Treasure Hunt Inside The Mind Of The New Consumer:

Treasure Hunt Michael Silverstein, Michael J. Silverstein, John Butman, 2006 In his acclaimed bestseller *Trading Up* Silverstein examined why people choose to pay a premium for luxury goods and services that they passionately care about like cars and kitchens Here in *Treasure Hunt* he looks at the equally important countertrend how middle income consumers have gotten better at finding cheap products in some categories to free up cash to trade up in other categories Some companies thrive by playing to either the high or low end while others get trapped in the middle This guide shows how to avoid being the mediocre middle **Treasure Hunt**, 2006 A guide for companies on how to better understand their customers explains how today's middle income consumers are more able and eager to obtain new luxury goods by making informed financial compromises elsewhere in a guide that cites the successful marketing practices of top corporations

Treasure Hunt Michael J. Silverstein, John Butman, 2006-05-04 The essential follow up to the BusinessWeek bestseller *Trading Up* A BMW in a Costco parking lot A working class family with a 50 inch plasma TV What's going on in the mind of the new consumer Today's consumers can seem impossible to understand and even harder to please For instance the average mall shopper will spend about 100 then leave when she hits that limit She'll probably buy shoes rather than clothing because she doesn't want to think about her dress size And the store most likely to get her money isn't the one with the nicest display or the deepest discounts it's the one closest to her parking spot In his consulting with dozens of leading companies Michael J Silverstein has interviewed thousands of customers extracting fascinating patterns about what really drives their purchase decisions His first book the acclaimed bestseller *Trading Up* has taught a generation of marketers about the new luxury phenomenon and why consumers will happily pay a steep premium for goods and services that are emotionally satisfying from golf clubs to bathroom fixtures to beauty products But *Trading Up* revealed only part of the story of the new consumer The same middle class people who are happily trading up at Victoria's Secret and Panera are going on treasure hunts at Costco and Home Depot And they are often getting as much emotional satisfaction in the discount stores as in the luxury stores TREASURE HUNT shows how even the most mundane shopping for things like paper towels and pet food has become an adventure rather than a tedious chore In just about every category both the high end and the low end are growing and innovation rich Many middle class consumers gladly spend 5 a day for a Starbucks venti latte others spend forty cents a day on home brewed coffee feel good about their frugality and save up the difference to buy Apple's newest Nano TREASURE HUNT explains the success of companies as diverse as Dollar General H E Butt eBay Commerce Bank and Tchibo But beware in our bifurcated global market businesses need a clear strategy for aiming high or low while avoiding the treacherous middle where so many have recently stumbled If your offering isn't exciting enough to inspire trading up but not enough of a bargain to satisfy the treasure hunters you'll have no emotional connection with your target audience And then as many fallen companies have discovered your tried and true marketing strategies will go into a severe stall TREASURE

HUNT takes us into the homes of real people making real decisions and into the CEO s offices of innovative companies finding new ways to accommodate them Written with the same flair empathy and intelligence that made *Trading Up* an instant classic this is an essential guide to the moods and habits of the constantly changing consumer Treasure Hunt,2010 *Own the Future* Michael S. The Strategy Paradox Michael E. Raynor, 2007-02-20

A compelling vision Bold leadership Decisive action Unfortunately these prerequisites of success are almost always the ingredients of failure too In fact most managers seeking to maximize their chances for glory are often unwittingly setting themselves up for ruin The sad truth is that most companies have left their futures almost entirely to chance and don t even realize it The reason Managers feel they must make choices with far reaching consequences today but must base those choices on assumptions about a future they cannot predict It is this collision between commitment and uncertainty that creates THE STRATEGY PARADOX This paradox sets up a ubiquitous but little understood tradeoff Because managers feel they must base their strategies on assumptions about an unknown future the more ambitious of them hope their guesses will be right or that they can somehow adapt to the turbulence that will arise In fact only a small number of lucky daredevils prosper while many more unfortunate but no less capable managers find themselves at the helms of sinking ships Realizing this even if only intuitively most managers shy away from the bold commitments that success seems to demand choosing instead timid unremarkable strategies sacrificing any chance at greatness for a better chance at mere survival Michael E Raynor coauthor of the bestselling *The Innovator s Solution* explains how leaders can break this tradeoff and achieve results historically reserved for the fortunate few even as they reduce the risks they must accept in the pursuit of success In the cutthroat world of competitive strategy this is as close as you can come to getting something for nothing Drawing on leading edge scholarship and extensive original research Raynor s revolutionary principle of Requisite Uncertainty yields a clutch of critical counter intuitive findings Among them The Board should not evaluate the CEO based on the company s performance but instead on the firm s strategic risk profile The CEO should not drive results but manage uncertainty Business unit leaders should not focus on execution but on making strategic choices Line managers should not worry about strategic risk but devote themselves to delivering on commitments With detailed case studies of success and failure at Sony Microsoft Vivendi Universal Johnson Johnson AT T and other major companies in industries from financial services to energy Raynor presents a concrete framework for strategic action that allows companies to seize today s opportunities while simultaneously preparing for tomorrow s promise

Valdani, A. Arbore, 2012-11-30 This book proposes a new framework to effectively manage both offensive and defensive marketing strategies It reinterprets the competitive challenge as a circular journey that is an endless sequence of three competitive seasons The authors call them the games of movement imitation and position **The Writing on the Wall** Will Hutton, 2006-11-14 This controversial book suggests and urges that America must help China become a superpower in order to guarantee its own financial success and possibly even world peace **Debating Authenticity** Thomas Fillitz, A. Jamie Saris, 2012-12-01 The longing for authenticity on an individual or collective level connects the search for external expressions to internal orientations What is largely referred to as production of authenticity is a reformulation of cultural values and norms within the ongoing process of modernity impacted by globalization and contemporary transnational cultural flows This collection interrogates the notion of authenticity from an anthropological point of view and considers authenticity in terms of how meaning is produced in and through discourses about authenticity Incorporating case studies from four continents the topics reach from art and colonialism to exoticism primitivism film ritual and wilderness Some contributors emphasise the dichotomy between the academic use of the term and the one deployed in public spaces and political projects All however consider authenticity as something that can only be understood ethnographically and not as a simple characteristic or category used to distinguish some behaviors experiences or material things from other less authentic versions Commoditization and the Strategic Response Andrew Holmes, 2016-05-23 Organizations and those who work within them are under attack from the increasingly pervasive impacts of commoditization With little to distinguish one company's products and services from another or one person's skills and capabilities from the next organizations and workers alike are finding themselves trapped in the me too hell of commoditization For many this means the survival of the cheapest as price becomes the principal basis for decision making For others it requires them to think creatively to avoid the trap of commoditization even though this may only provide a temporary respite In this groundbreaking book Andrew Holmes sets out why commoditization represents such a clear and present danger to every corporation and all white collar workers Starting with the nature of the commodities we are familiar

with such as coal and cotton Holmes moves on to describe how commoditization is affecting entire industries and is increasingly touching the work of the professional classes The evidence is both fascinating and compelling and it is clear that the impacts of commoditization are far reaching The author also outlines the impact of commoditization on an organization s strategy towards brand supply chain value chain innovation pricing and competition He explores the implications for skills attitudes and behaviours in the workplace before describing a series of strategies for avoiding the risk and exploiting the opportunities offered by a new commoditized world such as outsourcing innovation offshoring mergers and acquisitions divestments and first mover advantage Holmes offers organizations and white collar workers a range of strategic responses which can be used to combat its worst impacts And as commoditization continues to make inroads into the corporate and working worlds this book will be an invaluable companion to addressing the challenges which it presents *Library Journal*
