University Adaptation In Difficult Economic Times International Policy Exchange:

University Adaptation in Difficult Economic Times Paola Mattei, 2014-04-02 Financial sustainability is one of the key challenges confronting Europe's universities today. Despite the fact that universities are at the centre of knowledge creation and development which itself is seen as one of the main engines of economic growth, public funding of higher education in most countries is not increasing or at least not increasing enough in real terms. Democratisation of higher education has led to the fact that the higher education budgets per student are relatively low in most European countries compared to Europe's competitors. Despite declarations of intent to increase spending on higher education and research, it is not very likely that public expenditure will grow significantly on average in Europe and therefore be able to keep up with rapidly inflating costs in the years to come. One of the reasons for this is that higher education and research have to compete with other priorities in public budgets, e.g. security, health, etc. Furthermore, the recent economic downturn has contributed to the decision in many European countries to decrease the levels of investment in higher education and research. Such trends are particularly worrisome for universities across Europe whose continuing dependence on public funding puts their future sustainability under pressure. New funding schemes and incentives have been discussed and introduced in many European higher education systems, including competitive funding schemes for research under the name of excellence policies. Despite the different national institutional configurations in Europe, higher education systems face similar demands of promoting sustainable funding models, maintaining high academic standards and equality. Thus, financial sustainability is not an end in itself; it aims to ensure that the public university's goals are reached by guaranteeing that the institution produces sufficient income to enable it to invest in high quality education and produce equitable outcomes. For these reasons, this book analyses funding reforms from a multidimensional approach.

Social Exclusion in Cross National Perspective Robert J. Chaskin, Bong Joo Lee, Surinder Jaswal, 2019 The concept of social exclusion has been widely adopted to describe the conditions of economic, social, political, and/or cultural marginalization experienced by particular groups of people due to extreme poverty, discrimination, dislocation, and disenfranchisement. *Social Exclusion in Cross National Perspective* examines the impacts of social exclusion on disadvantaged populations across four countries: China, India, South Korea, and the United States, and provides a rich account of the interplay between globalization and social exclusion, as well as how policies and social action respond to it.

The "Population Problem" in Pacific Asia Stuart Gietel-Basten, 2019-06-07 Despite the twenty-first century's often being referred to as the Asian Century, indicating hope for economic growth and the rebalancing of the global order, population aging and stagnation present an existential threat to the success of China and other territories of Pacific Asia, namely Japan, Taiwan, Hong Kong, Singapore, and South Korea. This book argues that the population problem, rooted in low fertility, has thus far been largely considered in a linear way: low fertility leads to population stagnation and rapid aging, so fixing low fertility should correct the problem. However, a multi-dimensional lens is essential to appreciating

the scale and nature of the issue and indeed to determining whether it is an issue at all Stuart Gietel Basten examines how the issue of low fertility has been constructed how blame has been apportioned and why policies designed to tackle it have yielded few results Drawing on an array of primary and secondary sources as well as examples from scholarly and popular literature *The Population Problem in Pacific Asia* takes a comparative approach to fertility in the region and locates mainland China in its regional context It serves as a useful resource for government workers stakeholders and students and scholars in sociology demography geography economics and area studies *The Korean Welfare State* Kyungbae Chung,Neil

Gilbert,2024 This book examines the evolution of the Korean welfare state over the last several decades and the challenges it currently faces as a rapidly aging society Since the turn of the 21st century the Korean welfare state along with the economy has rapidly matured increasing both the scope of social welfare coverage and the fiscal capacity to pay for these benefits

Privatization in and of Public Education Antonina Santalova,Kaire Pöder,2024 This book explains how education is becoming more privatized around the world to fit local economic and political needs Privatization in and of Public Education categorizes different types of privatization as traditional or non traditional Traditional policies give more rights to private companies to provide education while non traditional policies make public schools more like businesses The authors show that privatization can lead to more efficient schooling but it can also create a trade off between efficiency and equity or inclusion The book presents a range of perspectives on the impact of privatization including structural ethical and subjective effects The book also covers a range of countries and regions including both developed and developing countries This helps readers understand how privatization is playing out in different contexts around the world *Beyond Market Meritocracy*

Haijing Dai,2025-11-10 This book examines the views and practices of employers in varied industries and establishments in Chinese societies where family care responsibilities are highly appreciated as moral virtues in the traditional culture while market neo liberalism and modern labor and family welfare systems have taken different hold of different localities and sectors Through mixed methods data and the lens of comparative research the book investigates how employ ers evaluate and treat male and female employees with various family care responsibilities **United States Income, Wealth,**

Consumption, and Inequality Diana Furchtgott-Roth,2020-09-09 United States Trends in Income Wealth Consumption and Well Being analyzes economic trends examines income inequality and discusses what can be done to increase economic mobility today *Higher Education in Societies* Gaële Goastellec,France Picard,2014-09-11 Universities are not only

economic engines but societal ones This book interrogates the embeddedness of Higher Education HE systems in national social contracts and discusses how their renegotiation is at play in the organisation of students access to universities Structured around the central concept of the social contract the growing recognition of the role of HE in its implementation and regulations governing both individual and collective access Higher Education in Societies A Multiscale Perspective explores the shifting mission of HE over the years from one thought to produce an elite to one of distributive justice by

presenting research at the macro meso and micro levels In bringing together researchers from different countries continents and disciplines to study the same issue through a multiscale analysis this book forms the starting line for further theoretical and methodological debate on the value of weaving together different approaches to the study of HE including historical comparative sociological organisational institutional quantitative and qualitative

Challenges to Teacher Education in Difficult Economic Times Joan Stephenson, Lorraine Ling, 2013-10-23 Teacher education in a financial crisis what are the consequences and how can probity be maintained Education like most other parts of everyday life is experiencing the challenges brought about by global financial constrictions This book presents the experiences and views of practising teacher educators from multiple countries and continents on how the melt down in world economics has affected and will continue to affect teacher education and concomitant experiences in schooling The ramifications are seen to extend into every aspect of teacher preparation continuing staff development and teacher support and there are significant implications for the quality of teaching and learning and the ethos and standing of the process of education as a whole Drawing on educational theory and social political and economic discourses the book addresses issues such as policy philosophy organisation funding resources modes of teaching and learning curricular change recruitment and retention amongst others and provides a snap shot across diverse contexts It aims to provide an evaluative analytical but reflective picture of teacher education in the light of the world economic crisis whilst exploring good practice and suggesting future strategies to develop the quality of teacher education and professional support teaching and learning The volume provides an insight into the need for a new paradigm for teacher education one that involves teacher educators in devising a discourse of positive and radical change It will be a valuable resource for teacher educators educational leaders policy makers educational commentators and teachers seeking to engage with the scholarship of teaching as a means to engage in continuous professional development
