Voyages Lord Seaton Seven Planets:

The Voyages of Lord Seaton to the Seven Planets Marie-Anne De Roumier-Robert, 2015-11-28 *The Voyages of Lord Seaton to the Seven Planets* 1766 is an interplanetary romance in the tradition of Cyrano de Bergerac's *History of the States and Empires of the Moon*. In it the eponymous hero and his sister Monime travel to the seven planets of the Solar System on the wings of the genie Zachiel. They discover that the inhabitants of each world represent a human character trait: Selenites are capricious, Martians are bellicose, Venusians are lovers, etc. Eventually they return to Earth where Monime inherits the throne of Georgia. Also included in this volume is another high fantasy tale *The Water Sprites* 1768, a colorful and extravagant if eccentric classic of fantastic fiction which has closer affiliations with modern fantasy than most contemporary works in a similar vein.

Lost Mars Mike Ashley, 2018-10-19 A thoroughly enjoyable collection of stories imagining the Red Planet during the golden age of science fiction from an award-winning anthologist. Kirkus Reviews: An antique shop owner gets a glimpse of the Red Planet through an intriguing artifact. A Martian's wife contemplates the possibility of life on Earth. A resident of Venus describes his travels across the two alien planets. From an arid desert to an advanced society far superior to Earth's portrayals of Mars have differed radically in their attempts to uncover the truth about our neighboring planet. Since the 1880s, after an astronomer described channels on its surface, writers have speculated endlessly on what life on Mars might look like and what might happen should we make contact with its inhabitants. This collection offers ten wildly imaginative stories by famed authors like H. G. Wells, Ray Bradbury, and J. G. Ballard, as well as hard-to-find selections by unjustly forgotten writers of the genre. Introduced by acclaimed anthologist Mike Ashley, they vividly evoke a time when notions of life on other planets, from vegetation and water to space invaders and utopian societies, were new and startling. As we continue to imagine landing people on Mars, these stories represent gripping and vivid dispatches from futurists past. A superlative set of stories. Vibrant and powerful. Locus. These stories are of the highest quality and illustrate how our evolving understanding of the Red Planet changed the way we wrote about it and how Mars came to occupy a prominent position in our hopes, dreams, and fears as the modern age dawned and grew. Booklist.

Creators of Science Fiction Brian Stableford, 2009-11-01 Well-known critic and novelist Brian Stableford here discusses the writers, editors, and publishers who helped create the modern genre of science fiction: Mary Wollstonecraft, Shelley, Edgar Allan Poe, Camille Flammarion, Jules Verne, H. G. Wells, Hugo Gernsback, John W. Campbell Jr., Edward E. Doc Smith, Robert A. Heinlein, James Blish, Gregory Benford, and Ian Watson. Complete with bibliography and index.

Errant Natures and Wayward Bodies in Late-Victorian Speculative Fiction Adrian Tait, 2025-09-04 Adrian Tait argues that late Victorian stories represent an important but still neglected part of a green literary tradition setting up a dialogue with modernity that is no less relevant today. Late Victorian literature is full of fascinating examples of what was then called the scientific romance, an emerging form of science or speculative fiction whose concern with the liveliness or agentiality of the nonhuman animal and more than human natural

world today makes it particularly noteworthy In a succession of short stories and novels many now forgotten writers such as Grant Allen John Davidson George Griffith and Henry Marriott Watson dramatized the possibility that Nature had not been conquered by industrial modernity but might instead be reacting to it with an unexpected dynamism Long before environmental issues such as climate change came to the public s attention they asked whether humankind might one day inadvertently create existential threats to its own survival In so doing these pioneers of sf depicted their world in terms that anticipate the recent new materialist focus on a mutable and dynamic reality responsive and perhaps resistant to human endeavor
