Transformative Power of Education , 2019-12-09 The transformative power of education is widely recognised Yet harnessing the transformative power of education is complex for exactly those people and communities who would benefit the most Much scholarship is available describing the ways in which educational access opportunity and outcomes are unequally distributed and much scholarship is dedicated to analysing and critiquing the problems of education This volume gratefully builds on such analysis to take a more constructive stance examining how to better enable education to fulfil its promise of transforming lives Harnessing the Transformative Power of Education returns overall to a broader language of educational change rather than reduce our sense of scale and scope of transformation to what might be measured in or by schools It offers a series of practical local but system wide and socially responsible practices policies and analyses to support the ways that education can work at its best The projects described here vary in scale and scope but are rooted in a wider sense of community and social responsibility so that education is considered as a necessary sustainable process to ensure productive futures for all Its contributors include not only scholars but also professional experts and young people The book s aim is to share and advance authentic possibilities for enabling all children and young people to flourish through the transformative power of education **The Self-Transforming School** Brian J. Caldwell, Jim M. Spinks, 2013-07-18 The Self

Transforming School combines an insightful meta analysis of factors contributing to the success of schools and an examination of powerful mega trends that are shaping developments in education to offer the first mega analysis in education policy and practice The book spans fifty years beginning with Caldwell and Spinks ground breaking work The Self Managing School which advocated innovative approaches that are now accepted as preferred practice before offering a prognosis and plan for the future The book argues that all schools in all settings can secure success for all students in an era where society and the economy are changing constantly and dramatically Although schools find some support in local and global networks externally designed re structuring re staffing or command and control direction isn t sufficient to achieve transformation Instead of replicating particular approaches to achieve modest improvement leadership of the highest quality needs to be deeply embedded in schools and their systems Caldwell and Spinks propose three important points that need to be taken into

consideration schools are often at different stages of self transformation self transformation requires a high level of professionalism and must include teacher education and on going professional development funding is critically important and efforts to build a capacity for self transformation are constrained by what is available The book gives particular attention to developments in Australia Brazil Canada England Finland Hong Kong India New Zealand Shanghai Singapore and the United States It will be of key interest to school leaders policy makers and academics and postgraduate students engaged in research on equity student performance in highly disadvantaged settings and education policy
