Biomass-based Biocomposites Vijay Kumar Thakur, 2013-10-24 Green polymer materials from biomass based natural resources are of paramount importance in a range of applications from biomedicine to biocomposites Indeed during the last few years there has been increasing demand for green biocomposites obtained from renewable and sustainable biomass based resources Plants grasses straws agriculture residues algae water plants etc are among one of the most promising and the most abundant bio based resources of biopolymers on earth and they are an indispensable component in biocomposites One of the important features of biomass based materials is that they can be designated and tailored to meet different requirements depending upon the application Renewability low cost eco friendliness ease of processing non abrasiveness and relevant mechanical as well as physico chemical properties are among the most important advantages of using biomass based materials for the development of green biocomposites The prime aim of this book is to give an overview on different kinds of biomass based biocomposites for a range of applications from biocomposites to biomedicine This book is unique in the sense that it deals exclusively with biomass based biocomposites that are procured from the biopolymers found in nature In addition it covers novel topics related to the synthesis properties characterization and diverse applications of different biomass based biocomposites including nanocomposites Some of the main features are An overview of the applications of biomass based biocomposites in different fields to provide researchers students with a thorough insight into the various systems An up to date working reference on biomass based biocomposites including state of the art techniques and developments in the field Although the commercial applications of these biocomposites are in their infancy these materials have a huge commercial potential In setting out the next generation of advances in eco friendly biomass based biocomposites this book opens the way for further developments in the field A review of the wealth of research on new biomass based polymers together with their applications Biomass based Biocomposites will be a standard reference book for biocomposites

engineers and all those studying and researching in this important area as well as those in the automotive industry Professionals in academia and industry will appreciate the multidisciplinary nature of this comprehensive and practical reference book *Design and Emotion* Deana McDonagh,Paul Hekkert,Jeroen van Erp,Diane Gyi,2003-10-24 There is considerable interest in and growing recognition of the emotional domain in product development The relationship between the user and the product is paramount in industry which has led to major research investments in this area Traditional ergonomic approaches to design have concentrated on the user's physical and cognitive abilities Transport, Climate Change and the City Robin Hickman,David Banister,2014-02-05 Sustainable mobility has long been sought after in cities around the world particularly in industrialised countries but also increasingly in the emerging cities in Asia Progress however appears difficult to make as the private car still largely fuelled by petrol or diesel remains the mainstream mode of use Transport is the key sector where carbon dioxide CO2 emissions seem difficult to reduce Transport Climate Change and the City seeks to develop achievable and low transport CO2 emission futures in a range of international case studies including in London Oxfordshire Delhi Jinan and Auckland The aim is that the scenarios as developed and the consideration of implementation and governance issues can help us plan for and achieve attractive future travel behaviours at the city level The alternative is to continue with only incremental progress against CO2 reduction targets to sleepwalk into climate change difficulties oil scarcity a poor quality of life and to continue with the high traffic casualty figures The topic is thus critical with transport viewed as central to the achievement of the sustainable city and reduced CO2 emissions Biocomposites - Bio-based Fibers and Polymers from Renewable Resources R. Arun Ramnath,Sanjay M. R,Sergey M. Gorbatyuk,Steffen Fischer,Suchart Siengchin,2023-11-30 Biocomposites Bio based Fibres and Polymers from Renewable Resources Processing Performance Durability and Applications provides a systematic and comprehensive review of recent developments in this important area of research Chapters discuss novel techniques for processing and the characterization of biocomposites derived from renewable resources focusing on durability strength prediction aging methods and performance evaluation Future trends directions and opportunities are also addressed Readers will find an up to date summary of recent research findings that have been conducted on biocomposites making this an essential reference resource for academic and industrial researchers and anyone working in the development of innovative materials from renewable resources Provides wide coverage of processing methods mechanical performance and industrial applications Emphasizes durability assessment of natural fiber composites in different environments **Disciplines and Interdisciplinarity in Foreign Language Studies** Hans Lauge Hansen,2004 In the last part of the twentieth century the human sciences witnessed three paradigmatic turns that made it possible to comprehend each individual discipline in the light of a unitary object of study the text the pragmatic turn within linguistics the linguistic turn within historical and cultural studies and the cultural turn within literary studies Combined with the more comprehensive nature of the texts studied the mass media postcolonial studies etc reflection on the theoretical approach is

more important today than ever as a means of interdisciplinary practice across both disciplines and languages Most of the contributions in this book were originally presented at a conference on Disciplines and Interdisciplinarity in Foreign Language Studies The conference took place at the University of Aarhus Denmark 19 20 September 2003 and was organised by The Language and Culture Network Founded in 2002 the network promotes interdisciplinary collaboration between the traditional branches of Foreign Language Studies

Organizational Knowledge in the Making Gerardo Patriotta, 2003-03-27 Knowledge is a very seductive but elusive concept Following the wider debate about the emergence of the information age and the knowledge society recent years have seen an explosion of writings about organizational knowledge from different disciplinary and theoretical perspectives Yet theoretical development has not always been accompanied by sound empirical research Methodologies for studying knowledge as an empirical phenomenon are still lagging behind This book aims to fill the gap between theory method and practice by developing a phenomenological approach to the study of knowing in the context of organizing The book contributes to the fields of strategy and organization in three ways First it provides a critical review of the concepts debates and epistemological assumptions underpinning existing theories of organizational knowledge Second it develops a methodological framework for studying knowledge processes as an empirical phenomenon that is based on three methodological lenses time breakdowns and narratives Third drawing on the three lens framework the book presents a phenomenological enquiry on knowing and organizing processes within two large car manufacturing plants at Fiat Auto Italy The book highlights the need to re think organizational knowledge from an action based perspective and suggests a new vocabulary for understanding knowledge oriented phenomena in organizations The book is addressed both to scholars of strategy and organization and to reflective practitioners Academics will be stimulated to reflect upon concepts they normally take for granted and habitually use in their research The book is also suitable for young researchers and doctoral students whose research interests lie in the areas of knowledge and organization The Fiat case study on which the book is based offers interesting insights to practitioners as far as classical themes like change innovation and organizational design are concerned Contrary to mainstream knowledge management texts however this book does not provide any recipes about

alleged best ways for managing organizational knowledge Rather it invites managers and practitioners to reflect about the repertoire of knowledge they possess and yet cannot articulate
