Clauss, 2023-03-30 Our nation is still reeling from the 346 fatalities suffered on two flights of the Boeing 737 MAX 8 planes the first in May 2017 and the second in March 2019 These are just one of the series of costly and deadly consequences of defective products described in this book Besides the Boeing 737 planes the examples of bad products include automobiles electrical energy networks pipelines bridges and other large structures banks drinkable water and financial services While the immediate or proximate causes of the disasters have been bad design or bad production the root or underlying causes have been bad corporate management and business cultures caused by corporate leaders The final five chapters provide short essays on product design production quality control management and culture and what the leaders of our private companies and government agencies might do to reduce the pitfalls that have led to so many defective products and their dire consequences *The Complete Book of Volkswagen GTI* Russell Hayes, 2025-10-28 Take a visually thrilling joy ride through the complete history and influence of one of the most enduring and pleasurable consumer focused sports cars of all time VW has sold over 2.5 million Golf GTIs across eight generations since its debut in 1975 as a 1976 model and the car remains popular with both seasoned and newer collectors including Gen X and Millennial enthusiasts Celebrating 50 years of continuous production *The Complete Book of Volkswagen GTI* is the ultimate resource for the sportier side of VW enthusiasts and racing fans This comprehensive book features A look back at the GTI's rich racing history including World Rally Touring Car and other categories Details on other performance models like the Scirocco Corrado Golf R32 Jetta GLI and more Fresh insights interviews and more Lavishly illustrated pages *The Complete Book of Volkswagen GTI* will delight and inspire any classic racing fan and VW enthusiast in your life *Private Enforcement of Competition Law in Europe* Rafael Amaro, 2021-06-10 This book introduces the reader to key legal provisions and case law related to the procedural and substantive issues that may arise in damages litigation for breach of anti competitive agreements and abuses of a dominant position prohibitions For the past decade academic publications have focused on the proposal for a Directive on damages actions then the Directive 2014/104/EU of 26 November 2014 itself and finally the transposition texts However this understandable interest should not lead to overlook the fact that the Directive has been applied very little until now This is mainly due to its application *ratione temporis* In addition to the fact that Member States only transposed the Directive between the end of 2016 and 2018 Article 22 of the Directive provides that the substantive rules contained in the Directive cannot be applied to infringements subsequent to the national laws transposing them while the procedural rules of the Directive apply to proceedings commenced on or after 26 December 2014 Thus it is prior domestic law that continues to govern the vast majority of cases before national courts in the Pre Directive era In addition a number of issues of the utmost importance have not been addressed by the Directive such as questions of international jurisdiction or the quantification of interests For these reasons it seemed necessary not to limit this book to commenting on the Directive important as it is but to

go beyond it Directed by Rafael Amaro this book contains the contributions from leading academics attorneys jurists and economists in the field of the private enforcement of competition law It is composed of thematic chapters dealing with matters such as applicable law in international litigation limitation quantification of damages from both a European Union and a national perspective as well as national chapters presenting the state of play in several European States
