Designing Motion Markus Caspers, 2016-09-26 The chaise longue by Le Corbusier the radio by Rams the chair by Eames designers make things into cult objects and become icons themselves But who knows which coup was designed by Frua which limousine by Engel which station wagon by Opron For a long time car design was considered to

be anonymous the designers stood in the shadow of the perception of the design even though their designs can be found on the roads in millions This richly illustrated book captures the origin of a profession and maps the development of car design based on a comprehensive introduction and the career biographies of over 200 selected designers who contributed to the design of cars and many different associated products in the USA Europe and Japan between 1900 and 2000 **Handbook of Phenomenology and Cognitive Science** Daniel Schmicking, Shaun Gallagher, 2009-12-16 This volume explores the essential issues involved in bringing phenomenology together with the cognitive sciences and provides some examples of research located at the intersection of these disciplines The topics addressed here cover a lot of ground including questions about naturalizing phenomenology the precise methods of phenomenology and how they can be used in the empirical cognitive sciences specific analyses of perception attention emotion imagination embodied movement action and agency representation and cognition intersubjectivity language and metaphor In addition there are chapters that focus on empirical experiments involving psychophysics perception and neuro and psychopathologies The idea that phenomenology understood as a philosophical approach taken by thinkers like Husserl Heidegger Sartre Merleau Ponty and others can offer a positive contribution to the cognitive sciences is a relatively recent idea Prior to the 1990s phenomenology was employed in a critique of the first wave of cognitivist and computational approaches to the mind see Dreyfus 1972 What some consider a second wave in cognitive science with emphasis on connectionism and neuroscience opened up possibilities for phenomenological intervention in a more positive way resulting in proposals like neurophenomenology Varela 1996 Thus brain imaging technologies can turn to phenomenological insights to guide experimentation see e.g. Jack and Roepstorff 2003 Gallagher and Zahavi 2008 **Competition Law** Richard Whish, David Bailey, 2021 Combining detailed coverage with exceptional clarity this is the unparalleled resource for students and practitioners The leading academics in the field explain the purpose of competition policy introduce key concepts and techniques in competition law and provide insights into the complexities of market behaviour This standalone resource draws on a wide variety of sources and analyses the law in its economic context The tenth edition incorporates extensive new legislation case law decisional practice guidelines and literature New areas of coverage and discussion include The goals of competition law and policy in the 21st century including consumer welfare and the neo Brandesian school The rise of digital platforms and two-sided markets and the challenges they present for competition law and policy The latest developments in private enforcement of competition law including the Supreme Court's judgment in *Merricks v Mastercard* The implications of the European Green Deal and the sustainability agenda for competition law Changes to UK law as a result of Brexit Book jacket **Emergency Medicine** Amal Mattu, Deepi G. Goyal, 2008-04-15 Emergency Medicine is a brand new book focusing on the common pitfalls and mistakes that can occur when dealing with high risk conditions during standard medical practice Concise chapters focus on clinical relevance addressing the mistakes the consequences and the knowledge necessary to avoid high risk mistakes An essential book for all
