 21st Century and more importantly offer opportunities to connect social and personality psychology to its scientific kin

Free Spirit Sundance Burke, 2008-02 Free Spirit speaks as freedom which is our Consciousness the sweet essence of our lives The freedom spoken here is an inner knowing We cannot realize this liberation by catering to our bodies emotions or minds No this freedom is spiritual an altitude of perception that only arises when we are lighter than our surroundings We can realize this lightness of being if we are willing to abide as Awareness and let go of the ego the one who suffers mind For this enlightenment to happen a quiet mind is all we need Why do anything for this when only our stillness will suffice Be silent be still be free Within this book you will find answered and unanswered questions humor poetic prose experimentation with consciousness and passages that illuminate the sense that we are more than our thoughts emotions senses body and energy Every word is sourced by the power of silent Truth Without contradicting this source the writing inspires our active participation in the realization of Spirit as only our direct experience is of value to this awakening For those of us who desire to be free the author takes us by the hand and walks with us through the entire landscape of the egoic mind until we reach its outer boundary Here we are invited to take a leap of Self faith into simply being who we are right now

The Rhetoric of Emotions Robert Perinbanayagam, 2017-07-05 Kenneth Burke founder of the critical method of dramatism believed that motives and attitudes are constantly generated by individuals as they encounter social situations and material objects in the course of their everyday lives In The Rhetoric of Emotions Robert Perinbanayagam proposes that by analysing individuals experiences especially through their interaction with creative outlets we can come to a deeper understanding of how the human mind systematically approaches the emotive process The author maintains that individuals use spoken language and all other forms of symbolism including art and literature to elicit social cooperation and emotional understanding both in regard to the world around them and within themselves Rhetoric and culture are mechanisms for managing values behaviour and emotions In order to ground this philosophical viewpoint Perinbanayagam strategically discusses famous novels and paintings to show how individuals construct emotional responses to the rhetorical objects at their disposal In addition to the ideas of Burke and George Herbert Mead the ideas of Max Weber Georg Simmel Charles Sanders Peirce Edmund Husserl Alfred Schutz and Erving Goffman are also reflected in this provocative analysis
