Utilization Focused Evaluation, 1987 **Evaluation Roots** Marvin C. Alkin, 2004-02-19 Concern for evaluation theoretical prescriptions emerged about 40 years ago giving it a history that is both recent enough to be part of the living experience of many of today's theorists and old enough to afford an opportunity for an analysis of how the field has evolved over time This book examines current evaluation theories and traces their evolution with the point of view that theories build upon theories and therefore evaluation theories are related to each other Initially all evaluation was derived from social science research methodology and accountability concerns The way in which these evaluation roots grew to form a tree helps to provide a better understanding of evaluation theory Thus the book uses an evaluation theory tree as its central metaphor The authors posit that evaluation theories can be classified by the extent to which they focus on methods uses or valuing these three approaches form the major limbs of the tree In addition to

the authors overview which analyzes the evaluation theory tree and connections among theories the book contains essays by most of the leading evaluation theorists In these pieces the evaluators comment on their own development and give their views of their placement upon the tree Essentials of Utilization-Focused Evaluation Michael Quinn Patton,2011-08-22 Based on Michael Quinn Patton s best selling Utilization Focused Evaluation this briefer book provides an overall framework and essential checklist steps for designing and conducting evaluations that actually get used The new material and innovative graphics present the utilization focused evaluation process as a complex adaptive system incorporating current understandings about systems thinking and complexity concepts The book integrates theory and practice is based on both research and professional experience and offers new case examples and cartoons with Patton s signature humor

Rist,Nicoletta Stame,2011-12-31 Recent developments in policy evaluation have focused on new notions of process and use or notably influence But this debate among evaluators on how evaluations are used has been essentially a closed one evaluators talking only among themselves The debate has gone on seemingly oblivious to fundamental changes in the intellectual landscape of public management organizational theory information technology and knowledge management New realities demand a different approach toward evaluation The current era is characterized by the emergence of an increasingly global set of pressures for governments to perform effectively not just efficiently and to demonstrate that their performance is producing desired results Information technology allows enormous quantities of information to be stored sorted analyzed and made available at little or no cost The result for those in the evaluation community is that while individual evaluations are still conducted and reported upon they are a rapidly diminishing source of information In the new environment ever accelerating political and organizational demands and expectations are reframing thinking about the definition of what fundamentally constitutes evaluation and what we understand as its applications In this twelfth volume in the Comparative Policy Evaluation series authors from fourteen nations address these issues from multiple vantage points From Studies to Streams is an essential tool for policymakers government officials and scholars interested in the contemporary status of evaluation Innovative Teaching and Learning Methods in Educational Systems Endah Retnowati,Suprpto,Mohammad Jerusalem,Kristian Sugiyarto,Wagiran,2019-11-11 This proceedings volume of InCoTEPD 2018 covers many ideas for handling a wide variety of challenging issues in the field of education The outstanding ideas dealing with these issues result in innovation of the system There are many innovation strategies resulting from recent research that are discussed in this book These strategies will become the best starting points to solve current and future problems This book provides an in depth coverage of educational innovation developments with an emphasis on educational systems formal or informal education strategies learning models and professional teachers Indeed those developments are very important to be explored for obtaining the right way of problem solving Providing many ideas from the theoretical foundation into the practice this book is versatile and well organized for an appropriate audience in the field of education It is an extremely useful reference for students teachers professors practitioners and government representatives in many countries
