Taylor, 2022-02-11 This book addresses a problem that affects the work of all educators how traditional methods of assessment undermine the capacity of schools to serve students with diverse cultural and social backgrounds and identities Anchored in a common sense notion of validity this book explains how current K 12 assessment practices are grounded in the language experiences and values of the dominant White culture It presents a timely review of research on bias in classroom and large scale assessments as well as research on how students level of engagement influences their performances The author recommends practices that can improve the validity of students assessment performances by minimizing sources of bias using culturally responsive assessment tools and adopting strategies likely to increase students engagement with assessment tasks This practical resource provides subject specific approaches for improving the cultural and social relevance of assessment tools and offers guidance for evaluating existing assessment instruments for bias language complexity and accessibility issues Book Features Research based recommendations for improving assessment fairness validity and cultural social relevance Practices that have been shown to improve the effectiveness of classroom assessments in supporting student learning Concrete examples of how to create culturally relevant assessment tasks that target valued learning goals in language arts mathematics social studies and science classrooms Appendixes that provide tools educators can use to improve grading practices *The Common Core, an Uncommon Opportunity* Judith K. March, Karen H. Peters, 2014 Because the Common Core requires bold action Why The Common Core

an Uncommon Opportunity Why now Because it tackles a largely overlooked component of implementation how to redesign your instructional delivery system K 12 And you ll have to if you don t you ll be subject to the very same failure and frustration so many other districts and schools are experiencing What s more March and Peters describe how to integrate 21st Century Skills at the very same time It will help district leaders Develop structured consistent and organized teaching and learning practices Make district wide infrastructure adjustments for sustained reform Use best practices for sustained achievement and continuous curriculum review
