Understanding Leadership Perspectives Matthew R. Fairholm, Gilbert W. Fairholm, 2009-04-05 Indeed we do not easily move out of one mind set into another What we believe to be true given our particular experience often seems to be the only truth Often we need some outside force to trigger reevaluation and rethinking That triggering force to intellectual growth may be a new idea a new situation a new value a new boss or some other significant emotional event maybe even a new book The Research Foundation This book is founded on two pillars one a model of five leadership mind sets common in the last 100 years first presented in Gilbert W Fairholm's 1998a 1998b book Perspectives on Leadership From the Science of Management to its Spiritual Heart and two Matthew R Fairholm's 2002 dissertation Conceiving Leadership Exploring Five Perspectives of Leadership by Investigating the Conceptions and Experiences of Selected Metropolitan Washington Area Municipal Managers which analyzed and validated the perspectives model see the Appendix for more details The data collected confirm there are five distinct perspectives of leadership evident in the 100 year history of leadership study and practice The resulting model defines the five perspectives in terms of descriptions of leadership in action leadership tools and behaviors and the way leaders approach their relationship to followers The five perspectives are related hierarchically so that they progressively encompass a unique perspective of the leadership phenomenon

Understanding Leadership Robert M McManus, Gamaliel Perruci, 2015-04-10 Lao Tzu Marx the Buddha Ibsen Machiavelli these are just a few of the world's great thinkers who have weighed in on the subject of leadership over the centuries Yet the contemporary student of leadership often overlooks many of these names in favour of more recent theorists hailing from the social sciences Understanding Leadership An Arts and Humanities Perspective takes a different angle employing the works of the great philosophers authors and artists found in world civilization and presenting an arts and humanities perspective on the study of leadership The authors build their conceptual framework using The Five Components of Leadership Model which recognizes the leader the followers the goal the environmental context and the cultural values and norms that make up the leadership process Supporting the text are a wealth of case studies which reflect on works such as Ayn Rand's novella Anthem Eugène Delacroix's painting Liberty Leading the People Charlie Chaplin's film Modern Times Athol Fugard's play Master Harold and the Boys Lao Tzu's poetic work Tao Te Ching and Antonín Dvořák's New World Symphony The authors also introduce studies from various world cultures to particularly illustrate the role cultural values and norms play in leadership This illuminating framework promotes the multidimensional thinking that is necessary for understanding and problem solving in a complex world Understanding Leadership An Arts and Humanities Perspective will be a valuable textbook for both

undergraduate and postgraduate leadership students while leadership professionals will also appreciate the book's unique liberal arts and cultural approach

Understanding Leadership Libby Nicholas, John West-Burnham, 2016-05-23

Are current leadership roles and relationships appropriate in a rapidly changing world? Do we need to rethink key assumptions about leaders and leadership? Are you confident about the appropriateness and effectiveness of your chosen leadership styles and behaviours? These are questions facing leaders today and *Understanding Leadership* by Libby Nicholas and John West-Burnham can help find the answers with an approach that is neither normative nor prescriptive but rather exploratory and developmental. Applying research and case studies from inside and outside the educational canon, Libby and John challenge prevailing orthodoxies and invite readers to reflect on their personal understanding as the basis for translating theory into practice. All leadership behaviour is based on a number of fundamental personal assumptions about the nature of human relationships and the basis on which human organisations function. *Understanding Leadership* helps leaders make their implicit understanding explicit and so informs and aids development of professional practice. Effective leaders develop and grow by understanding their personal mindspace, the mental map with which they make sense of the world and developing it through reflecting, exploring, testing and questioning. The usefulness of any map is determined partly by its scale and partly by the information it depicts. As leaders develop so their personal mental maps become more sophisticated and more detailed. The purpose of this book is to help leaders understand and refine their maps through reflective self-awareness, facilitating the journey to understanding leadership. Leadership is fundamentally concerned with the complexity of human relationships, performance, engagement and motivation; leadership has to be seen as relational. Leadership involves emotional engagement and sophisticated interpersonal relationships. The idea of a hero leader, single-handedly transforming a school, is perhaps not a particularly useful or relevant vision of effective leadership for today. Libby and John encourage leaders to arrive at their own working definition of effective leadership and analyse how the myriad of carefully examined models and case studies might apply in their own school context. The eight chapters are underpinned by the following themes: questions and points of reflection; why leadership; creating a preferred future; leading change; leadership as a moral activity; learning as the core purpose of school leadership; leading through collaboration and cooperation; building capacity; sharing leadership; leading through relationships and leadership; and personal resilience. High performance, effective leadership can be truly transformational. Leadership cannot be taught; it has to be learnt. It could be argued that school leadership is primarily concerned with learning: the leader's own and facilitating that of the children. Questioning, interrogating and analysing ideas and practice are fundamental to that learning process. Libby Nicholas and John West-Burnham prompt leaders to do just that. Suitable for school leaders at all levels: head teachers, principals, assistant and deputy heads, middle leaders aspiring to senior roles and in all educational settings. The book will also be of interest to education system leaders, chief education officers and directors of education and indeed anyone concerned with developing effective school leadership, for example governors and

Understanding Leadership in Complex Systems Terje Andreas Tonsberg, Jeffrey Shawn Henderson, 2016-07-20 This work proposes that Carl Menger's Subjective Theory of Value STV and its subsequent elaboration by Ludwig von Mises as Praxeology provides a useful alternative to more common methods in the study of action and social phenomena and more specifically to leadership in complex social systems Rather than being based on rationality assumptions and algorithmic predictability the STV emphasizes transient subjectivity shaped by a complex world of lacking information mistakes disequilibrium uncertainty and attempted error correction that defy mathematization and exact prediction As such it is a framework to make sense of human action systems in terms of subjective understanding learning and uncertainty rather than quantitative predictability Accordingly the aim of this work is to explain the STV as a general theory of action and to demonstrate its capability in developing adequate qualitative theory and to elaborate on some of the major topics that its implications raise with regard to leadership The power of the method can be seen in that its procedure naturally branches out to facilitate an understanding of a broad selection of processes and may provide the basis for a universal theory of leadership
